Ghost Detectors Volume 1 Dotti Enderle,2013-09-03 Malcom and Dandy are best friends. But these two boys aren't your average ten-year-olds. When the boys get their hands on an Ecto-Handheld-Automatic-Heat-Sensitive-Laser-Enhanced Specter Detector, their adventures as Ghost Detectors begin. In this first volume of three stories, Malcom and Dandy thwart a practical-joking poltergeist, rid the Miller house of a ghost, and get to the bottom of some unusual paranormal activity in their elementary school. *Sensing Spirits* Marc A. Eaton,2020-10-15 Based on ethnographic research, this book examines the paranormal investigation subculture in the US. Presenting interviews with investigators as well as extensive field observations, it explores their reasons for getting involved, their use of different investigative methods, the interpretive processes by which they individually and collectively 'sense' spirits, the ways in which these processes are influenced by small group power dynamics, and what paranormal investigation ultimately means to those who participate. While focusing on the practices by which investigators 'sense' spirits in small groups, the author also situates paranormal investigation within a broader cultural context and attends to how investigators attempt to legitimize their practice despite being marginalized by both science and religion. A fascinating study of ghosts as an inherently social phenomenon, Sensing Spirits will appeal to sociologists with interests in ethnography, interactionism, cultural studies and subcultures.

Paranormal Technology David M. Rountree,2010-08-26 Paranormal Technology is the first book to provide a scientific method for ghost hunting, which includes in-depth explanations of what the collected data means. Paranormal Technology offers new techniques, answers questions, and provides experiments, which will help bridge the gap between the paranormal and science. Written in everyday language, it offers keen insights into the nature of paranormal phenomena, the protocols required for collecting evidence that will stand up to scientific scrutiny, and the possible theories that may explain the source of Ghosts. Currently employed test equipment is examined and proper use is covered in great detail. Paranormal Technology is an indispensable aid to any scientific researcher or ghost hunting group, whether you are a beginner, or with many years of experience. This book is not a means to an end, but rather, an invitation to a fresh beginning.

In this short-story anthology, thirteen real-life experiences with the paranormal have been collected. The stories in this book contain tales about ouija boards, an Indigo child who could see the dead, Bigfoot roaming the Boundary Waters, an archangel delivering presents, and the ghosts that haunt hospitals and prisons. Each story in this collection was told to the author by the people who experienced the event, or by a member of that person's family. Every family has metaphorical ghosts. Some even have real ones.
