On the Way to Information Society Thomas Magedanz,2000 This text addresses the issues in particular order and provides the results of IS & N projects addressing those issues in a synthesized manner, so that the reader can gain insights into the European projects contribution towards the telecommunications software industry.

Multi-Domain Communication Management Systems Alex Galis,2000-06-28 Among the leading challenges faced by systems managers today is the coherent management of network resources in a multi-domain, multi-environment. The MISA Project - Management of Integrated SDH and ATM Networks - brought together researchers from 17 organizations to explore and advance the state of the art in developing enabling mechanisms for end-to-end management solutions across multi-domain and multi-technology networks. These mechanisms enable interoperability between management domains, between heterogeneous network technology, and between service and network management functions in a multi-provider environment. Multi-Domain Communication Management Systems reports on the experiences of the MISA Project researchers. It provides guidance for the deployment of multi-domain management systems and offers a solid basis for the implementation of solutions to the challenges of converging data network technologies. System managers will learn the techniques and mechanisms for end-to-end management problems; network management vendors will understand the benefits and limitations of current practices and standards as they apply to multi-domain management issues; and students and researchers of advanced communications management will discover important concepts and issues related to the management of networks.

Quality, Reliability, Security and Robustness in Heterogeneous Networks Jong-Hyouk Lee,Sangheon Pack,2017-08-08 This book constitutes the refereed conference proceedings of the 12th EAI International Conference on Quality, Reliability, Security and Robustness in Heterogeneous Networks, QShine 2016, held in Seoul, South Korea, in July 2016. The 27 full papers, 5 short papers and 18 workshop papers were selected from 85 submissions. The papers are organized thematically in tracks, starting with network security, followed by QoS, reliability and modeling, wireless and mobile networks. In addition the papers of two workshops are included: International Workshop on 5G Communication Architecture and Technology (5G-CAT 2016), and the 2nd International Workshop on Sensor Networks and Cloud Computing (SNCC 2016).

Social Networking and Community Behavior Modeling: Qualitative and Quantitative Measures Safar, Maytham,2011-12-31 Social Networking and Community Behavior Modeling: Qualitative and Quantitative Measures provides a clear and consolidated view of current social network models. This work explores new methods for modeling, characterizing, and constructing social networks. Chapters contained in this book study critical security issues confronting social networking, the emergence of new mobile social networking devices and applications, network robustness, and how social networks impact the business aspects of organizations.

Climate Action 2009/2010 Sustainable Development International,United Nations Environment Programme,2009 This third annual edition of Climate Action focuses on some of the major issues for resolution in Copenhagen and the actors who can help to implement the solutions. Progress will require

commitment and cooperation. Partnerships will be central, both in Copenhagen and beyond. Climate Action is produced to encourage and assist governments and business to lower greenhouse gas (GHG) emissions. This book features a range of articles that encourage the sharing of best practice and the development of new technologies and initiatives and illustrates the opportunities for business and governments to reduce costs and increase profits while tackling climate change. The articles cover Human Impact, Policy, Business and Finance, Technology, Energy, Transport, Ecosystem Services, Built Environment and a Regional Focus on Canada.

Networks for Grid Applications Pascale Vicat-Blanc Primet, Tomohiro Kudoh, Joe Mambretti, 2009-05-08 This book constitutes the thoroughly refereed post-conference proceedings of the Second International Conference on Networks for Grid Applications, GridNets 2008, held in Beijing, China in October 2008. The 19 revised full papers presented together with 4 invited presentations were carefully reviewed and selected from 37 submissions. The papers address the whole spectrum of grid networks, ranging from formal approaches for grid management to case studies in optical switching.

Intelligence and Security Informatics Daniel Ortiz-Arroyo, 2008-11-24 This book constitutes the refereed proceedings of the First European Conference on Intelligence and Security Informatics, EuroISI 2008, held in Esbjerg, Denmark, in December 2008. The 23 revised full papers and 2 revised poster papers presented were carefully reviewed and selected from 48 submissions. The papers are organized in topical sections on criminal and social network analysis, intelligence analysis and knowledge discovery, Web-based intelligence monitoring and analysis, privacy protection, access control, and digital rights management, malware and intrusion detection, as well as surveillance and crisis management.

Dynamic Social Networks in Agent-based Modelling Holzhauer, Sascha, 2017 Agent-based modelling enables the explicit representation of entities and their interaction with each other and the environment, and so it became an important method to study complex systems. Social networks form an important part of agent-based social simulation, as they define the topology of agent interaction. This dissertation initially identifies important properties of social networks and their dynamics and reviews their representation in agent-based models of relevant domains. A classification of levels of detail for the network modelling components initialisation, dynamics of networks, and dynamics on networks is proposed and guides the identification of deficits. A formal, iterative evaluation framework is developed to quantitatively assess network modelling approaches under a set of weighted criteria (representativity, adjustability, validity, and efficiency). The framework is applied to an abstract model of opinion dynamics and to an empirically grounded model of social influence. A lifestyle-specific network survey is designed, conducted, and analysed and helps to ground the evaluation of the network modelling's representativity on empirical data. The study finds significant differences of degree and distance distributions as well as in the composition of ego networks between lifestyles. New network modelling approaches are developed to account for requirements in agent-based models such as agent-type specific link preferences, degree and distance distributions, community structures, and interaction dynamics. The comparison of simple to elaborated network modelling for the application models shows a significant impact on simulation results, highlighting the need for informed decisions about suitable approaches.

