The Hydraulic Gold Miner's Manual (Classic Reprint) T. S. G.

Kirkpatrick, 2018-02 Excerpt from The Hydraulic Gold Miner's Manual
Sufficient data are given to enable any one who has a competent knowledge of pick-and-shovel work, and of the use of carpenter's tools, to construct the necessary plant for successful Hydraulic Mining. The ditches and sluices are laid out on a scale sufficient to move from 2000 to 5000 tons of pay dirt in the 24 hours, and are the result of experience gained in the management of very successful undertakings. The measurements and estimates are furnished by Mr. W. S. Welton, the engineer who laid out the Colombian Hydraulic gold mine. Lode Gold Mining in Arizona Arizona Bureau Mines, 2015-08-05
Leading mining historian Kerby Jackson introduces us to a classic mining publication on the Gold Mining Industry in Arizona. Unavailable since 1934, this hard to find publication, originally released as *Arizona Lode Gold Mines and Gold Mining* includes valuable insights into the gold mining industry of Arizona. Included are valuable insights into over 150 hardrock gold mines in over 30 different mining districts in Arizona. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight imperfections or minor shadows in the page background.

Gold Mining in Gilpin County Colorado Samuel Cushman, J. P. Waterman, Kerby Jackson, 2014-11-09 Mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of *The Gold Mines of Gilpin County Colorado*. Unavailable since 1876, this publication was originally compiled by the Register Steam Printing House of Central City, Colorado. This publication offers a rare glimpse at the gold mining history and early mines of Gilpin County, Colorado from their first discovery in the 1850's up to the flush years of the mid 1870's. Of particular interest is the history of the discovery of gold in Gilpin County and details about the men who made those first strikes. Special focus is given to the early gold mines and first mining districts of the area, many of which are not detailed in other books on Colorado's gold mining history. Also included is some interesting advertising from early merchants and companies that supported the miners during Gilpin County's gold rush, as well as insights into local civic groups and other organizations that played an important role in the lives of most Gilpin County miners. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight imperfections or minor shadows in the page background.

Gold Mining in Eastern Oregon United States Bureau

Mines, Kerby Jackson, 2014-11-09 Mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of the United States Bureau of Mines publication *Gold Mining and Milling in North Eastern Oregon*. Originally published in 1938, this important publication on Oregon Mining has not been available for over a century. Included in this volume are important insights into the famous mining districts of Eastern Oregon during the late 1930's. Particular attention is given to those gold mines with milling and concentrating facilities in the Greenhorn, Red Boy, Alamo, Bonanza, Granite, Cable Cove, Cracker Creek, Virtue, Keating, Medical Springs, Sanger, Sparta, Chicken Creek, Mormon Basin, Connor Creek, Cornucopia and the Bull Run Mining Districts. Some of the mines featured include the Ben Harrison, North Pole-Columbia, Highland Maxwell, Baisley-Elkhorn, White Swan, Balm Creek, Twin Baby, Gem of Sparta, New Deal, Gleason, Gifford-Johnson, Cornucopia, Record, Bull Run, Orion and others. Of particular interest are the mill flow sheets and descriptions of milling operations of these mines. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight

imperfections or minor shadows in the page background.

The Mayflower Gold Mine Mayflower Gold Mine,1893

Placer Mining for Gold in California (Classic Reprint) Charles Volney Averill,2017-10-11 Excerpt from Placer Mining for Gold in California The increase in the price of gold from in 1932 to in 1933 and to in 1934 made such stories seem even more plausible and helped further to stimulate the migration of men to the creeks, despite the unfortunate experiences related by most of those drifting back from the gold-bearing areas. Stories of those who succeeded in making a living and of the very few who made strikes continued to be magnified out of all proportion, both in passing from mouth to mouth and in the press, and brought new recruits to the streams as late as 1937. It is obvious to those versed in gold mining that the facts are greatly exaggerated in these stories. To the hard-pressed unemployed, however, these accounts sounded like the answer to their need. How could they know that for every one who made a strike in placer mining, tens of thousands would find little or nothing, that not more than a few score at most could possibly expect to develop a profitable lode mine, and that large amounts of capital would be required for most of these mines? The experience of the thousands who are unsuccessful in placer ing

does not make news; the story of the man here and there who is lucky does. Most of the accounts were stories of success, stories which were news but which were misleading to the unemployed. Six Months in the Gold Mines During the California Gold Rush

E. Buffum, 2014-12 Leading mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of *Six Months in the Gold Mines: From A Journal of Three Years Residence In Upper and Lower California, 1847 to 1849*. Unavailable since 1850, this important work is a first hand account of one 49'ers personal experience during the great California Gold

Rush, shedding important light on one of the most exciting periods in the history of not only California, but also the world. Compiled from journals written between 1847 and 1849 by E. Gould Buffum, a native of New York, *Six Months In The Gold Mines During The California Gold Rush* offers a rare look into the day to day lives of the people who came to California to work in her gold mines when the state was still a great frontier. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight imperfections or minor shadows in the page background.

