Getting to "Got It!" Betty K. Garner,2007-11-15 It's one of the great mysteries of teaching: Why do some students get it and some students don't? In this book, Betty K. Garner focuses on why students struggle and what teachers can do to help them become self-directed learners. Difficulty reading, remembering, paying attention, or following directions are not the reasons students fail but symptoms of the true problem: underdeveloped cognitive structures—the mental processes necessary to connect new information with prior knowledge; organize information into patterns and relationships; formulate rules that make information processing automatic, fast, and predictable; and abstract generalizable principles that allow them to transfer and apply learning. Each chapter focuses on a key cognitive structure and uses real-life accounts to illustrate how learners construct meaning by using recognition, memorization, conservation of constancy, classification, spatial orientation, temporal orientation, and metaphorical thinking. The author's simple techniques stress reflective awareness and visualization. It's by helping students to be conscious of what their senses are telling them, encouraging them to visualize the information for processing, and then prompting them to ask questions and figure out solutions on their own that teachers can best help students develop the tools they need to * Gather, organize, and make sense of information, * Become cognitively engaged and internally motivated to achieve, and * Experience learning as a dynamic process of creating and changing. Suggestions for using these techniques in daily classroom practice, advice on lesson planning for cognitive engagement, and guidelines for conducting reflective research expand this book's practical applications. Use it not only to help struggling students break through hidden barriers but to empower all students with tools that will last a lifetime.

Execution Larry Bossidy,Ram Charan,Charles Burck,2009-11-10 #1 NEW YORK TIMES BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you’re running an entire company or in your first management job. “A must-read for anyone who cares about business.”—The New York Times When *Execution* was first published, it changed the way we did our jobs by focusing on the critical importance of “the discipline of execution”: the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future: • Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge. • Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management. • Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation. • Risk management will become a top priority for every leader. *Execution* gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. *Execution* shows how to link together people, strategy, and operations, the three core processes of every business. Leading these processes is the real job of running a business, not formulating a “vision” and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—*Execution* provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

The Magic of Cats Andrew Anderson,2023-04-28 Discover the Cat of the Night and the Cat of the Day. Over the centuries, the relationship between cats and humans has been one of profound change, of both darkness and light. In Ancient Egypt, we worshipped them as the physical embodiment of a goddess. In Medieval Europe, we tortured and punished them for being the familiars of witches. In the twenty-first century, we are obsessed with filming and posting their antics on social media. And while we may think of them as our pets, that doesn’t mean that we are in charge. Far from it. Cats know exactly how to get their humans to follow their orders! They have been an ongoing source of intrigue and mystery throughout human history. They are the stuff of myth and legend, as well as being our best friends. They sit among the stars and curl up on our laps. There is nothing so wonderful as the magic of cats.

Reflections Of An American Political Prisoner Michael O. Billington,2015-09-04 Michael Billington, the author of this autobiographical memoir, is one of a dozen individuals who were sent to prison in 1989 with America's foremost statesman, Lyndon H. LaRouche, Jr. Sentenced to 77 years by George Bush's “Get LaRouche Task Force,” he spent his imprisonment in study and writing--to bridge the divide between East and West. Empire is based upon the ancient principle of divide and rule; by clearing up misunderstandings among cultures, he was able to play a leading role in putting together the combination of forces today oriented around the BRICS (Brazil, Russia, India, China and South Africa) which have in large measure now adopted the “The New Silk Road” policies of LaRouche, EIR and the Schiller Institute for Hamiltonian scientific progress for the benefit of all mankind. Included in this book are 2 very important studies by Billington which every literate person should read to be able to understand Asia, China and the path to bring America into the win-win paradigm of a better future.
