Amazon's Best Romances of January Apple Books' Best Books of January Goodreads' Hottest Romances of January Buzzfeed's Most Anticipated Books of 2022 Popsugar, Parade.com, The Nerd Daily, and Fangirlish's Most Anticipated Books of 2022 A TV meteorologist and a sports reporter scheme to reunite their divorced bosses with unforecasted results in this electrifying romance from the author of *The Ex Talk*. Ari Abrams has always been fascinated by the weather, and she loves almost everything about her job as a TV meteorologist. Her boss, legendary Seattle weatherwoman Torrance Hale, is too distracted by her tempestuous relationship with her ex-husband, the station's news director, to give Ari the mentorship she wants. Ari, who runs on sunshine and optimism, is at her wits' end. The only person who seems to understand how she feels is sweet but reserved sports reporter Russell Barringer. In the aftermath of a disastrous holiday party, Ari and Russell decide to team up to solve their bosses' relationship issues. Between secret gifts and double dates, they start nudging their bosses back together. But their well-meaning meddling backfires when the real chemistry builds between Ari and

Russell. Working closely with Russell means allowing him to get to know parts of herself that Ari keeps hidden from everyone. Will he be able to embrace her dark clouds as well as her clear skies?

Ex-husband, Let Me Go Book#1 NovelCat,2022-11-01 On the seventh day of marriage, Ji Yan was still locked up in the basement. She was forcibly sent to Shang family by her parents to replace her sister and marry the monster man, Shang Jinshen, who is rumored to be unable to walk. During these seven days, only one hot man comes to the basement every day to see her and provoke her. That time, she decides to fight back and bites the man, but she pays the price by having her first time taken away by the hot man. Finally, after ten days of captivity, she was released. When the Madam of the Shang family humiliates her for her poverty, her so-called husband shows up to defend her. She saw Shang Jinshen sitting in a wheelchair with many scars on his face. But what she doesn't know is that this image of weakness is a pretence by Shang Jinshen. The man who took away her virginity is the real Shang Jinshen.

Build a Weather Station with Elixir and Nerves Alexander

Koutmos, Bruce Tate, Frank Hunleth, 2022-01-06 The Elixir programming language has become a go-to tool for creating reliable, fault-tolerant, and robust server-side applications. Thanks to Nerves, those same exact benefits can be realized in embedded applications. This book will teach you how to structure, build, and deploy production grade Nerves applications to network-enabled devices. The weather station sensor hub project that you will be embarking upon will show you how to create a full stack IoT solution in record time. You will build everything from the embedded Nerves device to the Phoenix backend and even the Grafana time-series data visualizations. Elixir as a programming language has found its way into many different software domains, largely in part to the rock-solid foundation of the Erlang virtual machine. Thanks to the Nerves framework, Elixir has also found success in the world of embedded systems and IoT. Having access to all of the Elixir and OTP constructs such as concurrency, supervision, and immutability makes for a powerful IoT recipe. Find out how to create fault-tolerant, reliable, and robust embedded applications using the Nerves framework. Build and deploy a production-grade weather station sensor hub using Elixir and

Nerves, all while leveraging the best practices established by the Nerves community for structuring and organizing Nerves applications. Capture all of your weather station sensor data using Phoenix and Ecto in a lightweight server-side application. Efficiently store and retrieve the time-series weather data collected by your device using TimescaleDB (the Postgres extension for time-series data). Finally, complete the full stack IoT solution by using Grafana to visualize all of your time-series weather station data. Discover how to create software solutions where the underlying technologies and techniques are applicable to all layers of the project. Take your project from idea to production ready in record time with Elixir and Nerves. What You Need: To complete the Nerves weather station project in this book, you will need the following: A Linux, MacOS, or Windows computer to build and deploy Nerves firmware images A Raspberry Pi Zero W or any other Nerves supported target (<https://hexdocs.pm/nerves/targets.html#supported-targets-and-systems>) A VEML6030 light sensor An BME680 environmental sensor An SGP30 air quality sensor Qwiic connect cables for weather sensors

The Time of New Weather Sean Murphy, 2004-12-28 THE TIME OF NEW WEATHER IS AT HAND--AND IT'S NOT A PRETTY SIGHT. In this exhilarating adventure of absurdist wit, rollicking revolution and romance, the future isn't what it used to be and the past won't leave us alone. Bringing to mind 1984 and Brave New World--but with his own twist of gleeful humor--award-winning author Sean Murphy presents a vision of an America gone off the rails: an America where it literally rains cats and dogs, where a hubcap ranch is now a National Preservation Site, where a horde of circus folk and Elvis fans are on the rampage--and where some rather suspicious things are going on with time and gravity. Into this world is born Buddy Le Blanc, a young boy with a special gift: the ability to perform tiny miracles. Nothing big, like raising the dead or curing the sick--more like an uncanny knack for finding spare change. He longs to find a way to make a difference; but in a world where time and gravity storms can spring up at a moment's notice (sending your belongings hurtling through the roof, or off to the Renaissance) and big business has gobbled up the U.S. government (now renamed The America Corporation), it's hard to get your foot in the door. But when Buddy joins up with a cast of fellow seekers--renegade circus freaks, ragtag

revolutionaries, a woman in search of her hat, and a particularly gorgeous journalist—in the hope of waking America up from its dream, the fate of the country may just end up in his not-so-capable hands....
