Conferences and Conventions Tony Rogers,Peter Wynn-Moylan,2022-07-11 Fully revised and updated to reflect current trends and emerging topics, the fourth edition of Conferences and Conventions: A Global Industry provides an expert-led, comprehensive introduction to, and overview of, the key elements of the global conference, convention and meetings industry. This book examines the conference industry's origins, structure and future development, as well as its economic, social and environmental impacts. It provides an in-depth analysis of the strategies, practices, knowledge and skills required to organise memorable conferences and similar business events, with detailed descriptions of all the planning and operational processes. Following an international approach, this edition features additional sections on the increase in technological advancements and opportunities, as well as the rise of virtual and hybrid events in a post-pandemic era. Written in an accessible and engaging style, the book includes integrated case studies to highlight current issues and demonstrate theory in practice. Structured logically with useful features throughout to aid learning and understanding, this book is an invaluable resource to students following events management, hospitality and tourism courses, as well as for event planners and practitioners already working in the conference industry.

Marketing Destinations and Venues for Conferences, Conventions and Business Events Tony Rogers,Rob Davidson,2015-11-19 Marketing Destinations and Venues for Conferences, Conventions and Business Events introduces students to key areas of marketing and promotion that are essential if destinations are to compete successfully in the rapidly expanding global business event sector. It achieves this by looking at issues surrounding business event marketing, strategic planning, destination and venue selling strategies and future challenges. The 2nd Edition has also been updated to include: New content on:

destination marketing organisations' and venues' use of technology, use and impact of social media, sponsorship and partnership issues, economic changes as well as their responses to demand for sustainable meetings locations Updated and new case studies on growth areas and emerging markets e.g. Middle East, Asia, Eastern Europe/Russia, Africa and South America, but also to include material on mature markets, destinations and venue operators A genuinely international focus in terms of content and examples New review and discussion questions and, where appropriate, learning outcomes New online resource package for students and lecturers including: weblinks, power point slides and project questions (coming soon). Accessible, global and informative, this is essential reading for all future business event and conference managers.

Events - Future, Trends, Perspectives Kim Werner,Ding Ye,2020-05-11 Events – future, trends, perspectives provides insights into many of the recent developments within the diverse event industry. International scholars and experts with backgrounds in multiple related fields have taken up exciting research topics and offer perspectives, thoughts and views on a number of current and future issues and challenges. The topics are as diverse as the industry itself and include discussions on gender and diversity, disruptive technologies, sustainability, psychological effects, the co-creation of experiences, the future of event education and many more. Vivid case studies and best practice examples are used to illustrate current and future

developments and to spark discussion and debate amongst scholars, practitioners and students alike. The Corona crisis (Covid-19) is having a massive impact on the events industry. Due to the editorial deadline of this book in February 2020, this topic could not be considered in this edition. We ask for your understanding. China, the Future of Travel Roy Graff,Sienna Parulis-Cook,2019-07-09 Since it was first published in 2005 and through the subsequent updated editions in 2008 and 2015, China, the Future of Travel has been a vital, practical handbook for the tourism industry. With this 2019 edition, we have reviewed, revised, and expanded the entire content and included brand new case studies and interviews with leading industry experts. As tourism from China grew six-fold from 32 million in 2005 to 180 million trips projected for 2019, so too did the complexity and diversity of the sector. Online and mobile travel now dominates, and independent travel has overtaken group tourism.

Peptides: The Wave of the Future Richard A. Houghten,Michal Lebl,2014-11-14 This volume contains the proceedings of the Second International Peptide Symposium and the Seventeenth American Peptide Symposium, held on 9-14 June, 2001, at the Town and Country Resort in San Diego, California. The biennial meeting was held under the auspices of the American Peptide Society. In addition to the main Symposium, we were honored to have the Merrifield Satellite Symposium, honoring Bruce Merrifield's

accomplishments on his 80th birthday. Over 1250 participants from around the world attended the lectures, posters, and exhibits. Reflecting the international nature of the Symposium, there were participants from 37 countries in attendance. In addition to the 75 plenary lectures, there were over 575 poster presentations, and 70 commercial exhibits as well as booths from the American, Australian, Chinese, European, and Japanese Peptide Societies. These proceedings include plenary lectures and oral and poster presentations collected from a wide diversity of topics providing a truly comprehensive and up-to-date overview of the field of peptide science. This publication contains essential reference information for researchers active in peptide science.

