Cultural Competence in Caring for Muslim Patients G.Hussein Rassool,2014-05-07 To meet the care needs of today's diverse patient community, healthcare professionals must learn to care in environments comprising different worldviews, communication styles and expectations. To meet this challenge, it is essential that they operate from a solid foundation of knowledge, based on high standards for cultural competence in nursing practice. Cultural Competence in Caring for Muslim Patients is designed for nurses and allied healthcare professionals. It offers a deeper insight into ways in which the Islamic faith is intertwined with patient care, and explores approaches with which to effectively address the varying healthcare requirements of a growing and diverse Muslim community. Following a clear and accessible format, the book discusses key issues including: - The identity and religious beliefs of Muslims - The ethical dimension in caring - Understanding the Muslim family system - Health considerations during fasting and pilgrimage (Hajj) What's more, case studies, activities and discussion questions throughout actively support learning and reflective practices. This insightful guide will prove a valuable asset for any nurse or healthcare professional looking to develop their understanding of how to deliver culturally compassionate and congruent care.

An Introduction to GCC Brian Gough,Richard M. Stallman,2004 Provides an introduction to the GNU C and C++ compilers, gcc and g++. This manual includes: compiling C and C++ programs using header files and libraries, warning options, use of the preprocessor, static and dynamic linking, optimization, platform-specific options, profiling and coverage testing, paths and environment variables, and more.

Foreign Relations of the GCC Countries Eman Ragab,Silvia Colombo,2018-12-07 This book examines the foreign policies of the GCC countries six years after the Arab uprisings, in terms of drivers, narratives, actions and outcomes, paying particular attention to Middle Eastern countries, Iran and Western international powers. The assessment focuses on current affairs, but also contributes to establishing a productive link between empirical studies and the existing theoretical frameworks that help explain the increasing foreign policy activism of the GCC countries. All in all, the articles collected in

this book shed light on and provide a more solid and fine-grained understanding of how regional powers like Saudi Arabia, as well as the other smaller GCC countries, act and pursue their interests in an environment full of uncertainty, in the context of changing regional and global dynamics and power distribution. The book brings together the articles published in a Special Issue of the International Spectator.

Arab Migrant Communities in the GCC Zahra Babar, 2017-07-01 Long a recipient of migrants from its surrounding areas, the Arabian Peninsula today comprises a mosaic of communities of diverse ethnic, cultural, linguistic and religious origins. For decades, while the Gulf Cooperation Council (GCC) states have housed and employed groups of migrants coming and going from Asia, Africa and the West, they have also served as home to the older, more settled communities that have come from neighbouring Arab states. *Arab Migrant Communities in the GCC* is a unique, original work of scholarship based on in-depth fieldwork shedding light on a topic both highly relevant and woefully understudied. It focuses on the earlier community of Arab immigrants within the GCC, who are among the politically most significant and sensitive of migrant groups in the region. Through its multi-disciplinary lenses of social history, cultural studies, economics, and political science, the book presents original data and provides analyses of the settlement and continued evolution of migrant Arab communities across the GCC, their work in and assimilation within host societies and labour markets, and their political, economic, social and cultural significance both to the GCC region and to their countries of origin.

Modern China's Network Revolution Zhongping Chen, 2011-06-27 Chambers of commerce developed in China as a key part of its sociopolitical changes. In 1902, the first Chinese chamber of commerce appeared in Shanghai. By the time the Qing dynasty ended, over 1,000 general chambers, affiliated chambers, and branch chambers had been established throughout China. In this new work, author Zhongping Chen examines Chinese chambers of commerce and their network development across Lower Yangzi cities and towns, as well as the nationwide arena. He details how they achieved increasing integration, and how their collective actions deeply influenced nationalistic, reformist, and revolutionary movements. His use of network analysis reveals how these chambers promoted social integration beyond the bourgeoisie and other elites, and helped bring society and the state into broader and more complicated interactions than existing theories of civil society and public sphere suggest. With both historical narrative and theoretical analysis of the long neglected local chamber networks, this study offers a keen historical understanding of the interaction of Chinese society, business, and politics in the early twentieth century. It also provides new knowledge produced from network theory within the humanities and social

sciences.

Essential Linux fast Ian Chivers,2001-06-25 Linux has become increasingly popular as an alternative operating system to Microsoft Windows. This is largely due to its improved performance and ability to run favourite PC applications. If you want to make the switch from Windows, this is the book you need. The author gives advice on how to install the system and explains why it is becoming one of the hottest operating systems of the millennium. Topics covered include: installing a Linux system, using X Windows, using the Internet with Linux, and using Scripting.

