It Devours! Joseph Fink, Jeffrey Cranor, 2017-10-17 A new page-turning mystery about science, faith, love and belonging, set in a friendly desert community where ghosts, angels, aliens, and government conspiracies are commonplace parts of everyday life. Welcome to Night Vale... “Brilliant, hilarious, and wondrously strange. I’m packing up and moving to Night Vale! –Ransom Riggs, #1 New York Times Bestselling Author of *Miss Peregrine’s Home for Peculiar Children*. From the authors of the New York Times bestselling novel *Welcome to Night Vale* and the creators of the #1 international podcast of the same name, comes a mystery exploring the intersections of faith and science, the growing relationship between two young people who want desperately to trust each other, and the terrifying, toothy power of the Smiling God. Nilanjana Sikdar is an outsider to the town of Night Vale. Working for Carlos, the town’s top scientist, she relies on fact and logic as her guiding principles. But all of that is put into question when Carlos gives her a special assignment investigating a mysterious rumbling in the desert wasteland outside of town. This investigation leads her to the Joyous Congregation of the Smiling God, and to Darryl, one of its most committed members. Caught between her beliefs in the ultimate power of science and her growing attraction to Darryl, she begins to suspect the Congregation is planning a ritual that could threaten the lives of everyone in town. Nilanjana and Darryl must search for common ground between their very different world views as they are faced with the Congregation’s darkest and most terrible secret.

*The Kraken Project* Douglas Preston,2014-05-13 From celebrated Relic author Douglas Preston, Wyman Ford races to stop a rogue AI in *The Kraken Project*, a New York Times bestselling thriller “as chilling as it is provocative (James Rollins) NASA is building a probe to be splashed down in the Kraken Mare, the largest sea on Saturn's great moon, Titan. It is one of the most promising habitats for extraterrestrial life in the solar system, but the surface is unpredictable and dangerous, requiring the probe to contain artificial intelligence software. To this end, Melissa Shepherd, a brilliant programmer, has developed Dorothy, a powerful, self-modifying AI whose true potential is both revolutionary and terrifying. When miscalculations lead to a catastrophe during testing, Dorothy flees into the internet. Former CIA agent Wyman Ford is tapped to track down the rogue

AI. As Ford and Shepherd search for Dorothy, they realize that her horrific experiences in the wasteland of the Internet have changed her in ways they can barely imagine. And they're not the only ones looking for the wayward software: the AI is also being pursued by a pair of Wall Street traders, who want to capture her code and turn her into a high-speed trading bot. Traumatized, angry, and relentlessly hunted, Dorothy has an extraordinary revelation—and devises a plan. As the pursuit of Dorothy converges on a deserted house on the coast of Northern California, Ford must face the ultimate question: is rescuing Dorothy the right thing? Is the AI bent on saving the world... or on wiping out the cancer that is humankind? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Seeking Truth in International TV News Vivien Marsh,2023-03-17 This book puts CGTN (formerly CCTV-News) and the BBC's international television news head-to-head, interrogating competing 'truths' in the exacting business of news reporting. Written by a media scholar and former long-serving BBC News journalist, Seeking Truth in International TV News asks if China's

English-language television news programmes are little more than state propaganda, and if the BBC can be viewed as a universal news standard to which all other broadcasters should aspire. Over 8 years of Xi Jinping's rule, it investigates how the international TV news channels of CGTN and the BBC reported on Chinese politics, protests in Hong Kong, disasters, China in Africa, and insurgency and its suppression in Xinjiang. The comparison reveals uneven editorial imperatives at the Chinese broadcaster and raises questions about the BBC's professed tenets of balance and impartiality. It also illustrates how Chinese journalists commit 'small acts of journalism' that push the boundaries of information control. A rigorous analysis of reportage from the two channels, this book will be relevant to scholars of global media, journalism, international relations and public diplomacy. It will also interest those in academia, the media and international affairs who want to examine the nature of news and 'soft power' in a comparative context.
