Gettysburg Unearthed: John G. Sabol Jr., 2007-09-27 This book is the third in a series of anthropological studies which analyze ghosts and haunting phenomena in their cultural context. A history of visitations to the Gettysburg landscape is linked to the presence or absence of anomalous sensory manifestations. The preliminary analysis of the data suggests that the hauntings at Gettysburg may be a product of sociocultural factors, in part related to the growth of heritage tourism, rather than any ghostly manifestations by civil war soldiers. Since this is a preliminary analysis, a research design is proposed to further excavate the Gettysburg landscape. This approach is based on the use of ethnographic context, spatial symmetry, cultural relativity, and performance-based investigative practices. The author proposes that through this methodology, a controlled excavation of the landscape can be made, thus unearthing a more scientific analysis and evaluation of Gettysburg as a haunted cultural place.

Using things you probably already own like a camcorder, computer, or tape recorder, you can contact departed loved ones or other spirits, record their images and voices, and establish two-way communications between the worlds. The more traditional methods of seance, trance, and scrying are also detailed. Best of all, you don't have to be a techie or an occultist to use any of these techniques--they are written so any ordinary person can simply choose whatever technique feels best.
