Gaslighting Stephanie Moulton Sarkis,2018-10-02 A mental health expert sheds light on gaslighting--the manipulative technique used by sociopaths, narcissists, and others--offering practical strategies to cope and break free. He's the charmer -- the witty, confident, but overly controlling date. She's the woman on your team who always manages to take credit for your good work. He's the neighbor who swears you've been putting your garbage into his trash cans, the politician who can never admit to a mistake. Gaslighters are master controllers and manipulators, often challenging your very sense of reality. Whether it's a spouse, parent, coworker, or friend, gaslighters distort the truth -- by lying, withholding, triangulation, and more -- making their victims question their own reality and sanity. Dr. Stephanie Sarkis delves into this hidden manipulation technique, covering gaslighting in every life scenario, sharing: Why gaslighters seem so normal at first Warning signs and examples Gaslighter red flags on a first date Practical strategies for coping How to coparent with a gaslighter How to protect yourself from a gaslighter at work How to walk away and rebuild your life With clear-eyed wisdom and empathy, Dr. Sarkis not only helps you determine if you are being victimized by a gaslighter -- she gives you the tools to break free and heal.

Coalbed Methane in China Yan Song,Xinmin Zhang,Shaobo Liu,2021-02-09 The coalbed methane (CBM) reserve in China ranks third in the world with a total resource of 36.8×10¹² m³. Exploitation of CBM has an important practical significance to ensure the long-term rapid development of China natural gas industry. Therefore, in 2002, the Ministry of Science and Technology of China set up a national 973 program to study CBM system and resolve problems of CBM exploration and exploitation in China. All the main research results and new insights from the program are presented in this book. The book is divided into 11 chapters. Chapters 2 through 9 illustrate the geological theory and prospect evaluation methods. Then chapters 10 and 11 discuss CBM recovery mechanisms and technology. The book systematically describes the origin, storage, accumulation and emission of CBM in China, and also proposes new methods and technologies on resource evaluation, prospect prediction, seismic interpretation and enhanced recovery. The book will appeal to geologists, lecturers and students who are involved in the CBM industry and connected with coal and conventional hydrocarbon resources research.

Gaslighting Christina Covert,2020-10-10 Recognize This Type Of Narcissistic Abuse And Break Free From Mind Control A gaslighter is someone who can subtly turn your life into a nightmare and then blame you for it. How? Gaslighting is a form of emotional abuse that makes the victim question their sanity and self-worth. It's just a joke, why are you offended? If you hear such phrases often, you're being gaslighted. Gaslighters make you question your perception of reality and your feelings. From Pole to Pole Garth James Cameron,2013-10-17 Roald Amundsen (1872-1928) was the most successful polar explorer of his era using sledges, dogs, ski and ships. He is mainly remembered for being the first man to reach the South Pole on 14 December 1911. What is less often remembered is that he was also the first man to reach the North Pole on 12 May 1926 as the leader of the Amundsen- Ellsworth-Nobile expedition in the airship Norge. His involvement in aviation from 1909 to his death in 1928, has not been the subject of a detailed study until now.This book explores Amundsen's enthusiasm for flight from the moment he read about Bleriot's flight across the English Channel in an aeroplane on 25 July 1909. From that moment onwards he saw the potential of aircraft as vehicles to explore portions of the globe that remained unexplored in the first quarter of the 20th century. The man-lifting kites built by Einar Sem-Jacobsen took the life of his second in command, Ole Engelstad and were carried, but not used, during his 1910-1912 expedition to the South Pole. He saw aeroplanes flying in America and Germany in 1913 and in 1914 he was taught to fly by Sem-Jacobsen. He passed his flight test on a Farman Longhorn biplane on 1 June 1914 and in mid-1915 was issued with the Fédération Aéronautique Internationale (Norge) aeroplane pilot's certificate number one. He bought a Farman biplane to take with him on an expedition to the North Polar Sea but the outbreak of the Great War stopped the Expedition and Amundsen gave his Farman to the Norwegian government. After the war he acquired a Curtiss Oriole biplane and two Junkers F13's then in 1925 he embarked on a flight, which he barely survived, to the North Pole in two Dornier Wal flying boats. 1926 brought long delayed success when the Norge flew to the Pole and on to Alaska. On 18 June 1928 he and five companions took off from Tromsø on a search and rescue flight for the missing airship Italia and were never seen again.
