Hasanlu V Michael D. Danti,2013-07-31 Hasanlu V provides archaeologists with a new, more accurate chronology of Hasanlu, the largest and arguably the most important archaeological site in the Gadar River Valley of northwestern Iran. This revised chronology introduces Hasanlu Periods VIa, V, and IVc for the first time. Based on new findings, the report overturns current constructions of the origins of the archaeological culture in Hasanlu, which sought to link the Monochrome Burnished Ware Horizon (formerly known as the Early Western Grey Ware Horizon) to the migration of new peoples into western Iran in the later second millennium B.C. Hasanlu V shows instead that the Monochrome Burnished Ware Horizon developed gradually from indigenous traditions. This reappraisal has important implications for our understanding of Indo-Iranian migrations into the Zagros region.

Safety and Health Handbook for Cytotoxic Drugs Samuel J. Murff,2012 Many Healthcare workers must deal on a daily basis with the transportation, preparation, storage, clean up, and disposal of cytotoxic drugs, which are used in chemotherapy because of their harmful effect on cancer cells. These drugs also have harmful effects on good cells, and they therefore pose a significant health risk to those who work with them. Yet there is little safety and health information available about them, and what information is available is scattered across a vast array of literature. The Safety and Health Handbook for Cytotoxic Drugs collects this information so that healthcare workers can better understand the drugs they work with and the safety and health procedures that should be followed. In it, author Samuel J. Murff presents comprehensive technical and procedural information on 106 of the most common cytotoxic drugs. The book provides guidance on quickly dealing with spills, reducing unnecessary exposure, and complying with pertinent regulations and standards in order to better equip healthcare workers to maintain a safe work environment.
