New York Magazine ,1987-07-27 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

The G7/G8 System Peter I Hajnal,2019-01-04 First published in 1999, this guide to the G7/G8 system discusses the origins, characteristics, role and agenda of the G7/G8 system; reviews its evolution; surveys the major debates and questions about the G7/G8; and provides a detailed study of its complex and elusive documentation. It also includes a comprehensive bibliography, of the G7/G8 and its concerns, listing over 600 books, shorter writings, publications in series, book chapters, articles in periodicals, government publications, international organisation publications and Internet resources. The book is intended as a contribution to scholarly literature and as a useful work of reference for academics, government officials, the media, libraries and the general public.

Clip, Stamp, Fold Beatriz Colomina,2021-04-29 An explosion of little architectural magazines in the 1960s and 1970s instigated a radical transformation in architectural culture, as the magazines acted as a site of innovation and debate. Clip/Stamp/Fold takes stock of seventy little magazines from this period. The book brings together a remarkable range of documents and original research which the project has produced during its continuous travels over the last four years starting with the exhibition at the Storefront in November 2006. The book features transcripts from the “Small Talks” events in which editors and designers were invited to discuss their magazines; a stocktaking of over 100 significant issues that tracks the changing density and progression of the little magazine phenomenon; transcripts of more than forty interviews with magazine editors and designers from all over the world; a selection of magazine facsimiles; and a fold out poster that offers a mosaic image of more than 1,200 covers examined during the research.

Images in Use Matteo Stocchetti,Karin Kukkonen,2011 Conceptualising images as images in use, this title considers the agencies behind visual communication and its impact on society. It engages critically with traditional approaches to visual analysis, socially situated analyses of images and demonstrates the explanatory force of thinking through images in use in a series of case studies.

Guidebook to the Constellations Phil Simpson,2012-06-26 This handbook is a guide to exploring the classical night sky and its wonderful telescopic sights. All 88 officially recognized constellations are presented in natural groups which are related by their origin and location in the sky. Each group is explained by a fascinating story which tells what each constellation represents, how it appears in the sky, and why the other constellations of the group are close by, or related in some other manner. Some of these stories are classical myths which show how and why ancient cultures saw the constellations as related groups. Others are about more modern astronomers who sought recognition by filling in the gaps between the ancient constellations with inventions of their own. Both types of stories are crafted to make the constellation groups memorable, so that amateur astronomers can not only locate and recognize the constellations more easily, but also be able to pinpoint the celestial objects they contain more quickly. Specific instructions are given for finding each constellation, how to spell and pronounce the constellation and star names, plus the origins of the star names. Finder charts show each constellation group and a large area of sky around the group. These charts also indicate pointer stars which aid in finding the constellations. More detailed charts show how each constellation figure is visualized through simple line drawings. For each constellation, there is a table of about 10 to 30 telescopic objects selected to include a wide range of difficulty. Some can be glimpsed with the unaided eye, others require a 12 or 14 inch telescope. All the most prominent telescopic objects are included, plus a varied selection of interesting, but much more difficult objects. The tables include each object’s celestial coordinates, type, size, brightness, other information specific to each type of object, and a recommendation of the appropriate telescope size needed for good viewing. There are also photographs of constellations and telescopic objects, detailed locator charts for the hard-to-find objects, and plots of binary star orbital motions. The same charts used to show the constellation figures are repeated, with the addition of symbols indicating the locations of all the selected telescopic objects. An index and seven appendices help the user find specific objects or classes of objects.
