The Chronology of the Kings of Israel and Judah Gershon Galil,1996-01-01 This pioneering study wrestles with the perpetual problem of chronology in the Books of Kings. The result is one of the most responsible and yet most critical chronologies proposed to date, and will be the standard chronological reference for the next decade, if not longer.

The Lower Stratum Families in the Neo-Assyrian Period Gershon Galil,2007 This pioneering study surveys all 446 Lower Stratum families in the period under review (800-600 B.C.). It is the most important and the most responsible study of the lower stratum of the Neo-Assyrian society proposed to date.

Dr. Galil's Oral Histology & Embryology on CD-ROM [electronic Resource] Pun, Jim,K. A. (Khadry Abdel) Galil,Galil, Ramzy,2001

Homeland and Exile Gershon Galil,Markham (Mark) Geller,Alan Millard,2009-10-23 This volume is a tribute to B. Oded's career, and it points to the span of his research. It's thirty contributions deal with a wide range of topics, focusing on the Assyrian Empire, as well as on the Hebrew Bible.

God's Love Story Gershon Galil,2022 Gershon Galil's study examines the formation of the books included in the Deuteronomistic Composition, and the historical and theological perceptions of the Deuteronomist (Dtr), who composed the Deuteronomistic Composition during the Babylonia exile, and completed it ca. 560 BCE. According to the author, the Deuteronomistic Composition included not only the books of Deuteronomy, Joshua-Kings, but the book of Jeremiah as well. Deuteronomy is the preface to this composition, and Jeremiah seals it; in Deuteronomy the path is demarcated and the norms are fixed; the body of the composition, namely the books from Joshua to Kings, presents a detailed history of the relation between God and Israel, from the conquest of the good land to the destruction of the Temple and the loss of the land. The book of Jeremiah, which concludes the composition, discusses at length the decline and fall of Judah, analyzes the sins that brought about the destruction, and at the same time propagates the gospel of redemption among the exiles. Like Moses, who predicts exile but also redemption, Jeremiah is the prophet of destruction but also of redemption. So Dtr examines the past according to the principles of the Torah of Moses (Deuteronomy) - and delineates the future in light of God's word in the mouth of His prophets - primarily Moses and Jeremiah. God's eternal love for Israel is the main tenet of Dtr's worldview. In his opinion, the bond between the Lord and Israel is endless. Its beginning is in the days of the Patriarchs but it will never end. As the relationship is everlasting, the nation of Israel is divine by nature: eternal and holy. The circular nature of the relationship between God and His people implies, in essence, a reality of closeness and distance, affection and anger, sin and repentance, punishment and salvation. Fulfillment of the word of God is one of the central motifs of the Deuteronomistic Composition. Since the main message of Dtr is that God promises Israel a return to the land, eternal love and an everlasting covenant, the people may wonder whether God's promises can be trusted. The answer comes in many scriptures that emphasize the fulfillment of the word of God and teach that God's promises can always be trusted.

Introduction to AK/GALIL Airsoft AEG Chak Tin Yu,2020-04-29 The Galil series of weapons is named after Yisrael Galil and is in use by forces in many countries all over the world. Its design borrowed heavily from the AK-47, with the gas diversion system significantly modified to reduce the overall recoil force of the rifle in automatic mode. This training book has been developed from the ground up for beginners who know little about Airsoft AEG technology. As part of our Airsoft Technology Self-Paced Training Series, this book gives an introduction to the performance elements of a Galil/AK AEG. The primary goal of this book is to explain the various AEG performance

concepts in very simple language. We believe that this book and its support materials have everything you need for an informative, interesting, challenging and entertaining Airsoft educational experience.

