Gary the Gecko Ken Bullingham,2017-11-10 This is a story of a young Lizard living in a hot climate but he is unable to go out because he is the first Lizard ever to suffer from sunburn. All the other Lizards make fun of him. Gary has a special suit made so that he can go out in the sunshine, but all the other Lizards still make fun of him. Then one day something happens and Gary and his special suit are able to save all the Lizards. And then everyone loves Gary The Gecko.

Hop Step Jump T. Bell,2001-06-30 Gary is a gecko. Is he the smartest gecko on Provo? This story is part of the Hop, Step, Jump series that moves on from stories told in simple sentences with basic grammatical structures, through freer use of language to the level of reading reached at primary school.

Duck Dad Georgia Voelz Witt,2013-03-01 Although categorized as fiction, the story is based on the actual ducks who followed Gary around for about a year! She wrote the story while Gary was still alive and after his death due to lung/brain cancer she pursued publication in his memory and dedicated to his nine greatgrandchildren...all girls. The ducks become unusually dedicated to the man in the story. It is a sweet story of simple country life, dedication, and the love and care of wildlife.

Disney Voice Actors Thomas S. Hischak,2011-10-06 This biographical dictionary is devoted to the actors who provided voices for all the Disney animated theatrical shorts and features from the 1928 Mickey Mouse cartoon Steamboat Willie to the 2010 feature film Tangled. More than 900 men, women, and child actors from more than 300 films are covered, with biographical information, individual career summaries, and descriptions of the animated characters they have performed. Among those listed are Adriana Caselotti, of Snow White fame; Clarence Nash, the voice of Donald Duck; Sterling Holloway, best known for his vocal portrayal of Winnie the Pooh; and such show business luminaries as Bing Crosby, Bob Newhart, George Sanders, Dinah Shore, Jennifer Tilly and James Woods. In addition, a complete directory of animated Disney films enables the reader to cross-reference the actors with their characters.

The Mind of Clover Robert Aitken,1984 Aitken's approach is clear and sure as he shows how our minds can be as nurturing as clover, which enriches the soil and benefits the environment as it grows. The opening chapters discuss the Ten Grave Precepts of Zen, which, Aitken points out, are not commandments etched in stone but expressions of inspiration written in something more fluid than water. Aitken approaches these precepts, the core of Zen ethics, from several perspectives, offering many layers of interpretation. Like ripples in a pond, the circles of his interpretation increasingly widen, and he expands his focus to confront corporate theft and oppression, the role of women in Zen and society, abortion, nuclear war, pollution of the environment, and other concerns.

Individual-based Modeling and Ecology Volker Grimm,Steven F. Railsback,2013-11-28 Individual-based models are an exciting and widely used new tool for ecology. These computational models allow scientists to explore the mechanisms through which population and ecosystem ecology arises from how individuals interact with each other and their environment. This book provides the first in-depth treatment of individual-based modeling and its use to develop theoretical understanding of how ecological systems work, an approach the authors call individual-based ecology.? Grimm and Railsback start with a general primer on modeling: how to design models that are as simple as possible while still allowing specific problems to be solved, and how to move efficiently through a cycle of pattern-oriented model design, implementation, and analysis. Next, they address the problems of theory and conceptual framework for individual-based ecology: What is theory? That is, how do we develop reusable models of how system dynamics arise from characteristics of individuals? What conceptual framework do we use when the classical differential equation framework no longer applies? An extensive review illustrates the ecological problems that have been addressed with individual-based models. The authors then identify how the mechanics of building and using individual-based models differ from those of traditional science, and provide guidance on formulating, programming, and analyzing models. This book will be helpful to ecologists interested in modeling, and to other scientists interested in agent-based modeling.

Beyond Memory Max Mojapelo,2008 South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities. *Beyond Memory: Recording the History, Moments and Memories of South African Music* is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of a man, Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a deejay at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries.

A Coyote's in the House Elmore Leonard,2009-10-13 Book description to come.

Encyclopedia of Television Shows, 1925 through 2010, 2d ed. Vincent Terrace,2014-01-10 This fully updated and expanded edition covers over 10,200 programs, making it the most comprehensive documentation of television programs ever published. In addition to covering the standard network and cable entertainment genres, the book also covers programs generally not covered elsewhere in print (or even online), including Internet series, aired and unaired pilot films, erotic series, gay and lesbian series, risqué cartoons and experimental programs from 1925 through 1945.

Warraparna Kurna! Rob Amery,2016-02-22 This book tells the story of the renaissance of the Kurna language, the language of Adelaide and the Adelaide Plains in South Australia, principally over the earliest period up until 2000, but with a summary and brief discussion of developments from 2000 until 2016. It chronicles and analyses the efforts of the Nunga community, and interested others, to reclaim and relearn a linguistic heritage on the basis of mid-nineteenth-century materials. This study is breaking new ground. In the Kurna case, very little knowledge of the language remained within the Aboriginal community. Yet the Kurna language has become an important marker of identity and a means by which Kurna people can further the struggle for recognition, reconciliation and liberation. This work challenges widely held beliefs as to what is possible in language revival and questions notions about the very nature of language and its development.
