Proceeding of the International Conference on Computer Networks, Big Data and IoT (ICCBI - 2018) A.Pasumpon Pandian,Tomonobu Senjyu,Syed Mohammed Shamsul Islam,Haoxiang Wang,2019-07-31 This book presents the proceedings of the International Conference on Computer Networks, Big Data and IoT (ICCBI-2018), held on December 19–20, 2018 in Madurai, India. In recent years, advances in information and communication technologies [ICT] have collectively aimed to streamline the evolution of internet applications. In this context, increasing the ubiquity of emerging internet applications with an enhanced capability to communicate in a distributed environment has become a major need for existing networking models and applications. To achieve this, Internet of Things [IoT] models have been developed to facilitate a smart interconnection and information exchange among modern objects – which plays an essential role in every aspect of our lives. Due to their pervasive nature, computer networks and IoT can easily connect and engage effectively with their network users. This vast network continuously generates data from heterogeneous devices, creating a need to utilize big data, which provides new and unprecedented opportunities to process these huge volumes of data. This International Conference on Computer Networks, Big Data, and Internet of Things [ICCBI] brings together state-of-the-art research work, which briefly describes advanced IoT applications in the era of big data. As such, it offers valuable insights for researchers and scientists involved in developing next-generation, big-data-driven IoT applications to address the real-world challenges in building a smartly connected environment.

Persuasive Technology Jaap Ham,Evangelos Karapanos,Plinio P. Morita,Catherine M. Burns,2018-04-03 This book constitutes the refereed proceedings of the 13th International Conference on Persuasive Technology, PERSUASIVE 2018, held in Waterloo, ON, Canada, in April 2018. The 21 revised full papers and 4 short papers presented were carefully reviewed and selected from 59 submissions. The papers demonstrate how persuasive technologies can help solve societal issues. They explore new frontiers for persuasive technology, such as personalized persuasion, new sensor usage, uses of big data, and new ways of creating engagement through gaming or social connection, focusing on a variety of technologies (e.g., web, wearables, AI, and smart environments). The papers are organized in the following topical sections: social means to persuasion; nudging and just-in-time interventions; design principles and practices; persuasive games; personalization and tailoring; and theoretical reflections.

dHealth 2020 – Biomedical Informatics for Health and Care G. Schreier,D. Hayn,A. Eggerth,2020-06-24 Successful digital healthcare depends on the effective flow of a complete chain of information; from the sensor, via multiple steps of processing, to the actuator, which can be anything from a human healthcare professional to a robot. Along this pathway, methods for automating the processing of information, like signal processing, machine learning, predictive analytics and decision support, play an increasing role in providing actionable information and supporting personalized and preventive healthcare concepts in both biomedical and digital healthcare systems and applications. ICT systems in healthcare and biomedical systems and devices are very closely related, and in the future they will become increasingly intertwined. Indeed, it is already often difficult to delineate where the one ends and the other begins. This book presents the intended proceedings of the dHealth 2020 annual conference on the general topic of health Informatics and digital health, which was due to be held in Vienna, Austria, on 19 and 20 May 2020, but which was cancelled due to the COVID-19 pandemic. The decision was nevertheless taken to publish these proceedings, which include the 40 papers which would have been delivered at the conference. The special topic for the 2020 edition of the conference was Biomedical Informatics for Health and Care. The book provides an overview of current developments in health informatics and digital health, and will be of interest to researchers and healthcare practitioners alike.

The Internet of Things Michael R. Miller,2015-03-13 How the Internet of Things will change your life: all you need to know, in plain English! The Internet of Things (IoT) won't just connect people: It will connect "smart" homes, appliances, cars, offices, factories, cities... the world. You need to know what's coming: It might just transform your life. Now, the world's #1 author of beginning technology books has written the perfect introduction to IoT for everyone. Michael Miller shows how connected smart devices will help people do more, do it smarter, do it faster. He also reveals the potential risks—to your privacy, your freedom, and maybe your life. Make no mistake: IoT is coming quickly. Miller explains why you care, helps you use what's already here, and prepares you for the world that's hurtling toward you. --What is IoT? How does it work? How will it affect me? --What's realistic, and what's just hype? --How smart is my "smart TV" really? (And, is it watching me?) --Can smart IoT devices make me healthier? --Will smart appliances ever be useful? --How much energy could I save with a smart home? --What's the future of wearable tech? --When will I have a self-driving car? --When will I have a nearly self-driving car? (Hint: Surprisingly soon.) --Is IoT already changing the way I shop? --What's the future of drones, at war and in my neighborhood? --Could smart cities lower my taxes? --Who gets the data my devices are collecting? --How can I profit from the Internet of Things? --What happens when the whole world is connected? --Will I have any privacy left at all?

