Daniel Kraus

*Ghost Camera* Darcy Coates,2014 A small number of cameras have the ability to capture ghosts on film. This gift comes at a steep price; the ghosts are resentful and hungry, and the cameras offer them a rare chance to reach their favourite prey... humans. Jenine doesn't know any of this when she finds an abandoned Polaroid camera in a lighthouse. At first she assumes the ghostly shapes in the photos are a glitch or a prank - but then the spirits begin to hunt her down, and she's forced into a deadly race to free herself from the camera's curse.

**The Ghost That Ate Us** Daniel Kraus,2023-10-09 You remember the brutal crime, don't you? Maybe you read about it on Twitter. Maybe a friend sent you a news clip. Maybe you saw it on an episode of Spectral Journeys that night you were flipping through channels, unable to sleep. Maybe after reading the true story, you won't ever sleep again. On June 1, 2017, six people were killed at a Burger City franchise off I-80 near Jonny, Iowa. It was the bizarre and gruesome conclusion to nine months of alleged paranormal activity at the fast-food joint—events popularly known as “the Burger City Poltergeist.” The story inspired Facebook memes, Twitter hashtags, BuzzFeed listicles, Saturday Night Live sketches, and more. But the case was never much more than a punchline...until bestselling writer Daniel Kraus (The Shape of Water, The Living Dead) decided to head to Iowa to dig up what really happened. Presented here is the definitive story of “the most exhaustively documented haunting in history,” including—for the first time ever—interviews with every living survivor of the tragedy. The employees of Burger City were a family. They loved one another. At least, at the beginning. But love can make you do unspeakable things.

*Phantoms on Film - Real Ghosts Caught on Camera* Craig Hamilton-Parker,2015-03-31 Phantoms on Film is an intriguing collection of real ghost photographs and paranormal phenomena captured on camera. Bestselling author Craig Hamilton-Parker is an internationally recognized medium with TV shows on the BBC and programs around the world. With 40 years experiences as a medium communicating with the dead and an expert on photography and image analysis Craig uses his skills to sort the phantoms from the fakes. In this book he covers everything from never-before-seen Edwardian seance photographs, unfathomable ghost encounters, and some impossible to explain phenomena. He analyses orbs, strange lights, spirit extras, photos that predict the future, spirit lights and pictures of dead family appearing in images. Never before has there been such an extraordinary collection of unique pictures brought together in one book. These strange images are accompanied by the back story and an illuminating commentary by the world's leading expert on spirit photography.

**An Introduction to Quantum Optics** Yanhua Shih,2020-12-16 This book offers a complete revision for its introduction to the quantum theory of light, including notable developments as well as improvements in presentation of basic theory and concepts, with continued emphasis on experimental aspects. The author provides a thorough overview on basic methods of classical and quantum mechanical measurements in quantum optics, enabling readers to analyze, summarize, and resolve quantum optical problems. The broad coverage of concepts and tools and its practical, experimental emphasis set it apart from other available resources. New discussions of timely topics such as the concept of the photon and distinguishability bring the entire contents up to date. Key Features: Provides a complete update of a classic textbook for the field. Features many new topics, including optical coherence, coherent and incoherent imaging, turbulence-free interferometry. Includes new chapters for intensity fluctuation correlation and thermal light ghost imaging, and biphoton imaging. Offers a complete overhaul of the introductory theory to give a more coherent and thorough treatment. Expands on discussions of optical tests of quantum theory, Popper's experiment, Einstein's locality questions, and the delayed choice quantum eraser.

**Ida Lupino, Filmmaker** Phillip Sipiora,2021-07-15 Ida Lupino, Filmmaker begins with an exploration of biographical studies and analytical treatments of Lupino's film and television work as director, moving forward to assess Lupino's career in film and television with particular attention given to Lupino's singular, pioneering achievements and her role(s) within the cultural milieu(s) of her time, particularly the representation of women in cinema. Each chapter includes a close analysis of the film or television work with insights drawn from film history and cultural/gender studies to demonstrate that Lupino was a significant directorial figure in the development of film, especially in the late 1940s and early 1950s-and in television extending well into the 1960s. Lupino left her imprint on filmmaking and her canon of film and television work continue to influence Hollywood movie making. The contributors to this volume assess Lupino's main strengths as a filmmaker-her treatment of narrative movement, plotting, dialogue, gender roles, and uses of tradition representations of men and women in frames of parody and satire. The book collectively examines the successes (and failures) of Lupino's directorial career, including focusing on the reasons why she initially proved to be so strategic to the progress of women behind the camera.

