Family Maps of Geneva County, Alabama, Deluxe Edition Gregory A.

Boyd, 2010-05-20 Locating original landowners in maps has never been an easy task-until now. This volume in the Family Maps series contains newly created maps of original landowners (patent maps) in what is now Geneva County, Alabama, gleaned from the indexes of the U.S. Bureau of Land Management. But it offers much more than that. For each township in the county, there are two additional maps accompanying the patent map: a road map and a map showing waterways, railroads, and both modern and many historical city-centers and cemeteries. Included are indexes to help you locate what you are looking for, whether you know a person's name, a last name, a place-name, or a cemetery. The combination of maps and indexes are designed to aid researchers of American history or genealogy to explore frontier neighborhoods, examine family migrations, locate hard-to-find cemeteries and towns, as well as

locate land based on legal descriptions found in old documents or deeds. The patent-maps are essentially plat maps but instead of depicting owners for a particular year, these maps show original landowners, no matter when the transfer from the federal government was completed. Dates of patents typically begin near the time of statehood and run into the early 1900s. 312 pages with 89 total maps What's Mapped in this book (that you'll not likely find elsewhere) . . . 5683 Parcels of Land (with original landowner names and patent-dates labeled in the relevant map) 47 Cemeteries plus . . . Roads, and existing Rivers, Creeks, Streams, Railroads, and Small-towns (including some historical), etc. What YEARS are these maps for? Here are the counts for parcels of land mapped, by the decade in which the corresponding land patents were issued: DecadeParcel-count 1820s1 1830s42 1840s161 1850s1183 1860s550 1870s9 1880s613 1890s2620 1900s396 1910s100 1920s6 What Cities and Towns are in Geneva County, Alabama (and in this book)? The Politics of Maps Christine Leuenberger, Izhak Schnell, 2020-07-18 The land between the Mediterranean Sea and the Jordan Valley has been one of the most disputed territories in history. Since the establishment of the state of Israel in 1948, Palestinians and Israelis have each sought claim to the national identity of the land through various martial, social and scientific tactics, but no method has offered as much legitimacy and national controversy as that of the map. *The Politics of Maps* delves beneath the battlefield to unearth the cartographic strife behind the Israel/Palestine conflict. Blending science and technology studies, sociology, and geography with a host of archival material, in-depth interviews and ethnographies, this book explores how the geographical sciences came to be entangled with the politics, territorial claim-making, and nation-state building of Israel/Palestine. Chapters chart the cartographic history of the region, from the introduction of Western scientific and legal paradigms that seemingly legitimized and depoliticized new land regimes to the rise of new mapping technologies and software that expanded access to cartography into the public sphere. Maps produced by various sectors like the peace camps or the Jewish community enhanced national belonging, while others, like that of the Green Line, served largely to divide. The stories of Israel's many boundaries reveal that there is no absolute, technocratic solution to boundary-making. As boundaries continue to be controversial and the Israeli-Palestinian conflict remains intractable and unresolved, *The Politics of Maps* uses

nationally-based cartographic discourses to provide insight into the complexity, fissures and frictions within internal political debates, illuminating the persistent power of the nation-state as a framework for forging identities, citizens, and alliances.
