A Brief Guide to Ghost Hunting Leo Ruickbie, 2013-08-15 There has been an upsurge in books, television programmes, films and websites exploring the reality or otherwise of the spirit world. Not since the founding of The Ghost Club in 1862 and the Society for Psychical Research in 1882 has ghost hunting been so popular. Television and the internet, in particular, have fueled this new level of interest, creating a modern media phenomenon that spans the globe. But while the demand for information is high, good information remains scarce. *A Brief Guide to Ghost Hunting* leads us through the process of ghost hunting, from initially weighing the first report, to choosing equipment, and investigating and identifying the phenomena, with an analysis of the best places to go looking, methods of contacting the spirit world, how to explain paranormal activity and, crucially, how to survive the encounter. However, it is also a book about ghost hunting itself, drawing on 130 years of research in the cavernous archives of the Society for Psychical Research and even older history to find the earliest ghost stories. *A Ghost Hunting Survey* makes use of interviews with those billing themselves as ghost hunters to find out their views, motivations and experiences. New and original research makes use of statistics to map the nebulous world of apparitions while a *Preliminary Survey of Hauntings* offers an analysis of 923 reported phenomena from 263 locations across the UK. This is, as far as possible, an objective presentation of ghosts and ghost hunting. It is no wonder that mainstream science largely refuses to deal with the subject: it is too complicated. Without trying to convince you of any viewpoint, this book is intended to help you understand more.

The Ghost of Madame Curie James Piazza, 2022-06-29 James Piazza is a Western New York-based archivist and music historian. He developed a series of multimedia presentations on experimental music, ambient sound, archival techniques for digital audio, and lectures on personal media servers for large file libraries. His primary goal is to create a greater public understanding and awareness of 20th century music and sound. Piazza founded Innerspace Labs as an independent music archive chiefly communicating with the public via The Innerspace Connection music blog. He manages a library of over 300,000 soundworks focusing on ambient and experimental recordings. This book comprises the first 12 years of our publications showcasing highlights of the Archive, as well as select previously unpublished works.

Airborne Pulsed Doppler Radar Guy V. Morris, 1988 Presents the basic principles of pulse-doppler radar without resorting to a heavily mathematical treatment. High-, medium-, and low-pulse repetition frequency (PRF) modes are explained and the advantages and disadvantages of each are discussed. Also included are an explanation of the major signal-processing functions of doppler filtering, pulse compression, tracking, synthetic aperture, selection of medium PRFs, and resolving range ambiguities and a discussion of how to predict the performance of a pulse-doppler radar in the presence of noise and clutter. Advanced Microsystems for Automotive Applications 2005 Jürgen Valldorf, Wolfgang Gessner, 2005-03-17 Since 1995 the annual international forum on Advanced Microsystems for Automotive Applications (AMAA) has been held in Berlin. The event offers a unique opportunity for microsystems component developers, system suppliers and car manufacturers to show and to discuss competing technological approaches of microsystems based solutions in vehicles. The book accompanying the event has demonstrated to be an efficient instrument for the diffusion of new concepts and technology results. The present volume including the papers of the AMAA 2005 gives an overview on the state-of-the-art and outlines imminent and mid-term R&D perspectives. The 2005 publication reflects – as in the past – the current state of discussions within industry. More than the previous publications, the AMAA 2005 goes back to the technological requirements and indispensable developments for fulfilling the market needs. The large part of contributions dealing with sensors as well as sensor technologies and data fusion is exemplary for this tendency. In this context a paradigm shift can be stated. In the past the development focused predominantly on the detection and processing of single parameters originating from single sensors. Today, the challenge increasingly consists in getting information of complex situations with a series of variables from different sensors and in evaluating this information. Smart integrated devices using the information deriving from the

various sensor sources will be able to describe and assess a traffic situation or behaviour much faster and more reliable than a human being might be able to do. Additional information is available on www.amaa.de

The Environmental Legacy of Military Operations Judy Ehlen, Russell S. Harmon, 2001-01-01 U.S. military lands are part of the public trust and the level of awareness of sustainability and land-use issues has risen significantly in recent years. Ehlen (U.S. Army Engineer Research and Development Center) and Harmon (U.S. Army Research Office) present 14 articles that look at the use of engineering geology principles and their applications to both military operations and environmental issues, although military operations and the environment are not always treated together. Topics include battlefield terrain evaluation, predicting fracture systems in enemy underground facilities, the geoenvironmental legacy of the Rock of Gibraltar military engineering, and erosion trends at Fort Leonard Wood. Proceedings, Seventh AFCRL Scientific Balloon Symposium George F. Nolan, 1973 The report contains the papers presented at the Seventh AFCRL Scientific Balloon Symposium held in September 1972. The papers were presented in three sessions: Tethered and powered balloons, balloon-borne experiments, and instrumentation and balloon technology. In the area of tethered balloons, papers were presented on cables, drag and stability characteristics, hull design and analysis, and the results of scientific experiments using tethered balloons as sensor platforms. Papers were presented on a powered spherical balloon and a survey of possible power sources for use by this system. Presentations during the balloon-borne experiments and instrumentation session included manned balloon flights, precision pointing and control platforms and instrumentation, recovery parachute performance, gondola motion analyses, a balloon radar altimeter, and an overview of French scientific ballooning activities. During the balloon technology session a review was made of the flight results and performance of balloons with volumes in excess of 20 million cubic feet, shape and stress analysis of both nonreinforced and reinforced materials, and fabric tinting to increase solar absorptivity.

Haunted Charleston Sara Pitzer, 2023-07-01 Things that go bump in the night, disembodied voices, footsteps in an empty stairwell, an icy hand on your shoulder ... let your imagination run wild as you read about Charleston's most extraordinary apparitions, sinister spooks, and bizarre beasts. You may know of the pirates hung at Battery Point, but perhaps you haven't heard about: Provost Dungeon, considered one of the worst American prisons of all time for its torturous punishments and is incredibly active with ghostly happenings; The Woman in Black at Poogan's Porch restaurant, an apparition that makes her presence known to employees and patrons alike; and The USS Yorktown, permanently docked in Charleston Harbor and brimming with tales of tragedies and hauntings.

Radar in Meteorology David Atlas, 2015-03-30 This fully illustrated volume covers the history of radar meteorology, deals with the issues in the field from both the operational and the scientific viewpoint, and looks ahead to future issues and how they will affect the current atmosphere. With over 200 contributors, the volume is a product of the entire community and represents an unprecedented compendium of knowledge in the field.
