The Role of Submarine Groundwater Discharge as Material Source to the Baltic Sea Beata Szymczycha,Janusz Pempkowiak,2015-11-27 The book provides a review of experimental methods and presents the worldwide newest literature regarding chemical substances fluxes via submarine groundwater discharge (SGD). Thus, the book characterizes both the distribution of chemicals in groundwater impacted areas in the Baltic Sea and their fluxes via SGD to the Baltic Sea. This book presents the state of art regarding the SGD and detailed studies on SGD characterization in the Baltic Sea. The Baltic Sea is an example of a region highly influenced by a variety of human activities that affect the ecosystem. It is shown that SGD has been proven to be one of the important sources introducing dissolved substances into the Baltic Sea. The loads of chemical substances delivered to the Baltic sea with SGD have not been quantified so far.

Motion Estimation for Video Coding Indrajit Chakrabarti,Kota Naga Srinivasarao Batta,Sumit Kumar Chatterjee,2015-01-13 The need of video compression in the modern age of visual communication cannot be over-emphasized. This monograph will provide useful information to the postgraduate students and researchers who wish to work in the domain of VLSI design for video processing applications. In this book, one can find an in-depth discussion of several motion estimation algorithms and their VLSI implementation as conceived and developed by the authors. It records an account of research done involving fast three step search, successive elimination, one-bit transformation and its effective combination with diamond search and dynamic pixel truncation techniques. Two appendices provide a number of instances of proof of concept through Matlab and Verilog program segments. In this aspect, the book can be considered as first of its kind. The architectures have been developed with an eye to their applicability in everyday low-power handheld appliances including video camcorders and smartphones.

Report of Investigations ,2002

Seismic Data Analysis Özdoğan Yilmaz,Stephen M. Doherty,2001 Expanding the author's original work on processing to include inversion and interpretation, and including developments in all aspects of conventional processing, this two-volume set is a comprehensive and complete coverage of the modern trends in the seismic industry - from time to depth, from 3D to 4D, from 4D to 4C, and from isotropy to anisotropy.

Petrology and PGE Potential of the Greenwood Lake Intrusion, Central Duluth Complex, Lake County, Minnesota James D. Miller,2004 Report summarizes a petrologic and metallogenic study of drill core and outcrop samples that profiled the igneous stratigraphy of the Greenwood Lake intrusion of the central Duluth Complex.

Quantitative Genetics, Genomics and Plant Breeding, 2nd Edition Manjit S. Kang,2020-04-01 This book presents state-of-the-art, authoritative chapters on contemporary issues in the broad areas of quantitative genetics, genomics and plant breeding. Section 1 (Chapters 2 to 12) emphasizes the application of genomics, and genome and epigenome editing techniques, in plant breeding; bioinformatics; quantitative trait loci mapping; and the latest approaches of examining and exploiting genotype-environment interactions. Section 2 (Chapters 13 to 20) represents the intersection of breeding, genetics and genomics. This section describes the use of cutting-edge molecular breeding and quantitative genetics techniques in wheat, rice, maize, root and tuber crops and pearl millet. Overall, the book focuses on using genomic information to help evaluate traits that can combat biotic/abiotic stresses, genome-wide association mapping, high-throughput genotyping/phenotyping, biofortification, use of big data, orphan crops, and gene editing techniques. The examples featured are taken from across crop science research and cover a wide geographical base.

Database Systems for Advanced Applications Kian Lee Tan,Vilas Wuwongse,2006-04-05 This book constitutes the refereed proceedings of the 11th International Conference on Database Systems for Advanced Applications, DASFAA 2006, held in Singapore in April 2006. 46 revised full papers and 16 revised short papers presented were carefully reviewed and selected from 188 submissions. Topics include sensor networks, subsequence matching and repeating patterns, spatial-temporal databases, data mining, XML compression and indexing, xpath query evaluation, uncertainty and streams, peer-to-peer and distributed networks and more.