Bitemporal Data Tom Johnston,2014-08-19 Bitemporal data has always been important. But it was not until 2011 that the ISO released a SQL standard that supported it. Currently, among major DBMS vendors, Oracle, IBM and Teradata now provide at least some bitemporal functionality in their flagship products. But to use these products effectively, someone in your IT organization needs to know more than how to code bitemporal SQL statements. Perhaps, in your organization, that person is you. To correctly interpret business requests for temporal data, to correctly specify requirements to your IT development staff, and to correctly design bitemporal databases and applications, someone in your enterprise needs a deep understanding of both the theory and the practice of managing bitemporal data. Someone also

needs to understand what the future may bring in the way of additional temporal functionality, so their enterprise can plan for it. Perhaps, in your organization, that person is you. This is the book that will show the do-it-yourself IT professional how to design and build bitemporal databases and how to write bitemporal transactions and queries, and will show those who will direct the use of vendor-provided bitemporal DBMSs exactly what is going on under the covers of that software. Explains the business value of bitemporal data in terms of the information that can be provided by bitemporal tables and not by any other form of temporal data, including history tables, version tables, snapshot tables, or slowly-changing dimensions. Provides an integrated account of the mathematics, logic, ontology and semantics of relational theory and relational databases, in terms of which current relational theory and practice can be seen as unnecessarily constrained to the management of nontemporal and incompletely temporal data. Explains how bitemporal tables can provide the time-variance and nonvolatility hitherto lacking in Inmon historical data warehouses. Explains how bitemporal dimensions can replace slowly-changing dimensions in Kimball star schemas, and why they should do so. Describes several extensions to the current theory and practice of bitemporal data, including the use of episodes, whenever temporal transactions and queries, and future transaction time. Points out a basic error in the ISO’s bitemporal SQL standard, and warns practitioners against the use of that faulty functionality. Recommends six extensions to

the ISO standard which will increase the business value of bitemporal data. Points towards a tritemporal future for bitemporal data, in which an Aristotelian ontology and a speech-act semantics support the direct management of the statements inscribed in the rows of relational tables, and add the ability to track the provenance of database content to existing bitemporal databases. This book also provides the background needed to become a business ontologist, and explains why an IT data management person, deeply familiar with corporate databases, is best suited to play that role. Perhaps, in your organization, that person is you.

Working with Venues for Events Emma Nolan,2017-11-28 This is a book for aspiring event managers, providing both a theoretical and a practical guide to selecting and working with venues as part of the event planning process. The book explores the different types of venues available to event managers, from unique venues such as historical buildings and theatres to sporting and academic venues, analysing the specific characteristics, benefits and drawbacks that distinguish them. It also illustrates how venues function and are managed, incorporating key aspects of venue management including staffing, marketing, legislation, production, scheduling and administration. Sustainability, ethics and technology are also integrated throughout, along with a vast range of industry examples of different venue types and events from around the world. Comprehensive and accessible, Working with Venues for Events offers students an essential

understanding of how event managers can successfully negotiate, work with and plan for a successful event in a variety of venue settings. This is an invaluable resource for anyone with an interest in events management.

C2 Re-envisioned Marius S. Vassiliou,David S. Alberts,Jonathan Russell Agre,2014-12-08 Command and Control (C2) is the set of organizational and technical attributes and processes by which an enterprise marshals and employs human, physical, and information resources to solve problems and accomplish missions.C2 Re-envisioned: The Future of the Enterprise identifies four interrelated megatrends that are individually and collectively shaping the state of the art and practice of C2 as

well as the mission challenges we face. These megatrends the book examines are: Big Problems—manifested in part as increasing complexity of both endeavors and enterprises, as military establishments form coalitions with each other, and partnerships with various civilian agencies and non-governmental organizations Robustly Networked Environments—enabled by the extremely broad availability of advanced information and communications technologies (ICT) that place unprecedented powers of information creation, processing, and distribution in the hands of almost anyone who wants them—friend and foe alike Ubiquitous Data—the unprecedented volumes of raw and processed information with which human actors and C2 systems must contend Organizational alternatives—as decentralized, net-enabled approaches to C2 have been made more feasible by technology. The book analyzes historical examples and experimental evidence to determine the critical factors that make C2 go wrong and how to get it right. Successful enterprises in the future will be those that can reconfigure their approaches in an agile manner. Offering fresh perspectives on this subject of critical importance, this book provides the understanding you will need to choose your organizational approaches to suit the mission and the conditions at hand.