GPS Tracking with Java EE Components Kristof Beiglböck,2018-08-06 GPS Tracking with Java EE Components: Challenges of Connected Cars highlights how the self-driving car is actually changing the automotive industry, from programing embedded software to hosting services and data crunching, in real time, with really big data. The book analyzes how the challenges of the Self Driving Car (SDC) exceed the limits of a classical GPS Tracking System (GTS.) It provides a guidebook on setting up a tracking system by customizing its components. It also provides an overview of the prototyping and modeling process, and how the reader can modify this process for his or her own software. Every component is introduced in detail and includes a number of design decisions for development. The book introduces Java EE (JEE) Modules, and shows how they can be combined to a customizable GTS, and used as seed components to enrich existing systems with live tracking. The book also explores how to merge tracking and mapping to guide SDCs, and focuses on client server programming to provide useful information. It also discusses the challenges involved with the live coordination of moving cars. This book is designed to aid GTS developers and engineers in the automotive industry. It can also help Java Developers, not only interested in GPS Tracking, but in modern software design from many individual modules. Source code and sample applications will be available on the book's website.

Good Energy Casey Means, MD,2024-05-14 A bold new vision for optimizing our health now and in the future What if depression, anxiety, infertility, insomnia, heart disease, erectile dysfunction, type 2 diabetes, Alzheimer's, dementia, cancer and many other health conditions that torture and shorten our lives actually have the same root cause? Our ability to prevent and reverse these conditions - and feel incredible today - is under our control and simpler than we think. The key is our metabolic function - the most important and least understood factor in our overall health. As Dr. Casey Means explains in this groundbreaking book, nearly every health problem we face can be explained by how well the cells in our body create and use energy. To live free from frustrating symptoms and life-threatening disease, we need our cells to be optimally powered so that they can create "good energy," the essential fuel that impacts every aspect of our physical and mental wellbeing. If you are battling minor signals of "bad energy" inside your body, it is often a warning sign that more life-threatening illness may emerge later in life. But here's the good news: for the first time ever, we can monitor our metabolic health in great detail and learn how to improve it ourselves. Weaving together cutting-edge research and personal stories, as well as groundbreaking data from the health technology company Dr. Means founded, Good Energy offers an essential four-week plan and explains: The five biomarkers that determine your risk for a deadly disease. How to use inexpensive tools and technology to "see inside your body" and take action. Why dietary philosophies are designed to confuse us, and six lifelong food principles you can implement whether you're carnivore or vegan. The crucial links between sleep, circadian rhythm, and metabolism A new framework for exercise focused on building simple movement into everyday activities How cold and heat exposure helps build our body's resilience Steps to navigate the medical system to get what you need for optimal health Good Energy offers a new, cutting-edge understanding of the true cause of illness that until now has remained hidden. It will help you optimize your ability to live well and stay well at every age.

