Hypermedia Courseware: Structures of Communication and Intelligent Help Armando Oliveira,2012-12-06 This book is based on the NATO Advanced Research Workshop on Structures of Communication and Intelligent Help for Hypermedia Courseware, which was

held at Espinho, Portugal, April 19-24, 1990. The texts included here should not be regarded as untouched proceedings of this meeting, but as the result of the reflections which took place there and which led the authors to revise their texts in that light. The Espinho ARW was itself to some extent the continuation of the ARW on Designing Hypermedia/Hypertext for Learning, held in Germany in 1989 (D. H. Jonassen, H. Mandl (eds.): Designing Hypermedia for Learning. NATO ASI Series F, Vol. 67. Springer 1990). At that meeting an essential conclusion became apparent: the importance and interest of hyper media products as potential pedagogical tools. It was then already predictable that the enormous evolution of hypermedia would lead to its association with multimedia technologies, namely for the production of courseware. Parallel to the improvement of the didactic potential and quality which results from this association, it nevertheless brought along a natural array of difficulties, some old, some new, in the conception and use of hypermedia products. Today there is agreement that one of the most promising technological advances for education is represented by the use of text, sound and images based on nonlinear techniques of information handling and searching of hypermedia architectures. The problem of hypermedia is fundamentally one of communication; this leads to an attempt at defining a language for hypermedia.

The Death of Expertise Tom Nichols, 2024 In the early 1990s, a small group of AIDS denialists, including a University of California professor named Peter Duesberg, argued against virtually the entire medical establishment's consensus that the human immunodeficiency virus (HIV) was the cause of Acquired Immune Deficiency Syndrome. Science thrives on such counterintuitive challenges, but there was no evidence for Duesberg's beliefs, which turned out to be baseless. Once researchers found HIV, doctors and public health officials were able to save countless lives through measures aimed at preventing its transmission--

Ottolenghi Test Kitchen: Shelf Love Yotam Ottolenghi, Noor Murad, Ottolenghi Test Kitchen, 2021-09-30 Relaxed, flexible home cooking from Yotam Ottolenghi and his superteam. Whether they're conjuring up new recipes or cooking for themselves at home, the Ottolenghi Test Kitchen team do what we all do: they raid their kitchens. But then, they

turn whatever they find into approachable creations with an 'Ottolenghi' twist. This instinct is in perfect sync with recent times, when we've all been standing in front of our kitchen shelves, our cupboards and our fridges, wondering what to cook with what we've got; how to put a can of chickpeas or a bag of frozen peas to good use, instead of taking an extra trip to the shops. For the first time, the team welcome us into their creative space. These dishes pack all the punch and edge we expect from Ottolenghi, but offer more flexibility to make them our own, using what we've got to hand. There's the ultimate guide to creamy dreamy hummus, a one-pan route to confit tandoori chickpeas and a tomato salad that rules them all. This book is all about feeding ourselves and our families with less stress and less fuss, but with all the 'wow' of an Ottolenghi meal. It's a notebook to scribble on and add to, to take its ethos and absolutely make it your own. This is how to cook, the OTK way.

Before leaving Chevrolet, Joe sold enough cars to put him in the Guinness Book of World Records as 'the world's greatest salesman' for twelve consecutive years. Here, he shares his winning techniques in this step-by-step book, including how to:

- o Read a customer like a book and keep that customer for life

The Circle Dave Eggers,2013-10-08 INTERNATIONAL BESTSELLER • A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the company’s modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the

CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense, raising questions about memory, history, privacy, democracy, and the limits of human knowledge.
