**Linked** Gordon Korman, 2021-07-20 An unforgettable novel from the New York Times bestseller Gordon Korman Link, Michael, and Dana live in a quiet town. But it's shaken up very quickly when someone sneaks into school and vandalizes it with a swastika. Nobody can believe it. How could such a symbol of hate end up in the middle of their school? Who would do such a thing? Because Michael was the first person to see it, he's the first suspect. Because Link is one of the most popular guys in school, everyone's looking to him to figure it out. And because Dana's the only Jewish girl in the whole town, everyone's treating her more like an outsider than ever. The mystery deepens as more swastikas begin to appear. Some students decide to fight back and start a project to bring people together instead of dividing them further. The closer Link, Michael, and Dana get to the truth, the more there is to face-not just the crimes of the present, but the crimes of the past. With *Linked*, Gordon Korman, the author of the acclaimed novel *Restart*, poses a mystery for all readers where the who did it? isn't nearly as important as the why?

**Lessons of the Locker Room** Andrew W. Dr. Miracle, C. Roger Rees, 2010-08-05 Do sports build character? An anthropologist and a sociologist explore the underpinnings of school sports and examine the evidence to support the prevailing assumption that sport is an ennobling experience. They find that participation has little effect on positive character development. Far from building model citizens, their research shows that competitive team sports may foster selfish motives and antisocial behavior. Rather than learning self-sacrifice and dedication, athletes often pick up the message that winning isn't everything - it's the only thing.

*Themes, Dreams, and Schemes* G. Eugene Wigger, 1997-07-08 This innovative, comprehensive reference guide is ideal for caterers, special event managers, and other foodservice professionals. There are over 375 themed experiences, ranging

from meeting breaks to dinners to outdoor functions to unique theme parties and more. Step-by-step menu suggestions, concepts and implementation details are provided.

Helping Students Take Control of Everyday Executive Functions Paula Moraine, 2012 This book presents an innovative model for supporting executive function in students with attention, memory, organization, planning, inhibition, initiative, and flexibility difficulties, including those with ADHD, ADD, autism spectrum disorders and related conditions. The author advocates a student-centred approach in which educators first explore 8 key 'ingredients' with the student: relationships; strengths and weaknesses; self-advocacy and responsibility; review and preview; motivation and incentive; synthesis and analysis; rhythm and routine; and practice and repetition. She provides a step-by-step explanation of how these 'ingredients' can then be used in different ways and in different combinations to successfully address particular areas of difficulty. The approach is clearly explained, and the book contains many useful examples, practical tips and strategies, suggested conversation starters, sample time management plans and other tools that can be adapted to meet the particular needs of individual students. Original and effective, the approach outlined in this book will be of interest to teachers and other professionals involved in supporting executive function in students of all ages, as well as parents and carers.

Until he starts spending his time off the field with a stern blonde who recites baseball stats for kicks and sees through his arrogant façade. **TWO OUT** As the Thrashers' season gets into full swing and Gwen adjusts to her new job, their fun banter and friendly teasing turns into stolen kisses and countless steamy nights. The team's strict policy against player-staff relationships throws a curve ball into the mix, but they can't hide from their feelings any more than the most famous man in baseball can hide from the spotlight...

**The Deaf Way** Carol Erting, 1994 Selected papers from the conference held in Washington DC, July 9-14, 1989.

**Cowards** Trent Portigal, 2015-09-25 Cowards recounts the collapse of the painstakingly constructed life of a family in a society split between formal European and Saskatchewan-style pragmatic socialism. Lora and Léon Chaulieu, the former a respected judge and the latter a blacklisted writer, manage to keep their family on the right side of the law and the prospects of their two teenage daughters open until Lora is reassigned from the capital, where the family lives, to a small prairie city. This forces Léon to become the central parental figure, making it impossible to keep up the wall between his subversive activities and his home life. Without the balancing influence of Lora, the turmoil caused by the meeting of these two worlds leads the whole family down a path of increasing lawlessness.

Interaction Ritual Chains Randall Collins, 2014-05-06 Sex, smoking, and social stratification are three very different social phenomena. And yet, argues sociologist Randall Collins, they and much else in our social lives are driven by a common force: interaction rituals. *Interaction Ritual Chains* is a major work of sociological theory that attempts to develop a radical

microsociology. It proposes that successful rituals create symbols of group membership and pump up individuals with emotional energy, while failed rituals drain emotional energy. Each person flows from situation to situation, drawn to those interactions where their cultural capital gives them the best emotional energy payoff. Thinking, too, can be explained by the internalization of conversations within the flow of situations; individual selves are thoroughly and continually social, constructed from the outside in. The first half of Interaction Ritual Chains is based on the classic analyses of Durkheim, Mead, and Goffman and draws on micro-sociological research on conversation, bodily rhythms, emotions, and intellectual creativity. The second half discusses how such activities as sex, smoking, and social stratification are shaped by interaction ritual chains. For example, the book addresses the emotional and symbolic nature of sexual exchanges of all sorts--from hand-holding to masturbation to sexual relationships with prostitutes--while describing the interaction rituals they involve. This book will appeal not only to psychologists, sociologists, and anthropologists, but to those in fields as diverse as human sexuality, religious studies, and literary theory.

with grooves in a  
mating hub to  
transfer torque and
