Peter Bauer, Jeff Foster

Web Cartography Ian Muehlenhaus, 2013-12-10 Web mapping technologies continue to evolve at an incredible pace. Technology is but one facet of web map creation, however. Map design, aesthetics, and user-interactivity are equally important for effective map communication. From interactivity to graphical user interface design, from symbolization choices to animation, and from layout to typeface and color selection, **Web Cartography** offers the first comprehensive overview and guide for designing beautiful and effective web maps for a variety of devices. Written for those with a basic understanding of mapmaking, but who may not have an in-depth knowledge of web design, this book explains how to create effective interaction, animation, and layouts for maps in online and mobile platforms. Concept-driven, this reference emphasizes cartographic principles for web and mobile map design over specific software techniques. It focuses on key design concepts that will remain true regardless of software technologies used. The book is supplemented with a website providing links to stellar web maps, video tutorials and lectures, do-it-yourself labs, map critique exercises, and links to others' tutorials. Approachable, clear, and concise, the book provides a nontechnical, approachable guide to

map design for the web. It provides best practices for map communication, based on spatial data visualization and graphic design theory. By carefully avoiding overly technical jargon, it provides a solid launching pad from which students, practitioners, and innovators can begin to design aesthetically pleasing and intuitive web maps.

Take Your Library Workshops Online! Anne Grant,Diana Finkle,2016-06-20 The ethos of every library is to serve and to instruct. Library professionals teach every day in the sense that they show patrons where to find books or how to use computers. Increasingly, however, library users just don't have the time to attend face-to-face workshops in advance of needs that they may have. They want to know the answer to their questions when THEY need it, not when YOU teach it. Take Your Library Workshops Online! will help you move valuable "teachable moments" from the physical library or classroom to virtual spaces. It features real-life examples of how to: create online synchronous sessions, brief tutorials, and pointed screen captures. Learning in the online environment can happen in a two-minute video or in a creative meme-like screen capture and can cover topics from logging in to a database to evaluating sources. Creating these learning objects

can take from less than one day up to a week depending on the time you have to devote to it and the level of detail required.