Histories of Bioinvasions in the Mediterranean Ana Isabel Queiroz, Simon Pooley, 2018-05-15 Bioinvasions is a current top research subject for natural sciences, social sciences and humanities and a major concern for conservationists, land managers and planners. In the last decades, new findings, perspectives and practices have revealed the multifaceted challenges of preventing new introductions and dealing with those invasive species that harm natural ecosystems, economy and human welfare. This book brings together environmental historians and natural scientists to share their studies and experiences on the human dimensions of biological invasions from the ancient past to the current challenges. The collection of papers focuses on the Mediterranean region and deals with aquatic and terrestrial ecosystems on the mainland and islands, ranging from marine and freshwater environments to coastal marshlands and forests. A wide diversity of animals and plants are featured, from marine fishes to marine and freshwater crustaceans, invertebrates, reptiles and amphibians, birds and mammals, to grasses, shrubs and trees. This book is a contribution to the scientific debate on how to deal with the historical dimensions of biological invasions, fostering dialogue between cultural and ecological explanations of environmental change, to inform environmental policy and management. It has been organized in three sections: the first is the editors' introduction, in which they review the existing literature and highlight relevant concepts and ideas; the second is about alien species in the Mediterranean region; the third includes cases from other Mediterranean-type regions.

Studies in Historical Geography and Biblical Historiography Gershon Galil, Moshe Weinfeld, 2000-07-31 This book is presented to Professor Zecharia Kallai, one of the leading scholars of Historical Geography of the Bible, by his students and friends. It contains a collection of studies in Historical Geography and Biblical Historiography. The book is divided into three parts: Historical Geography, Biblical History and Historiography, and Texts and Textual Studies. The book is concluded with a list of Kallai's publications. Part one contains articles by Shmuel Ahituv, Aaron Demsky, Volkmar Fritz, Gershon Galil, M. Heltzer, André Lemaire, Zeev Safrai, B. Oded and Joshua Schwartz. Part two contains articles by Yairah Amit, Graeme Auld, David Elgavish, Moshe Garsiel, E.L. Greenstein, A.F. Rainey, Shmuel Vargon. And part three contains articles by Yitzhak Avishur, Bob Becking, Moshe Elat, Bezalel Porten & Ada Yardeni, Moshe Weinfeld and Ze'ev Weisman.

Introduction to Galil Sar Aeg Airsoftpress, 2014-02-07 The Galil series of weapons is named after Yisrael Galil and is in use by forces in many countries all over the world. Its design borrowed heavily from the AK-47, with the gas diversion system significantly modified to reduce the overall recoil force of the rifle in automatic mode. SAR means Short Assault Rifle. This training book has been developed from the ground up for beginners who know little about Airsoft AEG technology. As part of our Airsoft Technology Self-Paced Training Series, this book gives an introduction to the basic Galil SAR AEG architecture. The primary goal of this book is to explain the various AEG technical concepts in very simple language. A Guide to, and Checklist for, the Decapoda of Namibia, South Africa and Mozambique (Volume 3) W. D.

Emmerson,2017-06-20 Decapods are a culmination of nearly 600 million years of Crustacean evolution, during which time they have radiated into a variety of superfamilies, families, genera and species which occupy a variety of niches from fresh mountain streams to the abysses of the oceans. This book will fill a gap in the current literature on southern African decapods. Since Barnard published his Descriptive Catalogue of South African Decapod Crustacea in 1950, there have been numerous additions and name changes. This publication updates the taxonomy, and includes ecological and fisheries information. In addition, Kensley's (1981) distributional checklist for the region has been updated and includes large numbers of new species and records for the region, bringing the total number of decapod to over 1000 species. Although not exhaustive, 262 species are featured, some of which are beautiful, some have commercial or artisinal value, both for consumption and the aquarium, and some have important ecological functions, while others are rare or interesting. For each species there is a photograph, synonymies, common names, a description, ecological information and name derivation (etymology). All the decapod families found in South Africa are described, some new, along with chapters on decapod research history in southern Africa, commercial and artisinal food value of decapods, biodiversity and future research direction. The book is arranged systematically, as taxonomy is based on phylogeny, starting with the earliest forms and progressing to the most derived and advanced forms, and will serve to stimulate interest and future research into southern Africa's rich decapod biodiversity, especially at a time when biodiversity itself is threatened by global warming, coral bleaching and habitat loss. It will appeal to people interested in Decapoda, including academics, scholars, students, fishermen, aquarists, aquaculturists, recreational snorkel and SCUBA divers, as well as those interested in conservation, biodiversity, management and governance.

