Heartstream Tom Pollock, 2019-07 I just wanted to see you. Before the end. A taut psychological thriller about obsession, fame and betrayal, for fans of Black Mirror. Cat is in love. Always the sensible one, she can't believe that she's actually dating, not to mention dating a star. But the fandom can't know. They would eat her alive. And first at the buffet would definitely be her best friend, Evie. Amy uses Heartstream, a social media app that allows others to feel your emotions. She broadcasted every moment of her mother's degenerative illness, and her grief following her death. It's the realest, rawest reality TV imaginable. But on the day of Amy's mother's funeral, Amy finds a strange woman in her kitchen. She's rigged herself and the house with explosives – and she's been waiting to talk to Amy for a long time. Who is she? A crazed fan? What does she want? Amy and Cat are about to discover how far true obsession can go.

Computational Materials Discovery Artem Oganov, Gabriele Saleh, Alexander Kvashnin, 2018-10-30 New technologies are made possible by new materials, and until recently new materials could only be discovered experimentally. Recent advances in solving the crystal structure prediction problem means that the computational design of materials is now a reality. Computational Materials Discovery provides a comprehensive review of this field covering different computational methodologies as well as specific applications of materials design. The book starts by illustrating how and why first-principle calculations have gained importance in the process of materials discovery. The book is then split into three sections, the first exploring different approaches and ideas including crystal structure prediction from evolutionary approaches, data mining methods and applications of machine learning. Section two then looks at examples of designing specific functional materials with special technological relevance for example photovoltaic materials, superconducting materials, topological insulators and thermoelectric materials. The final section considers recent developments in creating low-dimensional materials. With contributions from pioneers and leaders in the field, this unique and timely book provides a convenient entry point for graduate students, researchers and industrial scientists on both the methodologies and applications of the computational design of materials.

Fortress Besieged (New Directions Classic) Qian Zhongshu, 2004-02-17 The greatest Chinese novel of the twentieth century, *Fortress Besieged* is a classic of world literature, a masterpiece of parodic fiction that plays with Western literary traditions, philosophy, and middle-class Chinese society in the Republican era. Set on the eve of the Sino-Japanese War, our hapless hero Fang Hung-chien (à la Emma Bovary), with no particular goal in life and with a bogus degree from a fake American university in hand, returns home to Shanghai. On the French liner home, he meets two Chinese beauties, Miss Su and Miss Pao. Qian writes, With Miss Pao it wasn't a matter of heart or soul. She hadn't any change of heart, since she didn't have a heart. In a sort of painful comedy, Fang obtains a teaching post at a newly established university where the effete pseudo-intellectuals he encounters in academia become the butt of Qian's merciless satire. Soon Fang is trapped into a marriage of Nabokovian proportions of distress and absurdity. Recalling Fielding's *Tom Jones* in its farcical litany of misadventures and Flaubert's

style indirect libre, Fortress Besieged is its own unique feast of delights.
