Night Photography Lance Keimig, 2012-10-02 Night photographers have one big thing in common: a true love of the dark. Rather than looking at night photography as an extension of daytime shooting with added complications, they embrace the unique challenges of nocturnal photography for the tremendous wealth of creative opportunities it offers. That's just what this book does. But if the idea of setting out into the deep, dark night with just your camera (and maybe a cup of coffee) gets your creative juices flowing, dive right in. Lance Keimig, one of the premier experts on night photography, has put together a comprehensive reference that will show you ways to capture images you never thought possible. If you have some experience with photography and have always wanted to try shooting at night, you'll learn the basics for film or digital shooting. If you're already a seasoned pro, you'll learn to use sophisticated

techniques such as light painting and drawing, stacking images to create long star trails, and more. A chapter on the history of night photography describes the materials and processes that made night photography possible, and introduces the photographers who have defined night photography as an artistic medium. A chapter on how to use popular software packages such as Lightroom and Photoshop specifically with night time shots shows you how to make the final adjustments to your nocturnal creations. In this book you'll find history, theory, and lots of practical instruction on technique, all illustrated with clear, concise examples, diagrams and charts that reinforce the text, and inspiring color and black and white images from the author and other luminaries in the field, including Scott Martin, Dan Burkholder, Tom Paiva, Troy Paiva, Christian Waeber, Jens Warnecke and Cenci Goepel, with Foreword by Steve Harper.

Paranormal Media Annette Hill, 2010-11-05 The paranormal has gone mainstream. Beliefs are on the rise, with almost half of the British population, and two thirds of Americans, claiming to believe in extra sensory perceptions and hauntings. Psychic magazines like *Spirit*

and Destiny, television shows such as Fringe, Ghost Whisperer and Most Haunted, ghost-cams and e-poltergeists, bestselling books on mind, body and spirit, and magicians like Derren Brown have moved from the outer limits to the centre of popular culture, turning paranormal beliefs and scepticism into revenue streams. Paranormal Media offers a unique, timely exploration of the extraordinary, unexplained and supernatural in popular culture, looking in unusual places in order to understand this phenomenon. Early spirit forms such as magic lantern shows or the spirit photograph are re-imagined as a search for extraordinary experiences in reality TV, ghost tourism, and live shows. Through a popular cultural ethnography, and critical analysis in social and cultural theory, this ground-breaking book by Annette Hill presents an original and rigorous examination of people's experiences of spirits and magic. In popular culture, people are players in an orchestral movement about what happens to us when we die. In a very real sense the audience is the show. This book is the story of audiences and their participation in a show about matters of life and death. Paranormal Media will be a highly interesting read for undergraduate and postgraduate students, as well as academics, on a wide range of television, media, cultural studies, and sociology courses.

Encyclopedia of the Undead Bob Curran, 2009-03-19 What lurks out there in the fog? What was that eerie sound in the dead of night? What flitted by at the end of the street, just beyond the farthest street lamp? From earliest times, tales of the restless dead and their fellow travelers have terrified mankind. Whether around a remote campfire or in the middle of a bustling city, the unquiet spirits and attendant creatures that have tormented humanity since the prehistoric darkness haven't gone away—they still have the power to strike fear in our hearts. Encyclopedia of the Undead traces those shadowy

entities—vampires, werewolves, ghouls and monsters—that lurk just outside the range of human vision and inhabit our most frightening tales. Drawing on a wide range of beliefs and literature, it traces these horrors from their earliest recorded inceptions and charts their impact upon the human psyche. In this book, history and terror mix to create the things that lurk in the darkest corners of our minds. You'll find detailed descriptions of terrors from all over the world—from the mist-shrouded mountains of Eastern Europe to the sweltering jungles of the Caribbean islands, from the dark, stone-lined tombs of the uncoffined dead beneath the remote New England hills to the dark magics that lurk beneath the thriving, colorful surface of a city like New Orleans. In addition to the more conventional creatures, *Encyclopedia of the Undead* also details some of the more obscure Things that gnaw at the edges of men's minds—Incubi and Succubi, the Mara, and the dark legends that have influenced writers from Sheridan Le Fanu to H.P. Lovecraft. This is a book for all those who are interested in the darker side of the human mind—the side that examines and even embraces those beliefs and imaginings that form the basis of our most archetypical fears. This is the book for those brave enough to plumb the depths of our worst nightmares!