Worldwide Computing and Its Applications - WWCA'98 Yoshifumi Masunaga,Takuya Katayama,Michiharu Tsukamoto,1998-02-16 This book constitutes the refereed proceedings of the Second International Conference on Worldwide Computing and Its Applications, WWCA'98, held in Tsukuba, Japan, in March 1998. This volume presents 14 invited and survey papers together with 20 papers selected by the conference committee. The volume is divided into topical sections on distributed objects, distributed componentware, distributed systems platforms, Internet technology, mobile computing, interculture technology, collaborative media, collaborative support, information discovery and retrieval, novel network applications.

High-Level Verification Sudipta Kundu,Sorin Lerner,Rajesh K. Gupta,2011-05-18 Given the growing size and heterogeneity of Systems on Chip (SOC), the design process from initial specification to chip fabrication has become increasingly complex. This growing complexity provides incentive for designers to use high-level languages such as C, SystemC, and SystemVerilog for system-level design. While a major goal of these high-level languages is to enable verification at a higher level of abstraction, allowing early exploration of system-level designs, the focus so far for validation purposes has been on traditional testing techniques such as random testing and scenario-based testing. This book focuses on high-level verification, presenting a design methodology that relies upon advances in synthesis techniques as well as on incremental refinement of the design process. These refinements can be done manually or through elaboration tools. This book discusses verification of specific properties in designs written using high-level languages, as well as checking that the refined implementations are equivalent to their high-level specifications. The novelty of each of these techniques is that they use a combination of formal techniques to do scalable verification of system designs completely automatically. The verification techniques presented in this book include methods for verifying properties of high-level designs and methods for verifying that the translation from high-level design to a low-level Register Transfer Language (RTL) design preserves semantics. Used together, these techniques guarantee that

properties verified in the high-level design are preserved through the translation to low-level RTL.

Listen. Think. Act.: Lessons and Perspectives in Community Development Agnes Igoe, Thomas Karrel, Jamie Van Leeuwen, 2021-09 This is a book about community development and how to do it better! It is a book for anyone interested in doing good community development work. This interactive textbook addresses gaps in best practices and aims to educate students, researchers, organizational leaders, and others on the importance of doing purposeful community development work. The authors, three nonprofit and academic leaders from Uganda and the United States, address misguided and invasive approaches to community development, combining decades of experience to share a collective narrative on how we can all be more strategic and intentional in our work, by listening and thinking with communities before acting. Listen. Think. Act provides a backbone for this interactive field guide, bringing community development to life and offering tools and perspectives on how to better approach work in underserved communities, regardless of geographic location. The book explores numerous first person examples of community development work in action, relevant facts about the rapidly changing nature of this field, and explores personal case studies from each of the authors. Additionally, the book offers readers a Community Changemaker Challenge to design real-world solutions, alongside discussion questions and additional readings at the end of each chapter!

Patterning and Cell Type Specification in the Developing CNS and PNS Bin Chen, Kenneth Y. Kwan, 2020-06-02 Patterning and Cell Type Specification in the Developing CNS and PNS, Second Edition, the latest release in the Comprehensive Developmental Neuroscience series, presents recent advances in genetic, molecular and cellular methods that have generated a massive increase in new information. The book provides a much-needed update to underscore the latest research in this rapidly evolving field, with new section editors discussing the technological advances that are enabling the pursuit of new research on brain development. This volume focuses on neural patterning and cell type specification in the developing central and peripheral nervous systems. Features leading experts in various subfields as section editors and article authors Contains articles that are peer reviewed to ensure accuracy, thoroughness and scholarship Covers mechanisms which control regional specification, regulate proliferation of neuronal progenitors, control differentiation and survival of specific neuronal subtypes, and control the development of non-neural cells

