Intelligent Robotics and Applications Ming Xie,Youlun Xiong,Caihua Xiong,Zhencheng Hu,2009-12-14 The market demands for skills, knowledge and personalities have positioned robotics as an important field in both engineering and science. To meet these challenging - mands, robotics has already seen its success in automating many industrial tasks in factories. And, a new era will come for us to see a greater success of robotics in n- industrial environments. In anticipating a wider deployment of intelligent and auto- mous robots for tasks such as manufacturing, eldercare, homecare, edutainment, search and rescue, de-mining, surveillance, exploration, and security missions, it is necessary for us to push the frontier of robotics into a new dimension, in which motion and intelligence play equally important roles. After the success of the inaugural conference, the purpose of the Second Inter- tional Conference on Intelligent Robotics and Applications was to provide a venue where researchers, scientists, engineers and practitioners throughout the world could come together to present and discuss the latest achievement, future challenges and exciting applications of intelligent and autonomous robots. In particular, the emphasis of this year’s conference was on “robot intelligence for achieving digital manufact- ing and intelligent automations. ” This volume of Springer’s Lecture Notes in Artificial Intelligence and Lecture Notes in Computer Science contains accepted papers presented at ICIRA 2009, held in Singapore, December 16-18, 2009. On the basis of the reviews and recommendations by the international Program Committee members, we decided to accept 128 papers having technical novelty, out of 173 submissions received from different parts of the world.

Pace Yourself Amy Arthur,2023-12-28 'Ideal for anyone struggling with fatigue' - Claudia Hammond, author of The Art of Rest 'an exciting journey through human thought and scientific discoveries, encouraging each of us to step back, reflect and discover the pace of life that achieves our optimal energy balance. Pace Yourself is all about taking control so that we can fulfil our potential and, in the process, live happier, healthier lives.' - Prof Russell Foster, author of Life Time In these times of unprecedented stress, burnout, mental exhaustion, depression and fatigue Pace Yourself offers a powerful lifeline in the form of pacing, a simple, science-based tool, to help restore joy, energy and balance in our lives. Written by Amy Arthur, an award-winning writer and science journalist, Arthur shares not just the science of pacing and how it works, but also shows how to use pacing in our daily lives to thrive, not just survive. She also shares her own pacing journey, explaining how it helped her manage the chronic, energy-limiting condition called ME that she was diagnosed with as a teenager. Unpacking all aspects of personal energy and how we make, spend and save it, Arthur will help readers go from tired-all-the-time to focused and energised by prioritising what matters and adopting energy-building habits and lifestyle hacks - all with the help of pacing. Why burn out when you can pace yourself and live a successful, fulfilling life?

Connecting the System to Enhance the Practitioner and Consumer Experience in Healthcare E. Cummings,A. Ryan,L.K. Schaper,2018-08-30 Health informatics plays a central role in the digital transformation of the healthcare sector. The integration and connection of health services, practitioners and consumers is critical to the realisation of the improvements promised by digital health, and the secondary use of health data has led to ground-breaking research discoveries. Increased reliance upon all types of digital media has also established health informatics as a viable specialisation in healthcare. This book presents the proceedings of the 26th national Health Informatics Conference (HIC 2018), Australia’s premier health informatics event, held in Sydney, Australia, in July/August 2018. The conference provides an environment for clinicians, researchers, health IT professionals, industry and consumers to integrate, educate and share the knowledge which drives innovative thinking, and this year’s theme, ‘Today’s best practice, innovation today and preparing for tomorrow’, focuses on the important issues of connecting the system, being smart with data, and enhancing the practitioner and consumer experience in healthcare interactions. The papers presented here reflect this theme, highlighting cutting-edge research evidence, technology updates and innovations from the digital transformation of the healthcare sector. Covering a wide spectrum of work, and encompassing major theoretical concepts, examples of key applications of new technologies and important new developments in the field of health informatics, the book will be of interest to all those working in the healthcare sector.
