🔍 **ORGANIZATIONAL NEUROETHICS** Jo T. Martineau, Eric Racine, 2019-11-27 Understanding and improving how organizations work and are managed is the object of management research and practice, and this topic is of longstanding interest in the academia and in society at large. More recently, the contribution that the study of the brain could make to, notably, our understanding of decisions, emotional reactions, and behaviors has led to the emergence of the field of “organizational neuroscience”. Within the field of management, organizational neuroscience seeks to explore linkages between neuroscience research, theories, and methods and management research. Its primary goal is to incorporate findings on the cognitive processes underlying the thoughts, behaviors and attitudes of organizational actors in order to better inform management theories, and to assist in understanding, predicting and improving these behaviors in the workplace. As a result, we have seen in the last decade a flurry of research projects and publications in organizational neuroscience, as well as novel or rejuvenated innovations around neuromarketing, neuroleadership, and cognitive enhancement in the work place, to name a few. However, research and practical applications in organizational neuroscience pose profound ethical challenges about, for example, organizational responsibility in the responsible use of scientific innovation. Drawing on recent debates in the field, and in response to upcoming ethical challenges of organization neuroscience, this book introduces “organizational neuroethics” as an emerging interdisciplinary field that addresses the ethics of organizational neuroscience research and applications, as well as the neuroscience of organizational ethics. The first part focuses on the ethics of organizational neuroscience and several chapters tackle the ethics of neuromarketing or neuroleadership and discuss the ethical issues associated with neuroenhancement practice in the workplace. The second part of the book addresses cutting-edge topics in the neuroscience of organizational ethics. Written by international experts in the fields of management, neuroscience, ethics, and social science, this book will be of prime interest to practitioners, researchers and students in the various fields concerned with improving management research and practices, as well as organizational ethics.

🔍 **PSYCHOLOGY IN EVERYDAY LIFE** David G. Myers, 2008-10-17 Learn it. Live it. Why take psychology? What makes psychology a science? Can it really help me understand my feelings and behaviors? Now from the world’s foremost author for the introductory psychology classroom comes a new textbook that makes learning about the psychology of our lives a captivating experience for students at all levels. Carried by the author’s acclaimed empathetic voice, Psychology in Everyday Life is David Myers’ most inviting text to date. 🔍 **BEND YOUR BRAIN** Marbles: The Brain Store, 2014-08-19 Want to get your frontal cortex breaking a sweat? Make your blood pump to your cerebellum? Stretch your occipital lobe to its limits? Then you need to bend your brain! This first book from the team behind Marbles: The Brain Store, a chain devoted to building better brains, offers puzzles and brain teasers to help enhance memory, build problem-solving skills, and reduce stress. Since Marbles started helping people play their way to a healthier brain, they’ve sold, solved, and been stumped by more than their fair share of puzzles. Along the way, they’ve learned which puzzles tie people in knots (not in a good way) and which ones make the neurons downright giddy. With the help of their in-house team of BrainCoaches and access to cutting-edge neuroscience, they’ve designed these puzzles to keep your mind flexible and fit. Arranged in five key brain categories—visual perception, word skills, critical thinking, coordination, and memory—Bend Your Brain offers a variety of puzzles ranging from mind-warming (easy) to mind-blowing (hard!): • Connecting the dots? More like working your spatial-orientation skills. • Identifying famous smiles? Flexing your visual memory. • Taking a closer look at your keyboard? Coding, storing, and retrieving. • Word-doku? Summoning cognitive abilities like appraisal, inference, impulse control, and evaluation. • Word scrambles? Tapping your brain’s association areas. Your brain is your most important muscle, so let the brain-building begin!
