Beat High Gas Prices Now! Diane MacEachern,2005 No one ever won a prize for spending the most money possible on gas. Our goal should be to spend the least amount of money, and use the least amount of fuel, to cover the distance we want to go, states MacEachern.If you're looking for ways to spend less money on gas but still get where you want to go, this handy guidebook offers dozens of easy-to-follow tips to help you beat the pump. Here's what you'll find inside: * How to make gas go farther when you drive to work or go shopping* Information to help you choose a new car if you want to trade in your current gas guzzler for a gas stretcher* Ways to use the Internet to find the cheapest gas in your neighborhood* What credit cards give you money back when you buy gas* How smart driving can save you \$50 every month at the pump* How to get a \$2,000 tax deduction when you buy a gas-saving hybrid vehicle* A fuel cost calculator so you can see exactly how much money you're spending on gasPLUS: Specific tips to help you save \$20, \$30, \$40 and even \$50 a month at the pump.

How to Get More Miles Per Gallon in the 1990s Robert Sikorsky,1991 With rising fuel costs and the ever-present danger of interruption in the world's petroleum supplies, conserving petrol now is in every driver's interest. This new edition explores techniques for improving petrol mileage by as much as 100 percent. Sikorsky shows what you can do behind the wheel to conserve petrol, explaining the driving and parking techniques the Shell Oil Company Mileage Marathon test group used to coax a car to go almost 400 miles on a single gallon of petrol. New to this edition is coverage of recent fuel-conserving automotive equipment, fuel additives, engine treatments, lubricants, maintenance procedures, and on-board computers that can help save energy. With this book at their disposal, drivers can not only save money for themselves, but also help cut pollution.

Gas Saving Devices Montuk Atrib, 2021 There are plenty of products on the market for consumers to choose from. Most of the time they evolve based on the needs of society. When there is a trend taking place then you will see many different products emerge that can meet the new need people have. Some of them have been around for many years but people just don't notice them. They aren't recognized until there is a significant need for them. Older products may change how they advertise and even change the name of the product in order to get a facelift in the public eye. It is no secret to anyone that gas prices have continued to rise to unbelievable prices over the past couple of years. While there has been a steady increase all along, nothing has taken place like it has in the past six months. It seems like the prices at the pumps are increasing every couple of days. That has many consumers scared to death and scrambling for a solution. They aren't making more money but continue have more expenses to cover. The more you drive your vehicle the more you are affected by these increasing fuel prices. It can be a very scary time if you already have a thin budget to work with. It may only be by a few cents but that quickly adds up to too much per gallon. The fact that the prices tend to go up every week isn't helping. In the end you are likely paying more money when you fill up than ever before. This has also led to an increase in the cost of everything else. That is because it is taking more money for suppliers to get it delivered. All of that price increase is being passed on to the consumer. Trucking companies have to pay more for fuel to get supplies to lumber yards, groceries and supplies to stores, and even to transport fuel to the gas stations. They can't stay in business if they don't increase what they charge for such deliveries. As a result the places they are delivering materials to have to increase what they charge in order to make a profit. This is a continuous cycle with the final consumer getting the short end of the stick. This has resulted in people traveling less and buying fewer items that aren't essential. With very little chance that gas prices are going to drop, people are looking for alternatives. That is why business entrepreneurs are offering a variety of gas saving devices. The controversy though is that some people believe they work while others are convinced they are nothing more than a scam. There are hundreds of such products out there available and that is appealing to consumers. They are tired of paying high amounts for gas and they are willing to do all they can in order to find a way out of it. Advertisers of such products know this and they continue to appeal to the emotions of these consumers in order to sell more of their products. Before you buy one of them you need to do your homework. You need to find out what other consumers have to say about it. You definitely don't want to waste your time or money on something that isn't going to be effective. There is no reason to hand over the cash until you know you are getting a legitimate product with a high level of credibility behind it. The Federal Trade Commission has issued several warnings about the use of gas saving devices. Therefore it is very important for you to be sure you know what you are paying for. If it sounds too good to be true than more than likely it is. Don't find out after you have paid for the product. The Federal Trade Commission has tested more than 100 products on the market that claim a person can save 20% or more on their gas expenses. However, this agency wasn't able to verify any of these products could offer those results or any significant benefit at all. You may be familiar with particular fuel saving products that have been advertised. They all fall into particular categories depending on how you use them and what methods they incorporate. Keep reading to find out reliable information on each of these

categories.