[Ghost Photography 101](#) Fiona Broome,2011-09-26 Ghost photos... are they real? \* Is that orb just dust or pollen or fog? \* Is that vortex actually a piece of hair? \* Is that apparition really smoke? Chances are, the answer is no. Professional photographer (and paranormal researcher) Fiona Broome shows the results of over four years of experiments with a variety of cameras, testing the normal explanations for orbs, vortices, and eerie figures. Her conclusions...? She -- and many other experts -- have been wrong about anomalies: As the subtitle says, it's not just dust. Whether you're a believer or a skeptic, this book contains something to shock (or at least annoy) almost everyone who thought they understood ghost photos. Written for beginning and intermediate ghost hunters, this 180+ page book tells you: \* How to select a camera. \* What settings to use. \* Where to take photos. \* How to decide if they're really ghosts. However, even professionals will find some unsettling ideas and disturbing evidence in this book. Fiona invites you to try these same tests. Prove her wrong, if you can. You may never look at ghost photos the same way, again.

**Ghostly Photographs** Julie Griffin,2012-10-02 This phenomenal collection of photographs, coupled with the stories which illuminate each image, will enrich any reader's mind with deeply thought-provoking concepts. What Julie Griffin has captured on film is equally compelling and significant. It will prove to be an outstanding contribution to a supernatural conversation occurring worldwide. Andrea Perron, Author House of Darkness House of Light [www.houseofdarknesshouseoflight.com](http://www.houseofdarknesshouseoflight.com) ~ o ~ The spirit world is constantly around us; they don't wait until the middle of the night. I have photographed spirit energy as early as 11:30 in the morning, outdoors on a clear sunny day in May. Learn out about the full body apparitions that were captured indoors by the camera not once, but twice as they moved. My travels have taken me to the Lizzie Borden House, Gettysburg, Rolling Hills Asylum, Eastern State Penitentiary, an amazing haunted B&B in NY State, and many other places. These are the stories behind the photographs and what happened on the investigations. I have experienced objects physically moved by an unknown source, a frightened spirit rush out of a basement and pass through the right side of my body, plus a disembodied male voice whose comment was directed at me. And an unexpected message given by a Medium from a friend's late husband. I was told a list of many items to tell her about, including a broken gravy boat. So enjoy these real ghost encounters from the comfort of your favorite chair. They are ghost stories you can see with your own eyes.

*The Haunted Camera* Drac Von Stoller,2012-05-23 Delbert Gray was an amateur photographer with a hunger for fame. The camera Delbert used was a cheap Kodak Instamatic. You can see why Delbert dreamed of owning a Nikon like his rich friend Michael. Michael would let his friend Delbert develop his pictures in his dark room while he was developing his own. Delbert envied Michael's photographs and would often close his eyes and daydream

about being a famous photographer someday. Delbert was only fifteen years old. He wasn't old enough to get a job like his friend Michael and bring in a big paycheck. As Michael was puffing on his cigarette in the dark room developing his film beside Delbert, Michael would often make remarks about Delbert's photographs and tell him if he wanted to take pictures like him he needed to throw that cheap camera in the trash and buy one like his. Delbert replied with a lump in his throat You know I don't have a job and my parents wouldn't even consider buying me a camera such as yours. Michael replied, You know something Delbert, either you get a good quality camera or I'm going to ask you to stop developing your photographs in my dark room. Your photographs are pathetic. Delbert answered back in a sad tone of voice, That wasn't a very nice thing to say to your friend. I know, but it's the truth and sometimes the truth hurts, exclaimed Michael. Well let me tell you something Michael, I'm going to own a camera like yours someday and when I do you'll be jealous of me, said Delbert in a stern voice. Delbert took his Instamatic camera and photographs with him and told Michael he wouldn't be back to see him until he found that special camera. Michael just laughed and said to Delbert, Looks like I'll be in the old folks home when that happens. Delbert exited the dark room and slammed the door behind him, walked home, and threw his Instamatic camera at his bedroom wall. Delbert said, What have I done, now I don't have a camera. What am I going to do now? Delbert sat on his bed crying because he knew he had no way of replacing the Instamatic camera he had just broken. Delbert made up a story about how the camera broke, but his father just laughed and said, Are you out of your mind? You'll be able to get a job in about a year then you can buy yourself a new camera. Delbert's father turned away and told Delbert he didn't want to hear any whining about how I should buy him a new camera. Delbert yelled at his father saying, But Dad it was an accident. Delbert's father turned back around and kicked him in his rear end and slammed the door behind him. Delbert lay down on his bed and cried his eyes out the rest of the night. Morning came and Delbert wiped the remaining tears from his cheeks. Delbert took a deep breath and said a prayer. Delbert decided instead of lying in bed all day sulking about why his friend Michael would be saying I told you so. Delbert got dressed and grabbed an apple from the kitchen and a soda headed down the road on foot in search of that special camera. As Delbert was walking around the town square he came across an Antique shop that had an old bellows camera in the display window. Delbert said to himself, If I could just have that camera I bet it would take better pictures than Michael's. Delbert slumped over with tears again flowing down his cheeks knowing in reality there was no way he could afford such a beautiful camera. Just as Delbert was walking past the Antique shop, an old man opened the door came up to Delbert, and said, I noticed you were looking at that old camera in the window as if it belonged to you. Delbert answered, Yes, Sir, I was only wishing. I knew in my heart I could not afford such a beautiful camera. Besides, I don't even have a job or any money to give you and my father told me the only way I could buy a new camera was to get a job next year. By that time your camera would be gone and I would be heartbroken once more. Well, I better be on my way, because if I don't get home soon my dad is going to whoop me. Not so fast!" the old man said in a tender voice. I've never had anyone come by my shop and want any of my antiques like you have. I tell you what if you want the camera it's yours to keep. Don't worry about the money your money is no good to me. There's only one condition. Bring me a copy of the photos you take. I have a scrapbook that I would like to place them in. That's all I ask of you. What do you say? Delbert answered back eagerly, Yes, Sir, Delbert started crying because his prayer had been answered.

