10 PRINT CHR$(205.5+RND(1)); : GOTO 10 Nick Montfort,Patsy Baudoin,John Bell,Ian Bogost,Jeremy Douglass,2012-11-23 A single line of code offers a way to understand the cultural context of computing. This book takes a single line of code—the extremely concise BASIC program for the Commodore 64 inscribed in the title—and uses it as a lens through which to consider the phenomenon of creative computing and the way computer programs exist in culture. The authors of this collaboratively written book treat code not as merely functional but as a text—in the case of 10 PRINT, a text that appeared in many different printed sources—that yields a story about its making, its purpose, its assumptions, and more. They consider randomness and regularity in computing and art, the maze in culture, the popular BASIC programming language, and the highly influential Commodore 64 computer.

Priming the Pump: How TRS-80 Enthusiasts Helped Spark the PC Revolution Theresa Welsh, David Welsh,2007-03-15 The authors were part of a community of small software entrepreneurs who created the first applications for personal computers, as the computer revolution in the late 1970s and early 1980s changed the way we create and store documents and data. They personally knew many of the principle players whose accomplishments are the stuff of legends, and whose work and vision led the way to our computer-saturated society. This book captures this unique era, through the stories of eye-witnesses, when personal computing was just an idea -- an idea whose time had come! In these pages you will learn how a young engineer named Steve Leininger, working alone, built the first TRS-80 microcomputer . He had been hired by Tandy Corporation to develop a computer product to be sold in their Radio Shack stores for a price their customers could afford. Development costs were less than $150,000. Yet no one had ever sold a complete off-the-shelf personal computer before. Would anyone buy it? As it turned out, the desire for a computer of one's own was overwhelming! Author David Welsh was one of the hobbyists-turned-programmers who bought a TRS-80. Using self-taught programming skills, he created a word processor and he and his wife Theresa found themselves in business, selling their product worldwide to enthusiastic fans who were eager to throw away their typewriters. They were part of the leading edge of the software business, joining hundreds of other small entrepreneurs selling software out of garages, basements and whatever space they could rent cheap. David and Theresa Welsh tell their own story and that of many other pioneers. Includes over 100 illustrations of early computer products and ads.
