Inflation and the Price Indexes Jules Backman,Martin Reuben Gainsbrugh,1966 The Illustrated Dictionary of Science is a well-organized dictionary of science covering all the major scientific disciplines: physics, chemistry, biology, ecology, medicine and physiology, and the Earth sciences (e.g. Polaris, retrovirus, trephine, vapor). Its entries also explain terms belonging to the history of science and include brief biographies of important scientists (e.g. Curie). Diagrams and artworks illustrate key concepts of science, making the dictionary particularly suitable for use in the classroom or as family reference. The lavishly illustrated entries explaining such topics as the solar system, plant evolution, skeletons and muscles, or geological time scale are a unique feature of this dictionary.

Britain's Economic Prospects Reconsidered Alec Cairncross,2013-11-05 This book is a sequel to Britain's Economic Prospects, the report issued in 1968 by the Brookings Institution and universally accepted as the most thorough and comprehensive study of the British Economy to have ever appeared. Two years later, just after the British General election, six of the American economists who prepared the Brookings Report met with a number of other leading economists from Britain and the United States, at a weekend conference at Ditchley Park, to review the findings of the report. Papers submitted to the conference by four of the British Economists (R.C.C. Matthews, G.D.N.

Worswick, E.H. Phelps Brown and M.V. Posner) covered the same ground as the Brookings Report - the role of demand management, trade and balance-of-payments problems, labour policies, and industrial policies. The conference also had before it a fifth paper, on fiscal policy and stabilization, which took issue with some of the views expressed in the Brookings report. These papers form the core of this book, which also contains an account of the conference discussions and concluding reflections by its Chairman, Sir Alec Cairncross, formerly Chief Economic Adviser to H.M. Government. Britain's Economic Prospects Reconsidered is neither a detailed critique of the Brookings Report nor a rejoinder to it, but rather an attempt to reassess British performance and policies in the light of experience since devaluation. Its central concern is the question of why economic growth in Britain since the war has been slower than in other countries. This book was first published in 1971.

Exile, Writer, Soldier, Spy Soledad Fox Maura, 2018-07-10 In this gripping, authoritative biography, Soledad Fox Maura reveals the tumultuous true-life story of the Oscar-nominated screenwriter responsible for *Z* and *The War Is Over*. A man of many faces, Jorge Semprún perfectly

personified the struggles and successes of twentieth-century Europe. Semprún enjoyed a privileged childhood as the grandson of Spanish prime minister, Antonio Maura, until his world was shattered by the political strife of the Spanish Civil War and he went into exile. Facing dangers rarely seen outside the action movies of Hollywood, Semprún adopted a resilient spirit and rebel's stance. He fought with the French Resistance in World War II and survived imprisonment at Buchenwald. After the war, he became an organizing member of the exiled Spanish communist party, maintaining the appearance of a normal civilian life while keeping one step ahead of Francisco Franco's secret police for years. Semprún later put his experiences on paper, becoming an internationally acclaimed author and screenwriter. In this skillfully crafted biography, Semprún's life reads as easily as the best thriller, and has the same addictive rush as watching an edge-of-your-seat mini-series.
