German Pronunciation and Phonology Jethro Bithell, 2018-10-29 First published in 1952. This book does not confine itself to German phonetics; it aims rather at showing by what processes and tricks of sound words have been shaped in the course of years; it is therefore a book on phonology as well. It should have a wide appeal to students of German. Moreover, since the treatment of laws and sound processes is comparative, it will be useful to students of other languages, particularly of the Scandinavian group and Dutch.

The Acquisition of Phonetic Details. Difficulties of the English Pronunciation for German Second Language Speakers and Teaching Suggestions Chiara Alina Sachwitz, 2021-11-08 Seminar paper from the year 2019 in the subject Didactics for the subject English - Pedagogy, Literature Studies, grade: 1,7, , language: English, abstract: Nowadays, it seems perfectly normal to many Germans using English words in daily conversations, however, on the level of pronunciation, it is common to stick to the German sound system. Yet, there are language learners who know about the different phonological patterns of the two languages. To understand the reasons why German second language learners face difficulties pronouncing English sounds, this term paper focuses on potential areas of concern. English words are placed into the context of the native language and are characterized by its foreign-sounding accent. This accent is defined as a which give information on a person's social background and indicate. At the same time, pronunciation itself while the pronunciation of individual sounds does not make a difference in meaning in the German language, it can have a distinctive function in the English language. Many language learners, however, are not aware of this contradiction between their first language and the target language and therefore, tend to pronounce English words incorrectly.

The German Accent in English Clara S., 2013-03-25 Seminar paper from the year 2009 in the subject English - Pedagogy, Didactics, Literature Studies, grade: 1,3, University of Freiburg, language: English, abstract: An accent almost always makes the conversation partner come to any sort of prejudgement of the speaker. It might sound unpleasant, as in the case of German accents from the view of some English speakers, or can lead to misunderstandings. Therefore, it is important for learners of English as a second language to pay attention to their pronunciation from the beginning. I will analyse which contrasts between English and German exist and further look into the most common mistakes of learners and misperceptions that lead to a characteristic German accent. We can assume that there are mispronunciations with different degrees of 'graveness', depending on the probability to cause misunderstandings. So in the following, I will turn to the question why pronunciation should not be neglected in teaching and what corrections language teachers should give priority to in the teaching of phonology. The chapter on teaching mainly refers to the teaching of German students in secondary schools. The assumptions can however be transferred onto other teaching situations. I will show that the teaching of pronunciation will always have to be adapted to the learners' individual language environment as this is bound to strongly influence their accent.

This book describes a methodology for transforming English spelling into a phonetically-based system. Using a single-sound-per-letter approach (as prescribed by Noah Webster) with minimal changes to the English alphabet, the result is a dramatic simplification of English spelling that will make it easier to learn reading and writing.

English-German Contrastive Phonetics and Phonology. A Study of Interviews and Speeches Aykut Sahingöz, 2020-03-23 Bachelor Thesis from the year 2019 in the subject Speech Science / Linguistics, grade: 2,7, University of Vechta, language: English, abstract: The linguistic differences between German and English are going to be researched and compared, in order to light upon the reasons for mispronunciations and difficulties for German speakers of English. Learning a language or a skill in general, naturally needs practice and commitment to be able to master it. However, this text is going to leave this aspect aside and will concentrate on differences which emerge from the languages themselves. German and English are two different languages with the same Latin alphabet and different grammar for the naked eye, but beneath the surface are further differences and similarities which can be described in order to understand why German speakers of English seem to produce the same mistakes when no practice for correct pronunciation is given. The importance of English has increased over the past years and is one of the most spoken and important languages. It is needed in business relations, to read manuals, can be used in almost all foreign countries for communication and is generally important for every working citizen in terms of a business language, as former European Commissioner Günther Oettinger stated in his interview with German broadcast channel SWR in 2005. In 2010 a speech of Oettinger was published, which was held in the Columbia University of Berlin and showed, after his contribution in the broadcast, that his English proficiency was not appropriate when considering the circumstances. Especially in terms of politics, an individual wants to be taken seriously and act superior in all tasks given to comply with the role of a representative politician. After Oettinger held his speech, it was naturally connected to what was originally said by him, with the obvious connotation that he failed to meet his own expectations in English acquisition by far, although it was of utmost imp