Counterterrorism in Saudi Arabia Rachael M. Rudolph,2017-11-17 As jihadist extremism, and its manifestation as Al Qaeda, began to spread - even in the years before 9/11 - Saudi Arabia became a principal target. Jihadists identified the country as the first state against which they could mount a concerted effort to destabilise, undermine and subvert the authority of its central government and its ruling elites. This prompted the Saudis to take defensive initiatives which were to become widely recognised as an effective way to deal with extremism. The key element of the Saudi approach was to lace their hard confrontation of the extremists with subtle, soft mechanisms to undermine the will of actual and potential terrorists. The efforts ranged from interdiction of funding terrorist groups to the deployment of social and psychological pressures aimed at steering extremists away from their cause. This included welfare inducements whereby perpetrators were persuaded by material benefits - state support to families and individuals, housing allowances, educational opportunities - to abandon their political goals in favour of a return to family and society. This book charts the course of the Saudi terrorist rehabilitation programme and makes vital reading for all who, either directly or indirectly, have an interest in following the emergence of international terrorism.

The Changing Security Dynamics of the Persian Gulf Kristian Coates Ulrichsen,2018-02-01 The contradictory trends of the 'post-Arab Spring' landscape form both the backdrop to, and the focus of, this volume on the changing security dynamics of the Persian Gulf, defined as the six GCC states plus Iraq and Iran. The political and economic upheaval triggered by the uprisings of 2011, and the rapid emergence of the Islamic State of Iraq and Syria in 2014, have underscored the vulnerability of regional states to an intersection of domestic pressures and external shocks. The initial phase

of the uprisings has given way to a series of messy and uncertain transitions that have left societies deeply fractured and ignited violence both within and across states. The bulk of the protests, with the notable exception of Bahrain, occurred outside the Gulf region, but Persian Gulf states were at the forefront of the political, economic, and security response across the Middle East. This volume provides a timely and comparative study of how security in the Persian Gulf has evolved and adapted to the growing uncertainty of the post-2011 regional landscape.

Doing More Digital Humanities Constance Crompton,Richard J. Lane,Ray Siemens,2019-12-10 As digital media, tools, and techniques continue to impact and advance the humanities, Doing More Digital Humanities provides practical information on how to do digital humanities work. This book offers: A comprehensive, practical guide to the digital humanities. Accessible introductions, which in turn provide the grounding for the more advanced chapters within the book. An overview of core competencies, to help research teams, administrators, and allied groups, make informed decisions about suitable collaborators, skills development, and workflow. Guidance for individuals, collaborative teams, and academic managers who support digital humanities researchers. Contextualized case studies, including examples of projects, tools, centres, labs, and research clusters. Resources for starting digital humanities projects, including links to further readings, training materials and exercises, and resources beyond. Additional augmented content that complements the guidance and case studies in Doing Digital Humanities (Routledge, 2016).

Critical Issues in Healthcare Policy and Politics in the Gulf Cooperation Council States Ravinder Mamtani MD,Albert B. Lowenfels MD,2018-01-02

This is the first book to examine challenges in the healthcare sector in the six Gulf Cooperation Council (GCC) countries (Saudi Arabia, Oman, the United Arab Emirates, Qatar, Kuwait, and Bahrain). These countries experienced remarkably swift transformations from small fishing and pearling communities at the beginning of the twentieth century to wealthy petro-states today. Their healthcare systems, however, are only now beginning to catch

up. Rapid changes to the population and lifestyles of the GCC states have completely changed—and challenged—the region’s health profile and infrastructure. While major successes in combatting infectious diseases and improving standards of primary healthcare are reflected in key health indicators, new trends have developed; increasingly “lifestyle” or “wealthy country” diseases, such as diabetes, heart disease, and cancer, have replaced the old maladies. To meet these emerging healthcare needs, GCC states require highly trained and skilled healthcare workers, an environment that supports local training, state-of-the-art diagnostic laboratories and hospitals, research production and dissemination, and knowledge acquisition. They face shortages in most if not all of these areas. This book provides a comprehensive study of the rapidly changing health profile of the region, the existing conditions of healthcare systems, and the challenges posed to healthcare management across the six states of the GCC.

Restriction Endonucleases Alfred Pingoud, 2012-12-06 Restriction enzymes are highly specific nucleases which occur ubiquitously among prokaryotic organisms, where they serve to protect bacterial cells against foreign DNA. Many different types of restriction enzymes are known, among them multi-subunit enzymes which depend on ATP or GTP hydrolysis for target site location. The best known representatives, the orthodox type II restriction endonucleases, are homodimers which recognize palindromic sequences, 4 to 8 base pairs in length, and cleave the DNA within or immediately adjacent to the recognition site. In addition to their important biological role (up to 10 % of the genomes of prokaryotic organisms code for restriction/modification systems!), they are among the most important enzymes used for the analysis and recombination of DNA. In addition, they are model systems for the study of protein-nucleic acids interactions and, because of their ubiquitous occurrence, also for the understanding of the mechanisms of evolution.
