

Geo Notification History

Bernard Quaritch.

History: 7 : Census geography and the geographic support system ,2009 From Book's Preface: Contains summary population totals for the United States, Puerto Rico, and the Island areas and for major race groups and an overview of political, statistical, and technological context in which the census took place. Describes preparations for the census, including lessons learned from the 1990 census, consultations with governmental and other data users, recommendations from the National Academy of Sciences and other advisory groups, and the plans for and results of census tests conducted between 1992 and 1998. Summarizes the history of each question on the short and long forms, the response categories, data uses, and any associated editing, allocation, and coding instructions. Reviews evaluations and recommendations from the 1990 program, the decision to use paid advertising in Census 2000, developing and implementing an integrated marketing strategy, components of the partnership program, and a series of special initiatives. Describes the organization and distribution of regional census centers and local census offices, the hiring and training of temporary field staff, the hardware and software used to track and assess census progress, and the different components of the enumeration process. Summarizes the decision to hire contractors to conduct data capture and manage the data capture centers, the hardware and software used to capture census data, the headquarters tabulation process, identification and deletion of duplicates, editing and imputation, intermediate data files, and the creation of the 100 percent and sample detail files. Covers such topics as data collection and tabulation geography, mapping, creating and updating the census address list, data products and their dissemination, the experimental and evaluation programs, legislation, litigation, the debate over sampling, and the census in Puerto Rico and the Island Areas.

Geography, History, and the American Political Economy John

Heppen,2009-08-16 This collection takes on the call issued by reviewers of The American Way for a critical application of Carville Earle's framework to more geographical examples of political and economic shifts in America's past. The essays illustrate changes in U.S. settlement, development, and political structure through the lens of the restructuring of the American economy and society over approximately fifty year cycles of crisis and recovery. They demonstrate the extension of American's sphere of influence outside of the United States as a larger scalar shift, and they underscore the utility of geography in answering very local questions concerning questions of poorly documented settlement histories. Focusing on the geographic responses to periodic cycles of crisis and recovery and the more general underlying intertwining of geography and history, Geography, History, and the American Political Economy is an incisive demonstration of how the constant restructuring of American politics and economy occurs within spatial and historical constructs.

The History of Geoconservation Cynthia V. Burek,Colin D. Prosser,2008 This book is the first to describe the history of geoconservation. It draws on experience from the UK, Europe and further afield, to explore topics including: what is geoconservation; where, when and how did it start; who was responsible; and how has it differed across the world? Geological and geomorphological features, processes, sites and specimens, provide a resource of immense scientific and educational importance. They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many of the great tourism destinations. Mankind's activities, including contributing to enhanced climate change, pose many threats to this resource: the importance of safeguarding and managing it for future generations is now widely accepted as part of sustainable development. Geoconservation is an established and growing activity across the world, with more participants and a greater profile than ever before. This volume highlights a history of challenges, set-backs, successes and visionary individuals and provides a sound basis for taking geoconservation into the future.
