The Routledge Companion to Advertising and Promotional Culture Emily West, Matthew P. McAllister, 2013-02-11 The Routledge Companion to Advertising and Promotional Culture provides an essential guide to the key issues, methodologies, concepts, debates, and policies that shape our everyday relationship with advertising. The book contains eight sections: Historical Perspectives considers the historical roots and their relationship to recent changes of contemporary advertising and promotional practice. Political Economy examines how market forces, corporate ownership, and government policies shape the advertising and media promotion environment. Globalization presents work on advertising and marketing as a global, intercultural, and transnational practice. Audiences as Labor, Consumers, Interpreters, Fans introduces how people construct promotional meaning and are constructed as consumers, markets, and labor by advertising forces. Identities analyzes the ways that advertising constructs images and definitions of groups -- such as gender, race and the child -- through industry labor practices, marketing, as well as through representation in advertising texts. Social Institutions looks at the pervasiveness of advertising strategies in different social domains, including politics, music, housing, and education. Everyday Life highlights how a promotional ethos and advertising initiatives pervade self image, values, and relationships. The Environment interrogates advertising's relationship to environmental issues, the promotional efforts of corporations to construct green images, and mass consumption's relationship to material waste. With chapters written by leading international scholars working at the intersections of media studies and advertising studies, this book is a go-to source for those looking to understand the ways advertising has shaped consumer culture, in the past and present.

Games And Dynamic Games Haurie Alain,Krawczyk Jacek B,Zaccour Georges,2012-03-23 Dynamic games arise between players (individuals, firms, countries, animals, etc.) when the strategic interactions among them recur over time and decisions made during one period affect both current and future payoffs. Dynamic games provide conceptually rich paradigms and tools to deal with these situations.This volume provides a uniform approach to game theory and illustrates it with present-day applications to economics and management, including environmental, with the emphasis on dynamic games.At the end of each chapter a case study called game engineering (GE) is provided, to help readers understand how problems of high social priority, such as environmental negotiations, exploitation of common resources, can be modeled as games and how solutions can be engineered.

Serious Games Ute Ritterfeld,Michael Cody,Peter Vorderer,2009-09-10 The central purpose of this book is to examine critically the claim that playing games can provide learning that is deep, sustained and transferable to the real world.

American Women's Track and Field Louise Mead Tricard,1996-01-01 In 1985 the Vassar College Athletic Association ignored the constraints placed on women athletes of that era and held its first-ever womens field day, featuring competition in five track and field events. Soon colleges across the country were offering women the opportunity to compete, and in 1922 the United States selected 22 women to compete in the Womens World Games in Paris. Upon their return, female physical educators severely criticized their efforts, decrying the evils of competition. Wilma Rudolphs triumphant Olympics in 1960 sparked renewed support for womens track and field in the United States. From 1922 to 1960, thousands of women competed, and won many gold medals, with little encouragement or recognition. This reference work provides a history, based on many interviews and meticulous research in primary source documents, of womens track and field, from its beginnings on the lawns of Vassar College in 1895, through 1980, when Title IX began to create a truly level playing field for men and women. The results of Amateur Athletic Union Womens Indoor and Outdoor Track and Field Championships since 1923 are given, as well as full coverage of female Olympians.

Outsmarting Autism, Updated and Expanded Patricia S. Lemer,2019-03-19 Nautilus Award Winner, 2019--Silver in Parenting & Family A comprehensive resource for parents, therapists, caregivers, and educators, packed with lifelong strategies for Autism

Spectrum Disorder (ASD) management and support Newly revised and updated, this user-friendly guide addresses autism identification, treatment, and prevention from pre-conception through adulthood. Outsmarting Autism describes more than 50 practical approaches with proven efficacy, including lifestyle modification, dietary considerations, and boosting the immune system. After health improves, focus turns to developing the sensory foundations for communication, social skills, and learning. Patricia Lemer's approach is grounded in research on multifactorial causes, or Total Load Theory, which explains that developmental delays are caused not by one single factor, but by an overload of environmental stressors on genetically vulnerable individuals. Because every person with autism is unique, this book guides readers to the therapies that may be right for each individual, helping to make the difference between management and healing. New research on topics like stem cells, cannabis, and dentistry is now included.

Education, Religion, and Literary Culture in the 4th Century CE Gabriela Ryser,2020-01-20 This book contextualizes Claudian's handling of the Proserpina myth and the underworld in the history of literature and religion while showing intersections with and differences between the literary and religious uses of the underworld topos. In doing so, the study provides an incentive to rethink the dichotomy of the terms 'religious' and 'non-religious' in favour of a more nuanced model of references and refunctionalisations of elements which are, or could be, religiously connotated. A close philological analysis of De raptu Proserpinae identifies the sphere of myth and poetry as an area of expressive freedom, a parallel universe to theological discourses (whether they be pagan-philosophical or Christian), while the profound understanding and skilful use of this particular sphere – a formative aspect of European religious and intellectual history – is postulated as a characteristic of the educated Roman and of Claudian's poetry.
