**Intelligent Data Communication Technologies and Internet of Things** D. Jude Hemanth,Subarna Shakya,Zubair Baig,2019-11-10 This book focuses on the emerging advances in distributed communication systems, big data, intelligent computing and Internet of Things, presenting state-of-the-art research in frameworks, algorithms, methodologies, techniques and applications associated with data engineering and wireless distributed communication technologies. In addition, it discusses potential topics like performance analysis, wireless communication networks, data security and privacy, human computer interaction, 5G Networks, and smart automated systems, which will provide insights for the evolving data communication technologies. In a nutshell, this proceedings book compiles novel and high-quality research that offers innovative solutions for communications in IoT networks.

The Ethics of Neuroscience and National Security Nicholas G. Evans,2021-05-24 New advances in neuroscience promise innovations in national security, especially in the areas of law enforcement, intelligence collection, and armed conflict. But ethical questions emerge about how we can, and should, use these innovations. This book draws on the open literature to map the development of neuroscience, particularly through funding by the Defense Advanced Research Projects Agency, in certain areas like behavior prediction, behavior modification, and neuroenhancement, and its use in the creation of novel weapons. It shows how advances in neuroscience and new technologies raise ethical issues that challenge the norms of law enforcement, intelligence collection, and armed conflict, broadly grouped under the term national security. Increasing technological sophistication without attention to ethics, this book argues, risks creating conditions for the development of dual-use technologies that may be prone to misuse, are grounded in an incomplete understanding of the brain, or are based on a limited view of the political contexts in which these technologies arise. A concluding section looks at policy and regulatory options that might promote the benefits of emerging neuroscience, while mitigating attendant risks. Key Features: First broad survey of the ethics of neuroscience as it applies to national security Innovative ethical analysis over a range of cross-cutting technologies including behavior prediction and modification tools, human enhancement, and novel lethal and nonlethal weapons Ethical analysis covering all stages from the development, testing, and use (or misuse) of these technologies; and decisions from the individual scientist to the nation state Strong policy focus at multiple levels, from self-governance to international regulation Combination of philosophical analysis with grounded, practical recommendations

**Future Information Technology, Application, and Service** James (Jong Hyuk) Park,Victor C.M. Leung,Cho-Li Wang,Taeshik Shon,2012-06-05 This book is proceedings of the 7th FTRA International Conference on Future Information Technology (FutureTech 2012). The topics of FutureTech 2012 cover the current hot topics satisfying the world-wide ever-changing needs. The FutureTech 2012 is intended to foster the dissemination of state-of-the-art research in all future IT areas, including their models, services, and novel applications associated with their utilization. The FutureTech 2012 will provide an opportunity for academic and industry professionals to discuss the latest issues and progress in this area. In addition, the conference will publish high quality papers which are closely related to the various theories, modeling, and practical applications in many types of future technology. The main scope of FutureTech 2012 is as follows. Hybrid Information Technology Cloud and Cluster Computing Ubiquitous Networks and Wireless Communications Multimedia Convergence Intelligent and Pervasive Applications Security and Trust Computing IT Management and Service Bioinformatics and Bio-Inspired Computing Database and Data Mining Knowledge System and Intelligent Agent Human-centric Computing and Social Networks The FutureTech is a major forum for scientists, engineers, and practitioners throughout the world to present the latest research, results, ideas, developments and applications in all areas of future technologies.

**Cognitive Enhancement** Shira Knafo,César Venero,2014-12-20 Cognitive Enhancement: Pharmacologic, Environmental and Genetic Factors addresses the gap that exists in research on the topic, gathering multidisciplinary knowledge and tools that help the reader understand the basics of cognitive enhancement. It also provides assistance in designing procedures and pharmacological approaches to further the use of novel cognitive enhancers, a field that offers potential benefit to a variety of populations, including those with neurologic and psychiatric disorders, mild aging-related cognitive impairment, and those who want to improve intellectual performance. The text builds on our knowledge of the molecular/cellular basis of cognitive function, offering the technological developments that may soon enhance cognition. Separate sections cover enhancement drugs, environmental conditions, and genetic factors in terms of both human and animal studies, including both healthy/young and aging/diseased individuals. Provides a multidisciplinary knowledge, enabling a further understanding of cognitive enhancement Offers coverage of the pharmacologic, environmental, and genetic factors relevant to the topic Discusses cognitive enhancement from the perspective of both healthy and diseased or aging populations Topics are discussed in terms of both human and animal studies
