Rigorous Global Search: Continuous Problems R. Baker Kearfott, 2013-03-09 This work grew out of several years of research, graduate seminars and talks on the subject. It was motivated by a desire to make the technology accessible to those who most needed it or could most use it. It is meant to be a self-contained introduction, a reference for the techniques, and a guide to the literature for the underlying theory. It contains pointers to fertile areas for future research. It also serves as introductory documentation for a Fortran 90 software package for nonlinear systems and global optimization. The subject of the monograph is deterministic, automatically verified or rigorous methods. In such methods, directed rounding and computational fix-point theory are combined with exhaustive search (branch and bound) techniques. Completion of such an algorithm with a list of solutions constitutes a rigorous mathematical proof that all of the solutions within the original search region are within the output list. The monograph is appropriate as an introduction to research and technology in the area, as a desk reference, or as a graduate-level course reference. Knowledge of calculus, linear algebra, and elementary numerical analysis is assumed.

**When Experiments Travel** Adriana Petryna,2009-04-27 The phenomenal growth of global pharmaceutical sales and the quest for innovation are driving an unprecedented search for human test subjects, particularly in middle- and low-income countries. Our hope for medical progress increasingly depends on the willingness of the world's poor to participate in clinical drug trials. While these experiments often provide those in need with vital and previously unattainable medical resources, the outsourcing and offshoring of trials also create new problems. In this groundbreaking book, anthropologist Adriana Petryna takes us deep into the clinical trials industry as it brings together players separated by vast economic and cultural differences. Moving between corporate and scientific offices in the United States and research and public health sites in Poland and Brazil, *When Experiments Travel* documents the complex ways that commercial medical science, with all its benefits and risks, is being integrated into local health systems and emerging drug markets. Providing a unique perspective on globalized clinical trials, *When Experiments Travel* raises central questions: Are such trials exploitative or are they social goods? How are experiments controlled and how is drug safety ensured? And do these experiments help or harm public health in the countries where they are conducted? Empirically rich and theoretically innovative, the book shows that neither the language of coercion nor that of rational choice fully captures the range of situations and value systems at work in medical experiments today. *When Experiments Travel* challenges conventional understandings of the ethics and politics of transnational science and changes the way we think about global medicine and the new infrastructures of our lives.

Global Responsibility Hans Kung,2004-02-19 In this timely and urgent work, Hans Kung reminds us: - Every minute, the nations of the world spend 1.8 million dollars on military armaments; - Every hour, 1500 children die of hunger-related causes; - Every week during the 1980s, more people were detained, tortured, assassinated, made refugee, or in other ways violated by acts of repressive regimes than at any other time in history; - Every month, the world's economic system adds over 7.5 billion dollars to the catastrophically unbearable debt burden of more than 1.5 trillion dollars now resting on the shoulders of Third World peoples; - Every year, an area of tropical forest three-quarters the size of Korea is destroyed and lost; - Every decade, if present global warming trends continue, the temperature of the earth's atmosphere could rise dramatically with a resultant rise in sea levels that would have disastrous consequences, particularly for coastal areas of all the earth's land masses. In 'Global Responsibility', the author offers important new approaches and concludes that: - There can be no peace among the nations without peace among the religions. - There can be no peace among the religions without dialogue between the religions. - There can be no ongoing human society without a global ethic.

*Theory of Global Random Search* Anatoly A. Zhigljavsky,2012-12-06 One service mathematics has rendered the 'Et moi ... - si j'avait su comment en revenir. je n'y serais point alle.' human mee. It has put common sense back Jules Verne where it belongs, on the topmost shelf next to the dusty canister labelled 'discarded non The series is divergent; therefore we may be sense'. Eric T. Bell able to do something with it. O. Heavyside Mathematics is a tool for thought. A highly necessary tool in a world where both feedback and non linearities abound. Similarly, all kinds of parts of mathematics serve as tools for other parts and for other sciences. Applying a simple rewriting rule to the quote on the right above one finds such statements as: 'One service topology has rendered mathematical physics .. .'; 'One service logic has rendered computer science .. .'; 'One service category theory has rendered mathematics .. .'. All arguably true. And all statements obtainable this way form part of the raison d'etre of this series.

The Heart of a Hero (Global Search and Rescue Book #2) Susan May Warren,2020-06-02 Jake Silver may not be able to put the memories of his time as a sniper and Navy SEAL behind him, but at least he can put his skills to use as a part of the Jones Inc. rescue team. Saving the life of pediatric heart surgeon Dr. Aria Sinclair on Denali helped too. Now he can't get her out of his head, and when he hears she is in the path of a hurricane down in Key West he can't help but jump on a plane to rescue her. Aria has dedicated her life to helping children born with defective hearts. After all, she was one of those children. Now driven to

succeed, she lives a lonely, stressful life. One she would have lost on Denali if it hadn't been for Jake. Jake is exciting and handsome, but he's also dangerous, and she's already lost one person she loves. She can't bear it again. It's not until she finds herself trapped in the middle of a category 4 hurricane that she can admit she needs Jake desperately. With their very survival in the balance, can they hope for a second chance at life . . . and love?

**Unorthodox Kin** Naomi Leite,2017-02-28 How are local understandings of identity, relatedness, and belonging transformed in a global era? How does international tourism affect possibilities for who one can become? In urban Portugal today, hundreds of individuals trace their ancestry to 15th century Jews forcibly converted to Catholicism, and many now seek to rejoin the Jewish people as a whole. For the most part, however, these self-titled Marranos (“hidden Jews”) lack any direct experience of Jews or Judaism, and Portugal's tiny, tightly knit Jewish community offers no clear path of entry. According to Jewish law, to be recognized as a Jew one must be born to a Jewish mother or pursue religious conversion, an anathema to those who feel their ancestors' Judaism was cruelly stolen from them. After centuries of familial Catholicism, and having been refused inclusion locally, how will these self-declared ancestral Jews find belonging among “the Jewish family,” writ large? How, that is, can people rejected as strangers face-to-face become members of a global imagined community - not only rhetorically, but experientially? Leite addresses this question through intimate portraits of the lives and experiences of a network of urban Marranos who sought contact with foreign Jewish tourists and outreach workers as a means of gaining educational and moral support in their quest. Exploring mutual imaginings and direct encounters between Marranos, Portuguese Jews, and foreign Jewish visitors, *Unorthodox Kin* deftly tracks how visions of self and kin evolve over time and across social spaces, ending in an unexpected path to belonging. In the process, the analysis weaves together a diverse set of current anthropological themes, from intersubjectivity to international tourism, class structures to the construction of identity, cultural logics of relatedness to transcultural communication. A compelling evocation of how ideas of ancestry shape the present, how feelings of kinship arise among far-flung strangers, and how some find mystical connection in a world said to be disenchanted, *Unorthodox Kin* will appeal to a wide audience interested in anthropology, sociology, Jewish studies, and religious studies. Its accessible, narrative-driven style makes it especially well suited for introductory and advanced courses in general cultural anthropology, ethnography, theories of identity and social categorization, and the study of globalization, kinship, tourism, and religion.
