Information Doesn't Want to Be Free Cory

Doctorow, 2014-11-01 "Filled with wisdom and thought experiments and things that will mess with your mind." — Neil Gaiman, author of *The Graveyard Book* and *American Gods* In sharply argued, fast-moving chapters, Cory Doctorow's *Information Doesn't Want to Be Free* takes on the state of copyright and creative success in the digital age. Can small artists still thrive in the Internet era? Can giant record labels avoid alienating their audiences? This is a book about the pitfalls and the opportunities that creative industries (and individuals) are confronting today — about how the old models have failed or found new footing, and about what might soon replace them. An essential read for anyone with a stake in the future of the arts, *Information Doesn't Want to Be Free* offers a vivid guide to the ways creativity and the Internet interact today, and to what might be coming next. This book is DRM-free.

Revolutionary Nonviolence Professor Richard Jackson, Joseph Llewellyn, Griffin Manawaroa Leonard, Aidan Gnoth, Tonga Karena, 2020-03-15 *Revolutionary Nonviolence: Concepts, Cases and Controversies* provides an advanced introduction to the central philosophy, ideas, themes, controversies and challenges of applying revolutionary nonviolence in political struggles today, with a particular emphasis on reframing nonviolence through a postcolonial lens. Bringing together an eminent group of researchers and activist-scholars, this collection focuses on a number of important questions: Is a commitment to radical nonviolence a necessity for generating revolutionary change in

society? Should revolutionary movements abandon their reliance on political violence as a tool of change? What are some of the practical and theoretical challenges of adopting revolutionary nonviolence today? What can we learn from groups, actors and cases of people who have used revolutionary nonviolence to struggle against injustice? With a mix of theoretical and case study based chapters, the volume explores these and other important questions about how to generate necessary and lasting revolutionary change today.

Technological Innovation Networks Bing Ran, 2017-09-01 The central theme of this book series is to explore the contemporary perspectives on managing technological innovations and related strategic policy issues. Specifically, this book series open to all potential topics that need attention within the broad theme of the management of technology and innovations, and promote an interdisciplinary scholarship and dialogue on the management of innovation and technological change in a global context from strategic, managerial, behavioral, and policy perspectives. The third volume of this book series concentrates on “Technological Innovation Networks: Collaboration and Partnership” - a theme resonating with scholars and practitioners that innovation requires a network of partners to collaborate. Authors from around the world contribute to this volume by approaching this theme from many different perspectives: an institutional understanding of international R&D networks, a stakeholder centrality potential in innovation networks, the intersection between intellectual structure and M & A, the rejections of the technological opportunities due to lock-in, the policy-practice paradox of technological innovations, Japan's national innovation strategy, immigrant entrepreneurs in patents and performance, the impact of university research parks on technology transfer, a historical narrative of cotton technology in China, and the innovative online or blended education in terms of motivation and

reality. These researches have made significant attempts to address the important questions on how technological innovation touched on many aspects of our networked social life, thus I hope readers who are interested in learning the most contemporary perspectives on the technological innovation will be impressed, enriched, and intrigued by their analyses in each chapter. As the editor, I hope readers of the volume could enjoy these chapters by its global nature, the practicality orientation, the critical perspective, and the new theories and practices embedded in the selected research.

Brain Lock Jeffrey M. Schwartz, 1997-01-31 An estimated 5 million Americans suffer from obsessive-compulsive disorder (OCD) and live diminished lives in which they are compelled to obsess about something or to repeat a similar task over and over. Traditionally, OCD has been treated with Prozac or similar drugs. The problem with medication, aside from its cost, is that 30 percent of people treated don't respond to it, and when the pills stop, the symptoms invariably return. In *Brain Lock*, Jeffrey M. Schwartz presents a simple four-step method for overcoming OCD that is so effective, it's now used in academic treatment centers throughout the world. Proven by brain-imaging tests to actually alter the brain's chemistry, this method doesn't rely on psychopharmaceuticals. Instead, patients use cognitive self-therapy and behavior modification to develop new patterns of response to their obsessions. In essence, they use the mind to fix the brain. Using the real-life stories of actual patients, *Brain Lock* explains this revolutionary method and provides readers with the inspiration and tools to free themselves from their psychic prisons and regain control of their lives.

Knowledge is a result of never-ending processes of circulation. This accessible volume is the first comprehensive multidisciplinary work to explore these processes through the perspective of scholars working outside of Anglo-American paradigms. Through a variety of literature reviews, examples of recent research and in-depth case studies, the chapters demonstrate that the analysis of knowledge circulation requires a series of ontological and epistemic commitments that impact its conceptualisation and methodologies. Bringing diverse viewpoints from across the globe and from a range of disciplines, including anthropology, economics, history, political science, sociology and Science & Technology Studies (STS), this wide-ranging and thought-provoking collection offers a broad and cutting-edge overview of outstanding research on academic knowledge circulation. The book is structured in seven sections: (i) key concepts in studying the circulation of academic knowledge; (ii) spaces and actors of circulation; (iii) academic media and knowledge circulation; (iv) the political economy of academic knowledge circulation; (v) the geographies, geopolitics and

historical legacies of the global circulation of academic knowledge; (vi) the relationships between academic and extra-academic knowledges; and (vii) methodological approaches to studying the circulation of academic knowledge. This handbook will be essential reading for academics, researchers and postgraduate researchers in the humanities and social sciences interested in the circulation of knowledge.
