**Digital Safety in Railway Transport—Aspects of Management and Technology** Adam Jabłoński, Marek Jabłoński, 2022-03-15 This book introduces modern safety management in rail transport, focusing on the challenges resulting from the digital economy. It details how the cybersecurity of railway technical systems and risk can be managed. The rail transport sector is increasingly integrated into the digital economy. Ensuring the safety of technical systems and managing the rail system as a whole are key challenges for rail transport designers, managers, users and other stakeholders. Developing of rail transport based on the interoperability of different systems requires both searching for modern solutions and ensuring a high level of standardization of processes. In the context of the widespread digitalization of railway systems, new hazards arise that can lead to undesirable events. This book examines these issues. The book will be of interest to rail professionals, and researchers into transport systems and reliability.

**Legacies of Trade and Empire** Shihan de Silva Jayasuriya,Beheroze Shroff,2023-04-20 This book problematises established histories of slavery and indentured labour, as carried out through European

empires, to interpret the impact of trade, particularly in the region surrounding the Indian Ocean. The discourse within these chapters explores the aesthetics of silence, poetics of relation, creolisation, agency and assertion of identities, musical practices, cuisine, knowledge transfers, decolonisation, and afterlives of empire. These critical analyses draw from Africa, India, Indonesia, Seychelles, Sri Lanka and Suriname as their case studies. This book breaks the silence on several legacies of empire, looking through the prisms of history, politics, economics, sociology, linguistics, literature, anthropology and ethnomusicology, all the while employing a range of concepts. The authors of these chapters search through the annals of history for ways of living harmoniously in an increasingly globalised world.

**Designing Smart and Resilient Cities for a Post-Pandemic World** Anthony Larsson, Andreas Hatzigeorgiou, 2022-08-31 Are pandemics the end of cities? Or, do they present an opportunity for us to reshape cities in ways making us even more innovative, successful and sustainable? Pandemics such as COVID-19 (and comparable disruptions) have caused intense debates over the future of cities. Through a series of investigative studies, *Designing Smart and Resilient Cities for a Post-Pandemic World: Metropandemic Revolution* seeks to critically discuss and compare different cases, innovations and approaches as to how cities can utilise nascent and future digital technology and/or new strategies in order to build stronger resilience to better tackle comparable large-scale pandemics and/or disruptions in the future. The authors identify ten separate societal areas where future digital technology can impact

resilience. These are discussed in individual chapters. Each chapter concludes with a set of proposed action points based on the conclusions of each respective study. These serve as solid policy recommendations of what courses of action to take, to help increase the resilience in smart cities for each designated area. Securing resilience and cohesion between each area will bring about the metropandemic revolution. This book features a foreword by Nobel laureate Peter C. Doherty and an afterword by Professor of Urban Technologies, Carlo Ratti. It provides fresh and unique insights on smart cities and futures studies in a pandemic context, offers profound reflections on contemporary societal functions and the needs to build resilience and combines lessons learned from historical pandemics with possibilities offered by future technology.