**Video Processing and Computational Video** Daniel Cremers,Marcus Magnor,Martin R. Oswald,Lihi Zelnik-Manor,2011-10-13 With the swift development of video imaging technology and the drastic improvements in CPU speed and memory, both video processing and computational video are becoming more and more popular. Similar to the digital revolution in photography of fifteen years ago, today digital methods are revolutionizing the way television and movies are being made. With the advent of professional digital movie cameras, digital projector technology for movie theaters, and 3D movies, the movie and television production pipeline is turning all-digital, opening up numerous new opportunities for the way dynamic scenes are acquired, video footage can be edited, and visual media may be experienced. This state-of-the-art survey provides a compilation of selected articles resulting from a workshop on Video Processing and Computational Video, held at Dagstuhl Castle, Germany, in October 2010. The seminar brought together junior and senior researchers from computer vision, computer graphics, and image communication, both from academia and industry, to address the challenges in computational video. During this workshop, 43 researchers from all over the world discussed the state of the art, contemporary challenges, and future research in imaging, processing, analyzing, modeling, and rendering of real-world, dynamic scenes. The 8 thoroughly revised papers presented were carefully reviewed and selected from more than 30 lectures given at the seminar. The articles give a good overview of the field of computational video and video processing with a special focus on computational photography, video-based rendering, and 3D video.

**Particle Image Velocimetry** Ronald J. Adrian,Jerry Westerweel,2011 Particle image velocimetry, or PIV, refers to a class of methods used in experimental fluid mechanics to determine instantaneous fields of the vector velocity by measuring the displacements of numerous fine particles that accurately follow the motion of the fluid. Although the concept of measuring particle displacements is simple in essence, the factors that need to be addressed to design and implement PIV systems that achieve reliable, accurate, and fast measurements and to interpret the results are surprisingly numerous. The aim of this book is to analyze and explain them comprehensively.

**How to Photograph the Paranormal** Leonore Sweet,2004-12-08 A Must-Have Guide for Investigating the ParanormalHave inexplicable spheres and fogs ever ruined any of your photographs? If you discarded them, thinking dirt on the lens or camera glitches were to blame, you may want to retrieve them and reconsider. These spheres and fogs may be paranormal light forms. Light forms are mentioned in literature on angels, aliens, UFOs, ghosts, crop circles, near-death experiences, inter-dimensional beings, magick, and thought forms. Hypnotized subjects describe the lights as the forms we become between lives on Earth.This entertaining book examines the many theories about what these energies may be and presents evidence throughout history that confirms their existence.Starting out as a novice photographer, the author captured the apparent spirit of her sister's dog. That began her great adventure into researching orbs, vortexes, and ectoplasms that are appearing in pictures worldwide. In this book, you will learn as she did how, when, and where to photograph and interact with these intelligent life forms.How to Photograph the Paranormal has something for everyone--from the simply curious to ghost hunters and paranormal researchers. The book features dozens of original paranormal photographs--many in full color.Mysterious lights evidently have been with us all along but they are now making extra efforts to reveal themselves to humanity. This book is an eye-opening glimpse into their world.

**Ghost Investigator Volume 2** Linda Zimmermann,2002 The latest volume in Ghost Investigator Linda Zimmermann's series of actual cases of haunted locations. Volume 2 includes spine-tingling accounts of the ghosts in Lizzie Borden's house, Eastern State Penitentiary in Philadelphia, Gettysburg battlefield and several private homes in New York.

