Smart Card Application Development Using Java Uwe Hansmann, Martin S. Nicklous, Thomas Schäck, Frank Seliger, 2012-12-06 In today's world, smart cards play an increasingly important role in everyday life. We encounter them as credit cards, loyalty cards, electronic purses, health cards, and as secure tokens for authentication or digital signature. Their small size and the compatibility of their form with the magnetic stripe card make them the ideal carriers of personal information such as secret keys, passwords, customization profiles, and medical emergency information. This book provides a guide for the rapid development of smart card applications using Java and the OpenCard Framework. It gives you the basic information you need about smart cards and how they work. It shows in detail how to develop applications that use smart cards by guiding you through examples step by step. A smart card provided along with the book will help you to quickly get some first hands-on experience. Das Buch bietet erstmals einen Leitfaden zur Entwicklung von Smartcard-Anwendungen mit Java (JDK ab

Version 1.1.6) und OCF 1.1.1 auf dem Computer, sowie zur Entwicklung von Java Applets, die direkt auf einer Karte (Java Card) ausgeführt werden. Der erste Teil führt konzipiert in Grundlagen, Technologie und Anwendungsmöglichkeiten von Smartcard ein. Im zweiten Teil werden Ziel, Konzept, Architektur und Komponenten des OpenCard Framework detailliert beschrieben. Der dritte Teil demonstriert anhand einfacher Beispiele Aufbau und Design komplexer Anwendungen für den Karten- und den Host-Teil. Mit der beiliegenden Multi Function Card lassen sich die beschriebenen Beispiele leicht ausführen und weiterentwickeln.

E-Learning and Business Plans Elaina Norlin,Tiffini

Travis,2008-07-25 With the invention of desktop computers, electronic learning or e-learning has become a convenient learning tool of choice for individuals with busy schedules. For the past several years, there has been a continuous stream of much needed innovation in the use of e-learning and these have now become second nature to both e-learning providers and users. But just as e-learning has enhanced and enriched our lives, challenges have increased as the creation of courses and e-learning material evolve. Technology, although it makes our lives easier, can come with a 'not so affordable' price tag. As creators of e-learning content, after raising money to provide a costly e-learning initiative, how do we know if our customers or target audience are really learning? Who is going to maintain the technology? Who will subsidize the upkeep costs? How do we know if there is a better product on the horizon that can do it more cheaply and with more advanced technology infrastructure? **E-learning and Business Plans: National and International Case Studies** provides a comprehensive view on how to develop non-profit

business plans for both small and large-scale e-learning projects. Editors Tiffini Travis and Elaina Norlin present both national and international case studies covering many elements of a typical non-profit business plan and reveal the experiences individuals have had while developing their project. This book will be useful to professionals, non-profit organizations, and academic researchers who are currently considering working on large-scale e-learning or high cost/high risk projects. While many issues are library-related, the book is relevant to non-librarians as well.

The call for papers attracted papers from 31 countries from the  ve continents. As a result, the I3E 2009 program offered 12 sessions of full-paper presentations. The 31 selected papers cover a wide and important variety of issues in e-Business, e-services and e-society, including security, trust, and privacy, ethical and societal issues, business

organization, provision of services as software and software as services, and others. Extended versions of selected papers submitted to I3E 2009 will be published in the International Journal of e-Adoption and in AIS Transactions on Enterprise Systems.
