Digital Safety in Railway Transport—Aspects of Management and Technology Adam

Jabłoński, Marek Jabłoński, 2022-03-15 This book introduces modern safety management in rail transport, focusing on the challenges resulting from the digital economy. It details how the cybersecurity of railway technical systems and risk can be managed. The rail transport sector is increasingly integrated into the digital economy. Ensuring the safety of technical systems and managing the rail system as a whole are key challenges for rail transport designers, managers, users and other stakeholders. Developing of rail transport based on the interoperability of different systems requires both searching for modern solutions and ensuring a high level of standardization of processes. In the context of the widespread digitalization of railway systems, new hazards arise that can lead to undesirable events. This book examines these issues. The book will be of interest to rail professionals, and researchers into transport systems and reliability.

Trübner's American and Oriental Literary Record, 1869 A monthly register of the most important works published in North and South America, in India, China, and the British colonies: with occasional notes on German, Dutch, Danish, French, Italian, Spanish, Portuguese, and Russian books.

EXCELLENCE IN METRO OPERATIONS AND MANAGEMENT SHARMA,

SHARAT, JAIN, AMIT KUMAR, DEVENDRA, SANKALP, 2022-12-19 The challenges in metro operations keep the operations managers on their toes to continually explore innovative ways to resolve the day-to-day issues and keep the organization sustainable. In absence of any precedence, often solutions are tried ab initio. The book presents comprehensive coverage of various operational issues such as running of trains, customer-centric timetabling, management of stations, depot, control center, crew, collection of fare and non-fare revenue, maintenance of assets, human resources management, integrated transport, driverless trains, adoption of AI/ML/IoT, and predictive maintenance. The book is designed for transport professionals engaged in management of urban transportation services. It will also be very useful for students undertaking courses on Urban Transport and Railway Systems. **KEY FEATURES** • Innovative O&M practices based on real-life experiences—case studies and examples included • Emerging technologies in metro operations such as Driverless Operations, Artificial Intelligence, Internet of Things (IoT), and Predictive Maintenance • Excel program to estimate human resources required to operate the metro rail system commensurate with the facilities created • List of data and KPIs required to monitor the performance of a metro rail system **TARGET AUDIENCE** • Transport Professionals engaged in Metro and Railway Operations and Planning • Students undertaking courses on Urban Transport and Railway Systems

Distributed Computing, Artificial Intelligence, Bioinformatics, Soft Computing, and Ambient Assisted Living Sigeru Omatu, Miguel P. Rocha, Florentino Fdez Riverola, Jose Bravo, Emilio Corchado, Juan Manuel Corchado Rodríguez, Andrés Bustillo, 2009-06-08 This book constitutes the refereed proceedings of the 10th International Work-Conference on Artificial Neural Networks, IWANN 2009, held in Salamanca, Spain in June 2009. The 167 revised full papers presented together with 3 invited lectures were carefully reviewed and selected from over 230 submissions. The papers are organized in thematic sections on theoretical foundations and models; learning and adaptation; self-organizing networks, methods and applications; fuzzy systems; evolutionary computation and genetic algorithms; pattern recognition; formal languages in linguistics; agents and multi-agent on intelligent systems; brain-computer interfaces (bci); multiobjective optimization; robotics; bioinformatics; biomedical applications; ambient assisted living (aal) and ambient intelligence (ai); other applications.

Legacies of Trade and Empire Shihan de Silva Jayasuriya, Beheroze Shroff, 2023-04-20 This book problematises established histories of slavery and indentured labour, as carried out through European empires, to interpret the impact of trade, particularly in the region surrounding the Indian Ocean. The discourse within these chapters explores the aesthetics of silence, poetics of relation, creolisation, agency and assertion of identities, musical practices, cuisine, knowledge transfers, decolonisation, and afterlives of empire. These critical analyses draw from Africa, India, Indonesia, Seychelles, Sri Lanka and Suriname as their case studies. This book breaks the silence on several legacies of empire, looking through the prisms of history, politics, economics, sociology, linguistics, literature, anthropology and ethnomusicology, all the while employing a range of concepts. The authors of these chapters search through the annals of history for ways of living harmoniously in an increasingly globalised world.

Safety and Reliability - Safe Societies in a Changing World Stein Haugen, Anne Barros, Coen van Gulijk, Trond Kongsvik, Jan Erik Vinnem, 2018-06-15 Safety and Reliability - Safe Societies in a Changing World collects the papers presented at the 28th European Safety and Reliability Conference, ESREL 2018 in Trondheim, Norway, June 17-21, 2018. The contributions cover a wide range of methodologies and application areas for safety and reliability that contribute to safe societies in a changing world. These methodologies and applications include: - foundations of risk and reliability assessment and management - mathematical methods in reliability and safety - risk assessment - risk management - system reliability - uncertainty analysis - digitalization and big data - prognostics and system health management - occupational safety - accident and incident modeling - maintenance modeling and applications - simulation for safety and reliability analysis - dynamic risk and barrier management - organizational factors and safety culture - human factors and human reliability - resilience engineering - structural reliability - natural hazards - security - economic analysis in risk management Safety and Reliability - Safe Societies in a Changing World will be invaluable to academics and professionals working in a wide range of industrial and governmental sectors: offshore oil and gas, nuclear engineering, aeronautics and aerospace, marine transport and engineering, railways, road transport, automotive engineering, civil engineering, critical infrastructures, electrical and electronic engineering, energy production and distribution, environmental engineering, information technology and telecommunications, insurance and finance, manufacturing, marine transport, mechanical engineering, security and protection, and policy making.

Designing Smart and Resilient Cities for a Post-Pandemic World Anthony

Larsson, Andreas Hatzigeorgiou, 2022-08-31 Are pandemics the end of cities? Or, do they present an opportunity for us to reshape cities in ways making us even more innovative, successful and sustainable? Pandemics such as COVID-19 (and comparable disruptions) have caused intense debates over the future of cities. Through a series of investigative studies, *Designing Smart and Resilient Cities for a Post-Pandemic World: Metropandemic Revolution* seeks to critically discuss and compare different cases, innovations and approaches as to how cities can utilise nascent and future digital technology and/or new strategies in order to build stronger resilience to better tackle comparable large-scale pandemics and/or disruptions in the future. The authors identify ten separate societal areas where future digital technology can impact resilience. These are discussed in individual chapters. Each chapter concludes with a set of proposed action points based on the conclusions of each respective study. These serve as solid policy recommendations of what courses of action to take, to help increase the resilience in smart cities for each designated area. Securing resilience and cohesion between each area will bring about the metropandemic revolution. This book features a foreword by Nobel laureate Peter C. Doherty and an afterword by Professor of Urban Technologies, Carlo Ratti. It provides fresh and unique insights on smart cities and futures studies in a pandemic context, offers profound reflections on contemporary societal functions and the needs to build resilience and combines lessons learned from historical pandemics with possibilities offered by future technology.