Pattern Matching Algorithms Alberto Apostolico,Zvi Galil,1997-05-29 Issues of matching and searching on elementary discrete structures arise pervasively in computer science and many of its applications, and their relevance is expected to grow as information is amassed and shared at an accelerating pace. Several algorithms were discovered as a result of these needs, which in turn created the subfield of Pattern Matching. This book provides an overview of the current state of Pattern Matching as seen by specialists who have devoted years of study to the field. It covers most of the basic principles and presents material advanced enough to faithfully portray the current frontier of research. Because of these recent advances, this is the right time for a book that brings together information relevant to both graduate students and specialists in need of an in-depth reference.

Handbook of Flowering Abraham H. Halevy,2019-07-23 These volumes are an exhaustive source of information on the control and regulation of flowering. They present data on the factors controlling flower induction and how they may be affected by climate and chemical treatments. For each plant, specific information is provided on all aspects of flower development, including sex expression, requirements for flowering initiation and development, photoperiod, light density, vernalization, and other temperature effects and interactions. Individual species are described from the standpoint of juvenility and maturation, morphology, induction and morphogenesis to anthesis. All information is presented alphabetically for easy reference

Combinatorial Optimization Alexander Schrijver,2003-02-12 From the reviews: About 30 years ago, when I was a student, the first book on combinatorial optimization came out referred to as the Lawler simply. I think that now, with this volume Springer has landed a coup: The Schrijver. The box is offered for less than 90.- EURO, which to my opinion is one of the best deals after the introduction of this currency. OR-Spectrum

Holman Illustrated Guide To Biblical Geography Holman Bible Publishers, Paul Wright, 2020-12-01 Reading the land enables us to read the Bible with greater insight. Though the truths of the Bible transcend time and place, they are rooted in them. Geographical data inform our understanding of activity in the land of the Bible, while the Bible's own description of these events, embedded deeply in the realia of the land itself, helps us better understand the living context in which these events took place. When we develop a skill set that allows us to read the land of the Bible as fluently as we might read the text, we stand not only to gain a better appreciation of the divine-human events of Scripture, we also gain an understanding of how these events become relevant to us in our own particular living contexts. Chapters include: Exploring the World of the Bible Building Blocks of Biblical Geography The Land of Ancient Israel: The Southern Regions (Judah/Judea) The Land of Ancient Israel: The Central Regions (Israel/Samaria) The Land of Ancient Israel: The Northern Regions (Galilee) Transjordan Afterword: Geography of the Heart Biblical geography has great apologetic value. The biblical writers had to be accurate when presenting geographical material. Unlike some matters of history and doctrine, their assertions about the realities of land forms and climate, or about the relation of one city to another, or about the use of strategic routes could easily be verified both by their first readers as well as by contemporary readers. Verifiable geographic information provides a solid foundation on which to place and evaluate the veracity of other truth claims in the biblical text.

The Complexity of Resolution Procedures for Theorem Proving in the Propositional Calculus Zvi Galil, 1975 A comparative study on the complexity of various procedures for proving that a set of clauses is contradictory is described. All the procedures either use the resolution rule in some form or are closely related to procedures which do. Among the procedures considered are resolution, regular resolution, Davis Putnam procedure, resolution with extension, bounded (and iterated bounded) resolution, enumeration procedures, and semantic trees. The results include exponential lower bounds for the run-time of most of the procedures, relations between the various procedures, and implications to the complexity of integer programming routines.

Kaiser Und Galil?er Henrik Ibsen,

The Cnidaria, Past, Present and Future Stefano Goffredo, Zvy Dubinsky, 2016-09-07 This volume presents a broad

panorama of the current status of research of invertebrate animals considered belonging to the phylum Cnidaria, such as hydra, jellyfish, sea anemone, and coral. In this book the Cnidarians are traced from the Earth's primordial oceans, to their response to the warming and acidifying oceans. Due to the role of corals in the carbon and calcium cycles, various aspects of cnidarian calcification are discussed. The relation of the Cnidaria with Mankind is approached, in accordance with the Editors' philosophy of bridging the artificial schism between science, arts and Humanities. Cnidarians' encounters with humans result in a broad spectrum of medical emergencies that are reviewed. The final section of the volume is devoted to the role of Hydra and Medusa in mythology and art.