Ghostly Matters Avery F. Gordon, 2008-02-29 “Avery Gordon’s stunningly original and provocatively imaginative book explores the connections linking horror, history, and haunting. ” —George Lipsitz “The text is of great value to anyone working on issues pertaining to the fantastic and the uncanny.” —American Studies International “*Ghostly Matters* immediately establishes Avery Gordon as a leader among her generation of social and cultural theorists in all fields. The sheer beauty of her language enhances an intellectual brilliance so daunting that some readers will mark the day they first read this

book. One must go back many more years than most of us can remember to find a more important book.” —Charles Lemert Drawing on a range of sources, including the fiction of Toni Morrison and Luisa Valenzuela (*He Who Searches*), Avery Gordon demonstrates that past or haunting social forces control present life in different and more complicated ways than most social analysts presume. Written with a power to match its subject, *Ghostly Matters* has advanced the way we look at the complex intersections of race, gender, and class as they traverse our lives in sharp relief and shadowy manifestations. Avery F. Gordon is professor of sociology at the University of California, Santa Barbara. Janice Radway is professor of literature at Duke University.

Reality TV Annette Hill, 2014-11-13 Reality TV is popular entertainment. And yet a common way to start a conversation about it is ‘I wouldn’t want anyone to know this but...’ Why do people love and love to hate reality TV? This book explores reality TV in all its forms - from competitive talent shows to reality soaps - examining a range of programmes from the mundane to those that revel in the spectacle of excess. Annette Hill’s research draws on interviews with television producers on the market of reality TV and audience research with over fifteen thousand participants during a fifteen year period. Key themes in the book include the phenomenon of reality TV as a new kind of inter-generic space; the rise of reality

entertainment formats and producer intervention; audiences, fans and anti-fans; the spectacle of reality and sports entertainment; and the ways real people and celebrities perform themselves in cross-media content. Reality TV explores how this form of popular entertainment invites audiences to riff on reality, to debate and reject reality claims, making it ideal for students of media and cultural studies seeking a broader understanding of how media connects with trends in society and culture.

The Strange Case of William Mumler, Spirit Photographer Louis Kaplan, 2008 In the 1860s, William Mumler photographed ghosts or so he claimed. Faint images of the dearly departed lurked in the background with the living, like his well-known photo of the recently assassinated Abraham Lincoln comforting Mary Todd. The practice came to be known as spirit photography, and some believed Mumler was channeling the dead. Skeptics, however, called it a fraudulent trick on the gullible, taking advantage of the grieving at a time of suffering and loss. Mumler's insistence that his work brought back the dead led to a sensational trial in 1869 that was the talk of the nation.

Television Raymond Williams, 2004-06-01 Television: Technology and Cultural Form was first published in 1974, long before the dawn of multi-channel TV, or the reality and celebrity shows that now pack the schedules. Yet Williams' analysis of television's history, its institutions, programmes and practices, and its future prospects, remains remarkably prescient. Williams stresses the importance of technology in shaping the cultural form of television, while always resisting the determinism of McLuhan's dictum that 'the medium is the message'. If the medium really is the message, Williams asks, what is left for us to do or say? Williams argues that, on the contrary,

we as viewers have the power to disturb, disrupt and to distract the otherwise cold logic of history and technology - not just because television is part of the fabric of our daily lives, but because new technologies continue to offer opportunities, momentarily outside the sway of transnational corporations or the grasp of media moguls, for new forms of self and political expression.

The Psychology of Paranormal Belief Harvey Irwin, 2009-09-01

With a thorough and systematic review of investigations into the bases of belief in paranormal phenomena, this discussion explores the four main theoretical approaches relating to the nature of such beliefs. Objective and well-researched, this account addresses different points of view on the topic--while some commentators depict paranormal believers as foolish, others propose that paranormal beliefs must be understood as necessities that serve certain psychodynamic needs. The foundations and shortcomings of each approach are also documented, and a new comprehensive theory attempts to explain the development of scientifically unsubstantiated beliefs.

TV Living David Gauntlett, Annette Hill, 2002-01-04 *TV Living* presents the findings of the BFI Audience Tracking Study in which 500 participants completed detailed questionnaire-diaries on their lives, their television watching, and the relationship between the two over a five year period. Gauntlett and Hill use this extensive data to explore some of the most fundamental questions in media and cultural studies, focusing on issues of gender, identity, the impact of new technologies, and life changes. Opening up new areas of debate, the study sheds new light on audiences and their responses to issues such as sex and violence on television. A unique study of contemporary tv audience behaviour and attitudes, *TV Living* offers a fascinating insight into the complex relationship between mass media and

people's lives today.

Science in the New Age David J. Hess, 1993 Hess examines the arguments of people who accept the paranormal as part of a spiritual quest, parapsychologists who are seeking scientific explanations for a narrow range of paranormal phenomena, and skeptics who pooh-pooh the very notion. He finds that, despite their disagreements, they are forging a shared culture. Written for the nonspecialist. Paper edition (unseen), \$17.95. Annotation copyright by Book News, Inc., Portland, OR
