The Touch of the Artist National Gallery of Art (U.S.),1995 The Woodner family collection, founded by the collector Ian Woodner, presents European drawing from its first flowering in the early Renaissance to the early years of the 20th-century.

Governing Britain Albert Henry Hanson,Malcolm Walles,1990 Politically and administratively, Britain is a highly developed country. The emphasis throughout this book is on the way in which the political and administrative institutions of central government have responded to the challenge presented by the accelerating pace of social change.

Postcolonial Thought and Social Theory Julian Go,2016 'Postcolonial Thought and Social Theory' maps the convergences and differences between these two seemingly opposed bodies of thought. It explores the different waves of postcolonial thought, elaborates the postcolonial critique of social theory, and charts different strategies for crafting a postcolonial social science.

AIDS Drugs For All Ethan B. Kapstein,Joshua W. Busby,2013-08-29 Uses the success of the AIDS treatment advocacy movement to show how social movements can successfully transform global markets.

The Good Project Monika Krause,2014-06-19 NGOs set out to save lives, relieve suffering, and service basic human needs. They are committed to serving people across national borders and without regard to race, ethnicity, gender, or religion, and they offer crucial help during earthquakes, tsunamis, wars, and pandemics. But with so many ailing areas in need of assistance, how do these organizations decide where to go—and who gets the aid? In The Good Project, Monika Krause dives into the intricacies of the decision-making process at NGOs and uncovers a basic truth: It may be the case that relief agencies try to help people but, in practical terms, the main focus of their work is to produce projects. Agencies sell projects to key institutional donors, and in the process the project and its beneficiaries become commodities. In an effort to guarantee a successful project, organizations are incentivized to help those who are easy to help, while those who are hardest to help often receive no assistance at all. The poorest of the world are made to compete against each other to become projects—and in exchange they offer legitimacy to aid agencies and donor governments. Sure to be controversial, The Good Project offers a provocative new perspective on how NGOs succeed and fail on a local and global level.

Blind Spot Salmaan Keshavjee,2014-08-16 Neoliberalism has been the defining paradigm in global health since the latter part of the twentieth century. What started as an untested and unproven theory that the creation of unfettered markets would give rise to political democracy led to policies that promoted the belief that private markets were the optimal agents for the distribution of social goods, including health care. A vivid illustration of the infiltration of neoliberal ideology into the design and implementation of development programs, this case study, set in post-Soviet Tajikistan's remote eastern province of Badakhshan, draws on extensive ethnographic and historical material to examine a "revolving drug fund" program—used by numerous nongovernmental organizations globally to address shortages of high-quality pharmaceuticals in poor communities. Provocative, rigorous, and accessible, Blind Spot offers a cautionary tale about the forces driving decision making in health and development policy today, illustrating how the privatization of health care can have catastrophic outcomes for some of the world's most vulnerable populations.

An Introduction to Law and Regulation Bronwen Morgan,Karen Yeung,2007-04-12 In recent years, regulation has emerged as one of the most distinct and important fields of study in the social sciences, both for policy-makers and for scholars who require a theoretical framework that can be applied to any social sector. This timely textbook provides a conceptual map of the field and an accessible and critical introduction to the subject. Morgan and Yeung set out a diverse and stimulating selection of materials and give them context with a comprehensive and critical commentary. By adopting an interdisciplinary approach and emphasising the role of law in its broader social and political context, it will be an invaluable tool for the student coming to regulation for the first time. This clearly structured, academically rigorous title, with a contextualised perspective, is essential reading for all students of the subject.

Law as a Means to an End Brian Z. Tamanaha,2006-10-02 The contemporary US legal culture is marked by ubiquitous battles among various groups attempting to seize control of the law and wield it against others in pursuit of their particular agenda. This battle takes place in administrative, legislative, and judicial arenas at both the state and federal levels. This book identifies the underlying source of these battles in the spread of the instrumental view of law - the idea that law is purely a means to an end - in a context of sharp disagreement over the social good. It traces the rise of the instrumental view of law in the course of the past two centuries, then demonstrates the pervasiveness of this view of law and its implications within the contemporary legal culture, and ends by showing the various ways in which seeing law in purely instrumental terms threatens to corrode the rule of law.

Love, Money, and HIV Sanyu A. Mojola,2014-05-10 How do modern women in developing countries experience sexuality and love? Drawing on a rich array of interview, ethnographic, and survey data from her native country of Kenya, Sanyu A. Mojola examines how young African women, who suffer disproportionate rates of HIV infection compared to young African men, navigate their relationships, schooling, employment, and finances in the context of economic inequality and a devastating HIV epidemic. Writing from a unique outsider-insider perspective, Mojola argues that the entanglement of love, money, and the transformation of girls into "consuming women" lies at the heart of women's coming-of-age and health crises. At once engaging and compassionate, this text is an incisive analysis of gender, sexuality, and health in Africa.

