**The Secret World of Weather: How to Read Signs in Every Cloud, Breeze, Hill, Street, Plant, Animal, and Dewdrop (Natural Navigation)** Tristan Gooley, 2023-02-28 Learn to “see” the forecast in the hidden weather signs all around you—from the New York Times–bestselling author of *How to Read a Tree* and *The Lost Art of Reading Nature’s Signs* In *The Secret World of Weather*, bestselling author Tristan Gooley turns his gaze up to the sky, bringing his signature brand of close observation and eye-opening deduction to the fascinating world of weather. Every cloud, every change in temperature, every raindrop, every sunbeam, every breeze reveals something about our weather—if you know what to look for. Before you know it, you’ll be able to forecast impending storms, sunny days, and everything in between, all without needing to consult your smartphone. But *The Secret World of Weather* goes far beyond mere weather prediction, changing the very way we think about weather itself. Weather is not something that blankets an area; rather, it changes constantly as you walk through woods or turn down a street. The weather is never identical on two sides of a tree—or even beneath it. Take, for example, Gooley’s remarkable discovery that breezes accelerate beneath a tree. To Gooley, this is “weather,” a tiny microclimate that explains why people sit beneath a tree to cool down—not only for the shade but, subconsciously, for cooler breeze. And so Gooley shows us not only what the weather will be like five days from now, but also what to expect about the weather around every corner. By carefully observing the subtle interplay of wind, cloud, fog, temperature, rain and many other phenomena, we not only form a deeper understanding of weather patterns, but also unlock secrets about our environment. Weather forms our landscape, and landscape forms our weather. Everything we see in the sky reflects where we are. When we learn to read weather’s signs, Gooley shows us, the weather becomes our map, revealing to us how it has made our towns, cities, woods, and hills what they are. You’ll never see your surroundings the same way again.

*Look Up to See What the Weather Will Be* Guy Brown, 2021-11-07 Should we bring raincoats to the big game? Will the fog lift before we get to the coast? Should we let in the animals in case there is a tornado this afternoon? People love talking about the weather, but it is more than just conversation. Weather can change rapidly and produce suddenly hazardous conditions. Studying data from satellites, radar, and other technology helps us prepare and stay safe. Animals, on the other hand, also need to predict the weather. They rely on their senses to know what to expect so they can stay warm in a blizzard, remain cool in a heat wave, or find food in a fog bank. Hours before we wake up, weather anchor Guy Brown is at the TV studio reviewing atmospheric readings, humidity rates, and Doppler reports. He needs to tell his viewers how to plan for the days ahead. He also introduces some of the animals who forecast weather in environments around the world. With Mario Lugo's vivid art, readers see some of the amazing clouds that bring us wildly different weather and learn how animals use their adaptations to weather the storms. Guy acquaints readers with cloud identification techniques while sharing a glimpse into survival--in town and in the wild.