**Computer Vision - ECCV 2008** David Forsyth,Philip Torr,Andrew Zisserman,2008-10-11 Welcome to the 2008EuropeanConference onComputer Vision. These proceedings are the result of a great deal of hard work by many people. To produce them, a total of 871 papers were reviewed. Forty were selected for oral presentation and 203 were selected for poster presentation, yielding acceptance rates of 4.6% for oral, 23.3% for poster, and 27.9% in total. Weappliedthreeprinciples.First,sincewehadastronggroupofAreaChairs, the final decisions to accept or reject a paper rested with the Area Chair, who wouldbeinformedbyreviewsandcouldactonlyinconsensuswithanotherArea Chair. Second, we felt that authors were entitled to a summary that explained how the Area Chair reached a decision for a paper. Third, we were very careful to avoid conflicts of interest. Each paper was assigned to an Area Chair by the

Program Chairs, and each Area Chair received a pool of about 25 papers. The Area Chairs then identified and ranked appropriate reviewers for each paper in their pool, and a constrained optimization allocated three reviewers to each paper. We are very proud that every paper received at least three reviews. At this point, authors were able to respond to reviews. The Area Chairs then needed to reach a decision. We used a series of procedures to ensure careful review and to avoid conflicts of interest. Program Chairs did not submit papers. The Area Chairs were divided into three groups so that no Area Chair in the group was in conflict with any paper assigned to any Area Chair in the group.

**Evolutionary Design and Manufacture** I.C. Parmee, 2012-12-06 The fourth evolutionary/adaptive computing conference at the University of Plymouth again explores the utility of various evolutionary/adaptive search algorithms and complementary computational intelligence techniques within design and manufacturing. The content of the following chapters represents a selection of the diverse set of papers presented at the conference that relate to both engineering design and also to more general design areas. This expansion has been the result of a conscious effort to recognise generic problem areas and complementary research across a wide range of design and manufacture activity. There has been a major increase in both research into and utilisation of evolutionary and adaptive systems within the last two years. This is reflected in the establishment of major annual joint US genetic and evolutionary computing conferences and the introduction of a large number of events relating to the application of these technologies in specific fields. The Plymouth conference remains a long-standing event both as ACDM and as the earlier ACEDC series. The conference maintains its policy of single stream presentation and associated poster and demonstrator sessions. The event retains the support of several UK Engineering Institutions and is now recognised by the International Society for Genetic and Evolutionary Computation as a mainstream event. It continues to attract an international audience of leading researchers and practitioners in the field.

*How to Survive Being in a Shakespeare Play (virtual version)* Don Zolidis, 2020-01-01 Some day it's going to happen: You're going to find yourself on stage, wearing tights, and saying things in iambic pentameter. Face it, you're in a Shakespeare play, and that means it's a pretty good bet you're going to DIE. The Bard is out for blood, but this play is here to stop him! How could Romeo and Juliet survive? Julius Caesar? A nameless soldier in Henry the Fifth? What if King Lear had an emotional support llama and didn't need to make terrible mistakes? Join us in discovering how a dozen of Shakespeare's plays could've turned out differently! If only they listened... (If you loved 10 Ways to Survive the Zombie Apocalypse, read this guide immediately.) A live stage version of the play is also available. Comedy One-act. 30-60 minutes (Length of the play: This show is approximately one hour long. To cut it into a shorter one-act, simply remove one or more of the sections.) 10-50+ actors, gender flexible

**The GHOST Group 2** Dawn Colclasure, 2019-10-10 There's something different about Sarah Town. It's brimming with ghosts—and some of those ghosts need help! That's where the GHOST Group comes in—the Ghost Helpers of Sarah Town. The GHOST Group is made up of five 11-year-old team members: Jesse, Jenny, Ryan, Trent, and Cassie. The Ghost of the Irish Setter is a “ghost dog” story where team member Jesse must come to terms with losing his dog, Lolly, after she ran away. A ghost dog that is an Irish setter seeks Jesse's help, but when the rest of the GHOST Group join the case, it becomes a matter of life or death after Cassie and Ryan are kidnapped! Can the GHOST Group help the ghost dog? And can Jesse find out what really happened to Lolly? In The Ghost of the Missing Hiker, a day of April Fool's hijinks turn into another mystery for the GHOST Group. Meanwhile, the group's helper ghost, Adam, has some bad news for the team, and Jenny realizes she must accept her special gift and learn how to use it so she can help other ghosts in Sarah Town.

*Ghostly Evidence* Kelly Milner Halls, 2014-10-01 It's late at night, and you're on a tour of a so-called haunted house. You see something out of the corner of your eye and quickly snap a photo. Your hands tremble as you lower the camera. Your eyes widen as you stare at the image you've just captured. A face seems to be lurking in the background. But when you look up, there's no one standing there! Was it a ghost? Ghost sightings are reported all the time. Many are easily explained. Others are harder to dismiss. But is there any proof? To find out, Kelly Milner Halls explored haunted houses. She examined photographs and investigated eyewitness accounts from ghost hunters, mediums, and paranormal experts. What's the verdict? Are the spirits of the dead wandering among us? Explore her findings and decide for yourself.
