*Hidden History of Fort Collins* Barbara Fleming,2017-10-23 From its Wild West days to the early twentieth century, Fort Collins boasted its share of colorful characters. British import Edith Boothroyd saved a mare from meeting a tragic fate after the bridge she and the horse were traveling across

unexpectedly collapsed. In 1915, barnstormer Billy Parker built his first biplane in a local field. Happy Jack slipped away from prison after slyly convincing the jailer to loosen his restraints. And Francis Carter-Cotton left investors holding the bag when he fled to Canada after racking up \$300,000 in debt. Barbara Fleming divulges these entertaining stories and more.

delves into the history of some of the unique individuals and groups, past and present, who have made a memorable impact on their community throughout its history.

**Streets of Fort Collins** Charlene Tresner, 2007 Street Names in Fort Collins was the title of a series of columns written by local historian Charlene Tresner for the Triangle Review newspaper in the early 1970s. The Fort Collins, Colorado, weekly later published the series in booklet form in 1977 under the title, Streets of Fort Collins. That booklet has been out of print for many years. Patterson House Book Publishing has expanded and improved the out-of-print booklet. The revised edition of Streets of Fort Collins, published in 2007, retains the original flavor of Charlene Tresner's writings. As a fifth-generation Fort Collins' native, Tresner included personal stories about members of pioneer families whose surnames now identify many of Fort Collins' earliest streets. The current book has been reorganized into three parts with sections devoted to the original town site, subsequent additions, and early street maintenance practices. All information in the first edition was verified before inclusion in the revised version. Historic photographs published in the first edition are also included in the new book, plus many more early images that illustrate Tresner's pioneer stories. A comprehensive index added to the revised edition allows readers to quickly locate topics of interest and makes Streets of Fort Collins: A History of Fort Collins, Colorado, Through Its Street Names, Revised Edition

an easy-to-use, local history reference.

Ten Lessons for a Post-Pandemic World Fareed Zakaria, 2020-10-06 New York Times Bestseller COVID-19 is speeding up history, but how? What is the shape of the world to come? Lenin once said, There are decades when nothing happens and weeks when decades happen. This is one of those times when history has sped up. CNN host and best-selling author Fareed Zakaria helps readers to understand the nature of a post-pandemic world: the political, social, technological, and economic consequences that may take years to unfold. Written in the form of ten lessons, covering topics from natural and

biological risks to the rise of digital life to an emerging bipolar world order, Zakaria helps readers to begin thinking beyond the immediate effects of COVID-19. *Ten Lessons for a Post-Pandemic World* speaks to past, present, and future, and, while urgent and timely, is sure to become an enduring reflection on life in the early twenty-first century.

**History Has Begun** Bruno Maçães, 2020 Popular consensus says that the US rose over two centuries to Cold War victory and world domination, and is now in slow decline. But is this right? History's great civilizations have always lasted much longer, and for all its colossal power, American culture was overshadowed by Europe until recently. What if this isn't the end? In *History Has Begun*, Bruno Maçães offers a compelling vision of America's future, both fascinating and unnerving. From the early American Republic, he takes us to the turbulent present, when, he argues, America is finally forging its own path. We can see the birth pangs of this new civilization in today's debates on guns, religion, foreign policy and the significance of Trump. Should the coronavirus pandemic be regarded as an opportunity to build a new kind of society? What will its values be, and what will this new America look like? Maçães traces the long arc of US history to argue that in contrast to those who see the US on the cusp of decline, it may well be simply shifting to a new model, one equally powerful but no longer liberal. Consequently, it is no longer enough to analyze America's current trajectory through the simple prism of decline vs. progress, which assumes a static model-America as

liberal leviathan. Rather, Maçães argues that America may be casting off the liberalism that has defined the country since its founding for a new model, one more appropriate to succeeding in a transformed world.

**Bones that Float** Kari Grady Grossman, 2007 On March 24, 2001, American writer Kari Grady Grossman entered a crowded orphanage outside Phnom Penh, Cambodia, and met her 8-month-old son. One of the first questions Kari asked was 'How did he get here?' The complex and at times heart-wrenching answer is told in this magnificent book that encompasses Kari's personal journey to adoption, Cambodia's gruesome history of war and genocide, and the stories of two Cambodians -- one who escaped the Khmer Rouge's bloody reign and one who did not. The interweaving stories grab your heartstrings and do not let go. From the moment Kari realizes that she will never be an 'earth momma' practicing prenatal yoga to years later as Kari wends her way on the back of a moto-taxi through Phnom Penh's smog-choked streets trying to make a difference in her son's birth nation, you can't read impassively. 'Bones That Float' takes you into the Khmer Rouge jungle where boy soldiers force starving families to labor all day at gunpoint, and it brings you to modern-day Phnom Penh streets where foreign pedophiles purchase the innocence of preteen Cambodian girls. But ultimately 'Bones That Float' -- a Cambodian phrase for the sacred that rises above the suffering -- is a tale of hope. Kari reminds us that our world is 'one big family' and that we cannot -- or

dare not -- turn our backs on people who suffer in part because of our country's own foreign policy missteps. To read 'Bones That Float' is to open your heart to caring. ... In a village called Chrauk Tick in the Cardamom Mountains of Cambodia, 485 children are the first people to learn to read and write. Armed with literacy, they are taking the first steps to change their lives. Our students have been featured on Voice of America demanding the rule of law to save their forest from illegal destruction, inspiring 100 primary school dropouts to choose the classroom instead of the fields. To continue this progress, the school will bring education sustainable cooking fuels, forest agriculture, a revival of music traditions, and communication technology to reach the outside world. ...