The Sources of Hope Ross Fitzgerald,1979

The Prophetic Imagination Walter Brueggemann,2001 In this challenging and enlightening treatment, Brueggemann traces the lines from the radical vision of Moses to the solidification of royal power in Solomon to the prophetic critique of that power with a new vision of freedom in the prophets. Here he traces the broad sweep from Exodus to Kings to Jeremiah to Jesus. He highlights that the prophetic vision and not only embraces the pain of the people but creates an energy and amazement based on the new thing that God is doing. In this new edition, Brueggemann has completely revised the text, updated the notes, and added a new preface.

The Circle of Karma Kunzang Choden,2005 Caught in the everyday reality of household life, fifteen-year-old Tsomo is suddenly called upon to travel when her mother dies. She makes her first journey to a faraway village to light the ritual butter lamps in her mother's memory. Beginning here, her travels take her to distant places, across Bhutan and into India. As she faces the world, a woman alone, Tsomo embarks on what becomes a life journey, in which she begins to find herself, and to grow as a person and a woman. The first novel by a woman to come out of the Himalayan kingdom of Bhutan, The Circle of Karma, written in English, is rich in detailed descriptions of ritual life in Bhutan. The measured pace of its prose, the many nuances of the story, the different levels at which the narrative works, weave a complex tapestry of life in which the style and content are closely interwoven, each informing and enriching the other.

The World Health Organization between North and South Nitsan Chorev,2012-05-15 Since 1948, the World Health Organization (WHO) has launched numerous programs aimed at improving health conditions around the globe, ranging from efforts to eradicate smallpox to education programs about the health risks of smoking. In setting global health priorities and carrying out initiatives, the WHO bureaucracy has faced the

challenge of reconciling the preferences of a small minority of wealthy nations, who fund the organization, with the demands of poorer member countries, who hold the majority of votes. In *The World Health Organization between North and South*, Nitsan Chorev shows how the WHO bureaucracy has succeeded not only in avoiding having its agenda co-opted by either coalition of member states but also in reaching a consensus that fit the bureaucracy’s own principles and interests. Chorev assesses the response of the WHO bureaucracy to member-state pressure in two particularly contentious moments: when during the 1970s and early 1980s developing countries forcefully called for a more equal international economic order, and when in the 1990s the United States and other wealthy countries demanded international organizations adopt neoliberal economic reforms. In analyzing these two periods, Chorev demonstrates how strategic maneuvering made it possible for a vulnerable bureaucracy to preserve a relatively autonomous agenda, promote a consistent set of values, and protect its interests in the face of challenges from developing and developed countries alike.

Listening Now Anjana Appachana,2024-02-12 The story of *Listening Now* takes place before the events of Appachana’s 2023 critically acclaimed novel, *Fear and Lovely*. Mallika, a child given to weaving, is convinced that the lives of the mothers around her are dull and devoid of passion and fantasizes romantic love. The truth, which lies at the heart of this story, is completely different. Her mother, Padma, her mother’s sister, Shanta, her mother’s two friends, Madhu and Anu, and her grandmother, Rukmini, all hold wrenching secrets; their complex lives and longings are beyond the child Mallika’s comprehension. Set in 1950s and 1960s, this story encompasses the lives of two generations of women in a small, New Delhi neighbourhood, where conventional lives are lived on the surface, while below, secrets seethe—threatening to destroy everything that has been so carefully constructed to accommodate society’s structures and expectations. Rendered through six points of view, *Listening Now* captures the voices of these women; the spoken conversations as well as all that remains in the realm of silence. Shortlisted for the Crossword Prize when it was first published in 1998, *Listening Now* holds readers in its embrace from the very first line.

Environmental Protection, Law and Policy Jane Holder,Maria Lee,2007-07-19 This 2007 book examines environmental law from a range of perspectives, emphasising the policy world from which environmental law is drawn and nourished. Those working within the discipline of environmental law need to engage with concepts and methods employed by disciplines other than law. The authors analyse the ways in which legal activities are supported and legitimated by work in traditional scientific or technical domains, as well as by certain more obscure but also influential cultural or philosophical assumptions. A range of regulatory techniques is explored in this book, through a close examination of both pollution control and land use. The highly complex nature of current environmental problems, demanding sophisticated and responsive legal controls, is illustrated by several in-depth case studies, including legal and policy analysis of the highly contested issues of genetically modified organisms and renewable energy projects.

The Israeli-Jewish Society Daniel Bar-Tal,Eran Halperin,2013

Stereotypes and Prejudice in Conflict Daniel Bar-Tal,Yona Teichman,2009-12-03 In the last two decades, the study of social stereotypes and prejudice has become one of the central interests in social psychology in particular. One reflection of this growing interest is the focus on shared stereotypes and prejudices. The primary reason for this development is the recognition that stereotypes and prejudice play a determinative role in shaping intergroup relations. In situations of conflict, they are simultaneously outcomes of the accumulated animosity between the involved groups and also feed on the continuation of the conflict by furnishing the cognitive-affective basis for the experienced mistrust by the parties. In spite of this recognition, no systematic analysis of the stereotypes and prejudice was carried out in real situations. This book tries to rectify this by applying a general and universal conceptual framework to the study of the acquisition and development of stereotypes and prejudice in a society involved in an intractable conflict.
