Spaceflight Revolution James R. Hansen,1995

A-10s Over Kosovo Phil M. Haun,Christopher E. Haave,Air University Press,2011 First published in 2003. The NATO-led Operation Allied Force was fought in 1999 to stop Serb atrocities against ethnic Albanians in Kosovo. This war, as noted by the distinguished military historian John Keegan, marked a real turning point . . . and proved that a war can be won by airpower alone. Colonels Haave and Haun have organized firsthand accounts of some of the people who provided that airpower--the members of the 40th Expeditionary Operations Group. Their descriptions--a new wingman's first combat sortie, a support officer's view of a fighter squadron relocation during combat, and a Sandy's leadership in finding and rescuing a downed F-117 pilot--provide the reader with a legitimate insight into an air war at the tactical level and the airpower that helped convince the Serbian president, Slobodan Milosevic, to capitulate.

Introduction to Autonomous Mobile Robots, second edition Roland Siegwart,Illah Reza Nourbakhsh,Davide Scaramuzza,2011-02-18 The second edition of a comprehensive introduction to all aspects of mobile robotics, from algorithms to mechanisms. Mobile robots range from the Mars Pathfinder mission's teleoperated Sojourner to the cleaning robots in the Paris Metro. This text offers students and other interested readers an introduction to the fundamentals of mobile robotics, spanning the mechanical, motor, sensory, perceptual, and cognitive layers the field comprises. The text focuses on mobility itself, offering an overview of the mechanisms that allow a mobile robot to move through a real world environment to perform its tasks, including locomotion, sensing, localization, and motion planning. It synthesizes material from such fields as kinematics, control theory, signal analysis, computer vision, information theory, artificial intelligence, and probability theory. The book presents the techniques and technology that enable mobility in a series of interacting modules. Each chapter treats a different aspect of mobility, as the book moves from low-level to high-level details. It covers all aspects of mobile robotics, including software and hardware design considerations, related technologies, and algorithmic techniques. This second edition has been revised and updated throughout, with 130 pages of new material on such topics as locomotion, perception, localization, and planning and navigation. Problem sets have been added at the end of each chapter. Bringing together all aspects of mobile robotics into one volume, Introduction to Autonomous Mobile Robots can serve as a textbook or a working tool for beginning practitioners. Curriculum developed by Dr. Robert King, Colorado School of Mines, and Dr. James Conrad, University of North Carolina-Charlotte, to accompany the National Instruments LabVIEW Robotics Starter Kit, are available. Included are 13 (6 by Dr. King and 7 by Dr. Conrad) laboratory exercises for using the LabVIEW Robotics Starter Kit to teach mobile robotics concepts.

Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications Joel Wuthnow,Phillip Charles Saunders, China's People's Liberation Army (PLA) has embarked on its most wide-ranging and ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities- on land, sea, in the air, and in the space and cyber domains. The reforms could result in a more adept joint

warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations, Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.

Star Wars: The Rising Storm (The High Republic) Cavan Scott,2021-06-29 NEW YORK TIMES BESTSELLER • The heroes of the High Republic era return to face a shattered peace and a fearsome foe, following the dramatic events of Light of the Jedi. In the wake of the hyperspace disaster and the heroism of the Jedi, the Republic continues to grow, bringing more worlds together under a single unified banner. Under the leadership of Chancellor Lina Soh, the spirit of unity extends throughout the galaxy, with the Jedi and the newly established Starlight Beacon station at the vanguard. In celebration, the chancellor plans the Republic Fair, a showcase of the possibilities and the peace of the expanding Republic—a peace the Jedi hope to foster. Stellan Gios, Bell Zettifar, Elzar Mann, and others join the event as ambassadors of harmony. But as the eyes of the galaxy turn toward the fair, so too does the fury of the Nihil. Their leader, Marchion Ro, is intent on destroying this unity. His storm descends on the pageantry and celebration, sowing chaos and exacting revenge. As the Jedi struggle to curb the carnage of the rampaging Nihil, they come face-to-face with the true fear their enemy plans to unleash across the galaxy—the kind of fear from which even the Force cannot shield them.

Kabul in Winter Ann Jones,2007-03-06 A sharp and arresting people's-eye view of real life in Afghanistan after the Taliban Soon after the bombing of Kabul ceased, award-winning journalist and women's rights activist Ann Jones set out for the shattered city, determined to bring help where her country had brought destruction. Here is her trenchant report from inside a city struggling to rise from the ruins. Working among the multitude of impoverished war widows, retraining Kabul's long-silenced English teachers, and investigating the city's prison for women, Jones enters a large community of female outcasts: runaway child brides, pariah prostitutes, cast-off wives, victims of rape. In the streets and markets, she hears the Afghan view of the supposed benefits brought by the fall of the Taliban, and learns that regarding women as less than human is the norm, not the aberration of one conspicuously repressive regime. Jones confronts the ways in which Afghan education, culture, and politics have repeatedly been hijacked-by Communists, Islamic fundamentalists, and the Western free marketeers—always with disastrous results. And she reveals, through small events, the big disjunctions: between U.S promises and performance, between the new democracy and the still-entrenched warlords, between what's boasted of and what is. At once angry, profound, and starkly beautiful, Kabul in Winter brings alive the people and day-to-day life of a place whose future depends so much upon our own.