Applied Food Protein Chemistry Zeynep Ustunol, 2014-12-31 Food proteins are of great interest, not only because of their nutritional importance and their functionality in foods, but also for their detrimental effects. Although proteins from milk, meats (including fish and poultry), eggs, cereals, legumes, and oilseeds have been the traditional sources of protein in the human diet, potentially any proteins from a biological source could serve as a food protein. The primary role of protein in the diet is to provide the building materials for the synthesis of muscle and other tissues, and they play a critical role in many biological processes. They are also responsible for food texture, color, and flavor. Today, food proteins are extracted, modified, and incorporated into processed foods to impart specific functional properties. They can also have adverse effects in the diet: proteins, such as walnuts, pecans, almonds, and cashews, soybean, wheat, milk, egg, crustacean, and fish proteins can be powerful allergens for some people. Applied Food Protein Chemistry is an applied reference which reviews the properties of food proteins and provides in-depth information on important plant and animal proteins consumed around the world. The book is grouped into three sections: (1) overview of food proteins, (2) plant proteins, and (3) animal proteins. Each chapter discusses world production, distribution, utilization, physicochemical properties, and the functional properties of each protein, as well as its food applications. The authors for each of the chapters are carefully selected experts in the field. This book will be a valuable reference tool for those who work on food proteins. It will also be an important text on applied food protein chemistry for upper-level students and graduate students of food science programs.

Principles of Developmental Genetics Sally A. Moody, 2014-09-02 Providing expert coverage of all major events in early embryogenesis and the organogenesis of specific systems, and supplemented with representative clinical syndromes, Principles of Developmental Genetics, Second Edition discusses the processes of normal development in embryonic and prenatal animals, including humans. The new edition of this classic work supports clinical researchers developing future therapies with its all-new coverage of systems biology, stem cell biology, new technologies, and clinical disorders. A crystal-clear layout, exceptional full-color design, and bulleted summaries of major takeaways and clinical pathways assist comprehension and readability of the highly complex content. All-new coverage of systems biology and stem cell biology in context of evolving technologies places the work squarely on the modern sciences Chapters are complemented with a bulleted summary for easy digestion of the major points, with a clinical summary for therapeutic application Clinical highlights provides a bridge between basic developmental biology and clinical sciences in embryonic and prenatal syndromes

Advances in Imaging and Electron Physics Peter W. Hawkes, 2003-09-04 The subjects reviewed in the 'Advances' series cover a broad range of themes including microscopy, electromagnetic fields and image coding. This volume concentrates on microscopy and pattern recognition and also electron physics. The text bridges the gap between academic researchers and R&D designers by addressing and solving daily issues, which makes this book essential reading. · Emphasizes broad and in depth article collaborations between world-renowned scientists in the field of image and electron physics · Presents theory and it's application in a practical sense, providing long awaited solutions and new findings · Provides a comprehensive overview of international congress proceedings and associated publications, as source material.

Advances in Genetics Jeffrey C. Hall, 2003-06-07 The field of genetics is rapidly evolving and new medical breakthroughs are occurring as a result of advances in knowledge of genetics. This series continually publishes important reviews of the broadest interest to geneticists and their colleagues in affiliated disciplines. Information Networking Hyun-Kook Kahng, 2003-09-03 This book constitutes the thoroughly refereed post-proceedings of the International Conference on Information Networking, ICOIN 2003, held at Cheju Island, Korea in February 2003. The 100 revised full papers presented were carefully selected during two rounds of reviewing and revision. The papers are organized in topical sections on high-speed network technologies, enhanced Internet protocols, QoS in the Internet, mobile Internet, network

security, network management, and network performance.

Triticeae III Abdullah A. Jaradat,1998 This volume, based on the 3rd International Symposium in Aleppo, Syria, which is jointly sponsored by IPGRI, ICARDA and the International Triticeae Consortium, includes papers on such topics as genetic resources and genetic diversity in cereals including wheat, barley, rye and forage grasses.