Digital Pharma Marketing Playbook Subba Rao Chaganti,2022-10-22 Digital Pharma Marketing Playbook is a first-of-its-kind-of book. It is the first and only book that presents 101 cases in digital pharma marketing. These cases show how some of the leading pharmaceutical companies across the world have used digital and social media channels. They are also excellent learning opportunities to all pharma marketing and brand managers, and students of pharmaceutical marketing. Digital transformation is sweeping the world around us. Everything these days has become digital. The ever-increasing rate of adoption of wearable devices and the advent of the internet of things are digitizing more and more of our experience. At the same time, healthcare in general, and the pharmaceutical industry, in particular, have been lagging in adapting to a digital strategy. It is not that the pharma is new to multichannel marketing. The pharmaceutical industry traditionally has been following a multichannel marketing strategy, where most of the channels have been static rather than dynamic. The number of channels has increased significantly due to the internet explosion. Pharma is moving to a multi-stakeholder world, a world in which stakeholders beyond the prescriber are gaining importance. These new influencer groups such as patients, nurses, payers, and regulators are increasingly turning to digital channels for their information needs regarding healthcare. Digital, therefore, plays a vital role in reaching these new audiences. If you want to maximize the impact of your marketing communications, can you afford to ignore the channels that your stakeholders are frequently using? Of course, not. Therefore, the question is not, to digitize or not to digitize, but how soon and how effectively? Why a Digital Pharma Marketing Playbook? Because, a playbook is a one-stop-read or single-source resource for all the essential information that you need on a given sport — in our case, Digital Pharma Marketing. If you can make work more fun and enjoyable it is play! Moreover, when work becomes play, there are no goals that you cannot score!Contents: 1. Challenging Times! Changing Rules! 2. Digital Revolution 3. Digital Pharma Marketing 4. Social Media Marketing and Pharma 5. Digital Transformation

Be Data Driven Jordan Morrow,2022-08-03 Make any team or business data driven with this practical guide to overcoming common challenges and creating a data culture. Businesses are increasingly focusing on their data and analytics strategy, but a data-driven culture grounded in evidence-based decision making can be difficult to achieve. Be Data Driven outlines a step-by-step roadmap to building a data-driven organization or team, beginning with deciding on outcomes and a strategy before moving onto investing in technology and upskilling where necessary. This practical guide explains what it means to be a data-driven organization and explores which technologies are advancing data and analytics. Crucially, it also examines the most common challenges to becoming data driven, from a foundational skills gap to issues with leadership and strategy and the impact of organizational culture. With case studies of businesses who have successfully used data, Be Data Driven shows managers, leaders and data professionals how to address hurdles, encourage a data culture and become truly data driven.

Reimagine Pharma Marketing Subba Rao Chaganti,2023-06-01 The empowered patients, new-age technologies such as artificial intelligence (AI), machine learning (ML), big data analytics, real-world data and evidence, blockchain, electronic health records (EHRs), digital therapeutics, cloud computing, and innovative marketing frameworks like design thinking, customer journey mapping, omnichannel, closed-loop marketing, personalization and agile ways of working are transforming the way healthcare is delivered, affecting the pharmaceutical industry. Additionally, big tech companies such as Amazon, Alphabet, Apple, and Microsoft are disrupting by offering non-pharmacological solutions with innovative digital technologies to provide a seamless customer experience in the patient journey. The recent COVID-19 pandemic added rocket fuel to the digital

transformation of the pharmaceutical industry, changing the entire model of care and ingraining telemedicine in the healthcare ecosystem. Digital Transformation has become inevitable and imminent. Therefore, pharma must reimagine its entire strategy and embrace digital transformation to succeed in this rapidly changing marketing environment that is becoming increasingly complex. Reimagine Pharma Marketing: Make It Future-Proof introduces all these technology frameworks. Additionally, the book presents one hundred and two case studies showing how some of the leading pharmaceutical companies are applying the new age technologies and marketing frameworks effectively. It can be your single-source guidebook unraveling the future so you can manage it!Contents: 1. Reimagine Everything — Reimagine Every Element of Pharmaceutical Marketing Mix 2. Reimagine the Technology— How Pharma Can Harness the Power of New and Emerging Technologies 3. Reimagine Stakeholder Engagement—Winning with New Rules of Engagement 4. The Future of Pharma—A Look into the Crystal Ball Epilogue You're Gonna Need a Bigger Boat!

Garmin Tracker Introduction

In the digital age, access to information has become easier than ever before. The ability to download Garmin Tracker has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Garmin Tracker has opened up a world of possibilities. Downloading Garmin Tracker provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Garmin Tracker has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Garmin Tracker. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Garmin Tracker. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical

downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Garmin Tracker, users should also consider the potential security risks associated with online platforms. Malicious actors may exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Garmin Tracker has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.