Handbook of Social Network Technologies and Applications Borko Furht, 2010-11-04 Social networking is a concept that has existed for a long time; however, with the explosion of the Internet, social networking has become a tool for people to connect and communicate in ways that were impossible in the past. The recent development of Web 2.0 has provided many new applications, such as Myspace, Facebook, and LinkedIn. The purpose of Handbook of Social Network Technologies and Applications is to provide

comprehensive guidelines on the current and future trends in social network technologies and applications in the field of Web-based Social Networks. This handbook includes contributions from world experts in the field of social networks from both academia and private industry. A number of crucial topics are covered including Web and software technologies and communication technologies for social networks. Web-mining techniques, visualization techniques, intelligent social networks, Semantic Web, and many other topics are covered. Standards for social networks, case studies, and a variety of applications are covered as well.

Internet Horror, Science Fiction and Fantasy Television Series, 1998-2013 Vincent Terrace, 2014-05-05 This is the first ever compilation on Internet television and provides details of 405 programs from 1998 to 2013. Each entry contains the storyline, descriptive episode listings, cast and crew lists, the official website and comments. An index of personnel and programs concludes the book. From Barry the Demon Hunter to Time Traveling Lesbian to Hamilton Carver, Zombie P.I., it is a previously undocumented entertainment medium that is just now coming into focus. Forty-eight photos accompany the text.

Towards a Synergistic Combination of Research and Practice in Software Engineering Piotr Kosiuczenko, Lech Madeyski, 2017-08-04 This book reports on recent advances in software engineering research and practice. Divided into 15 chapters, it addresses: languages and tools; development processes; modelling, simulation and verification; and education. In the first category, the book includes chapters on domain-specific languages, software complexity, testing and tools. In the second, it reports on test-driven development, processing of business rules, and software management. In turn, subsequent chapters address modelling, simulation and verification of real-time systems, mobile systems and computer networks, and a scrum-based framework. The book was written by researchers and practitioners, the goal being to achieve a synergistic combination of research results achieved in academia and best practices used in the industry, and to provide a valuable reference guide for both groups.

Innovative Knowledge Management: Concepts for Organizational Creativity and Collaborative Design Eardley, Alan, Uden, Lorna, 2010-09-30 This book provides a valuable resource for promoting current academic discourse on innovation in knowledge-intensive organizations and contexts--Provided by publisher.

The SAGE Handbook of Organizational Institutionalism Royston Greenwood, Christine Oliver, Roy Suddaby, Kerstin Sahlin-Andersson, 2013-03-26 Institutional theory lies at the heart of organizational theory yet until now, no book has successfully taken stock of this important and wide-ranging theoretical perspective. With insight and clarity, the editors of this handbook have collected and arranged papers so readers are provided with a map of the field and pointed in the direction of new and emerging themes. The academics who have contributed to this handbook are respected internationally and represent a cross-section of expert organization theorists, sociologists and political scientists. Chapters are a rich mix of theory, how to conduct institutional organizational analysis and empirical work. The SAGE Handbook of Organizational Institutionalism will change how researchers, teachers and advanced students think about organizational institutionalism.

Groundswell Jerry Abendroth, 2019-03-18 No matter the era or the time, politics have captured the heart of Americans from the dawning days of our young nation to the present day with its ever-widening culture gap. Reviewers of history have commented on the acidic political times surrounding the Corrupt Bargain, the Teapot Dome scandal, and the Monica Lewinsky scandal. These scandals have caused increasing apathy in the electorate and an attitude of nothing will change around here ever. However, and there is always a however, fresh winds arrive with new persons, new ideas, and a new paradigm for a political change. *Groundswell: An American Political Movement* documents the arrival of that fresh breeze that the American public embraces with enthusiasm. Samuel Harrison is not a typical political candidate. In fact, he really isn't a political candidate at all, save his extraordinary run for the presidency. The political establishment reacts predictably with first dismissal, then derisiveness, and, finally, mild panic at the entry of Samuel into presidential politics. Even with his political naiveté, Samuel maneuvers the mine-filled waters of the Democrats and the Republicans with relative ease. As readers, we are afforded a front row seat for this narrative on the Harrison presidential train through rough terrain to unexpected outcomes.

Looking to methods and tools for the Research in Design and Architectural Technology Filippo Bosi, Paolina Ferrulli, Elisabetta Fossi, 2015-10-15 The volume presents the research experience of young researchers and PhD candidates, dealing with the Italian scientific area 08-C1 (Design and Technology of Architecture), with a discussion about scientific issues and methodologies applied. The aim is to express the methodological and investigation features of the issues faced by the researchers, along with the effectiveness of their researches design, giving the reader an immediate overview of the 08-C1 doctoral experience. Beside young researchers statements as witnesses of this research path, the volume collects professors critical contribution, to enrich the comprehensive picture of the progression and methodologies of the doctoral researches presented.
