Genetically Modified Diplomacy Peter Andr  e,2011-11-01 When genetically engineered seeds were first deployed in the Americas in the mid-1990s, the biotechnology industry and its partners envisaged a world in which their crops would be widely accepted as the food of the future. Critics, however, raised a variety of social, environmental, economic, and health concerns. This book traces the emergence of the 2000 Cartagena Protocol on Biosafety and the discourse of precaution toward GEOs that the protocol institutionalized internationally. Peter Andr  e explains this reversal in the common-sense understanding of genetic engineering, and discusses the new debates it has engendered.
