*Particle Verbs in English* Nicole Dehé, 2002-01-01 This book offers a new account of the transitive particle verb construction in English. The main emphasis is on the alternation between the two word orders possible in English (continuous: hand in the manuscript vs. discontinuous: hand the manuscript in). The central aim is to show that the choice of the word order is not optional as has often been claimed in related literature on the topic and that a syntactic analysis should thus not be based on optional movement operations or optional feature selection. The author argues in some detail that the choice of the word order is determined to a great extent by the information structuring of the context in which the relevant construction is embedded. The syntactic structure she develops is based on a substantial combination of empirical facts, evidence from theoretical research and the results of two experimental studies on the intonation patterns of the

construction.

**A Case Frame Grammar and Lexicon for the Book of Revelation** Paul L.

Danove, 2022-06-02 Paul Danove presents a case frame grammar and lexicon for the Book of Revelation, with three major goals. He first provides a step-by-step introduction to case frame analysis, incorporating various adaptations and extensions to address the needs of the study of the Greek of the New Testament. He then supplies a comprehensive case frame grammar and description of the syntactic, semantic, and lexical requirements that each predicator imposes on its complements. He finally generates a case frame lexicon that guides the interpretation and translation of each predicator occurrence in its grammatical contexts. Danove begins with the method of analysis and description, with an overview of case frame grammar, an analysis of the events grammaticalized by the predicators in the Book of Revelation, descriptions of the usages of these events, and further specification of these descriptions. He then provides illustrative examples of the predicators with each usage, discusses the distinctive grammatical characteristics of Revelation, sets forth the protocols for generating lexicon entries, and concludes with the case frame lexicon for predicators in the text of Revelation.

*A Grammatical and Exegetical Study of New Testament Verbs of Transference*

Paul Danove, 2009-08-18 This study continues the adaptation of the method of Case Frame analysis for the investigation of the Greek text of the New Testament. Case Frame analysis distinguishes the words of a language into two categories, predicators [words that require completion by other words for their correct grammatical use] and non-predicators [words that do not require such completion], and provides rigorous procedures for describing the syntactic, semantic, and lexical requirements that predicators impose on the words that complete their meaning. The inclusion of semantic function and feature descriptions in Case Frame analysis permits the development of a new genre of lexicon that specifies not only syntactic and lexical information (as do traditional dictionaries) but detailed semantic information. The resulting Case Frame lexicon entries are both more compact and more nuanced than traditional lexicon entries. Danove conducts an exhaustive Case Frame analysis of the ditransitive verbs of transference in the New Testament. He uses this analysis to develop a set of descriptive guidelines for interpreting and translating the various usages of ditransitive verbs of transference and applies these rules in exegetical studies of the text of the New Testament to generate a Case Frame lexicon of the verbs of transference in the New Testament. This study will distinguish the requirements of the 127 New Testament verbs of transference according to four syntactic functions, twelve semantic functions, and 22 lexical realizations. This will permit a rigorous investigation of all occurrences of verbal complements with the same syntactic, semantic, and lexical attributes. The study also will consider the influence of one semantic feature [an inherent quality of words that has implications for their lexical realization] and of the 'intrusion' of four

grammatical constructions [inherent structuring templates of grammar that govern syntactic, semantic, and lexical attributes and modify meaning] on each category of complements with the same syntactic, semantic and lexical description. This will produce a rigorous description of meaning that becomes the basis for Danove's contributions to the linguistic study of biblical Greek and to the exegesis of biblical texts.