An Alaskan Gold Mine Leland Carlson, 2015-08-01 *An Alaskan Gold Mine: The Story of No. 9 Above* is a notable and tragic story of the discovery of Alaska gold in 1898. The mine had so many implications for leaders and institutions of the Evangelical Covenant Church, a tangled and contested case of ownership extending over two decades that went to the Supreme Court of the United States on four occasions. Visiting Alaska three times doing meticulous research into legal proceedings and conducting oral interviews, Carlson succeeded in crafting a compelling narrative of gold, grief, and greed. *An Alaskan Gold Mine: The Story of No. 9 Above* remains a classic case study of the Alaska gold rush as a whole,

as well as the particular context of issues and personalities unique to the bonanza claim staked by a Covenant missionary on Anvil Creek above the boomtown Nome.

Famous Gold Nuggets of the World (Classic Reprint) Thomas Jefferson Hurley, 2015-08-04 Excerpt from Famous Gold Nuggets of the World In these days of wonderful gold discoveries one is apt to forget the big finds of the past, which set the world wild with excitement and gave such impetus to mining about half a century ago. This brief account of famous gold nuggets will help to revive the memories of the golden days of Australia and California, and to show how history tends to repeat itself in gold mining as well as in other mundane affairs. The data has been gathered from many sources, involving a large amount of research, which extended over the face of the globe. In procuring this information the compiler has corresponded with some two hundred persons, to many of whom he is indebted for whatever credit may be attached to his efforts. He ventures to believe that the result will be found of deep interest to all concerned in mining and mining matters. For much of the material used the compiler is indebted to the Engineering and Mining Journal and American Mining News, of New York; the Mining and Scientific Press, of San Francisco;

Mining Reporter, of Denver; Mining Record, of Colorado Springs; the Australian Mining Standard, of Melbourne; Mining and Metallurgical Journal, Los Angeles, California; ex-United States Mining Commissioner R. W. Raymond, and representative mining engineers residing in all parts of the world. With one exception, no mention is made of nuggets found in South America or Mexico, the compiler having been unable to collect reliable data from these countries, excepting as to their gross gold and silver output. All About the Klondyke Gold Mines (Classic Reprint) J. Armoy Knox,2015-07-20 Excerpt from All About the Klondyke Gold Mines Sitka appears at the southeast corner of this map, and northeast of

it is Juneau, the usual fitting out place for miners going to the Yukon. The arrows show the route of miners bound for the Yukon. Steamboats can carry them from Juneau as far as Ty-a. Then they must pack their loads through Chilkoot Pass and boat them through a chain of lakes and down the Lewis River to the Yukon. It is about 700 miles from Juneau to the Klondyke River. The two other most important centres of Yukon mining were Forty Mile Creek, where there were two big mining camps, Forty Mile and Fort Cudahy, and Circle City. All these camps have now been practically deserted in the great rush for the Klondyke. The ever reliable and always trustworthy New York Sun publishes the map as given above. Six Months in the Gold Mines E. Gould Buffum, 2017-12-10

Excerpt from Six Months in the Gold Mines: From a Journal of Three Years' Residence in Upper and Lower California, 1847-8-9

The now famous city of San Francisco, situated near the extreme end of a long and barren peninsular tract of land, which separates the bay of San Francisco from the ocean, when first I landed, on its beach was almost a solitude, there being not more than twelve or fifteen rough houses, and a few temporary buildings for hides, to relieve the View. Where now stands the great commercial metropolis of the Pacific, with its thirty thousand inhabitants. About the

The Gold Fields of Eastern Oregon Baker City Chamber of Commerce, Kerby Jackson, 2014-10-17 Mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of “Commercial Report on the Gold Fields of Eastern Oregon”. Unavailable since 1900, this publication was originally compiled by the Baker City Chamber of Commerce Offering important insights into the gold mining history of Eastern Oregon, “The Gold Fields of Eastern Oregon” sheds a rare light on many of the gold mines that were operating at the turn of the 19th Century in Baker County and Grant County in North Eastern Oregon. Some of the areas featured include the Cable Cove District, Baisely-Elhorn, Granite, Red Boy, Bonanza, Susanville, Sparta, Virtue, Vaughn, Sumpter, Burnt River, Rye Valley and other mining districts. Included is basic information on not only many gold mines that are well known to those interested in Eastern Oregon mining history, but also many mines and prospects which have been mostly lost to the passage of time. Accompanying are numerous rare photos. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. The Gold Mines of the Rand Frederick H. Hatch, 2017-10-12

Excerpt from *The Gold Mines of the Rand: Being a Description of the Mining Industry of Witwatersrand, South Republic* The township of Johannesburg was marked off towards the end of 1886. The first sale of building sites took place in December 1886, and realised prices ranging from a few shillings to £200. The first mill of any size was a 30-head Frazer and Chalmers battery, erected early in the year 1887 for the Transvaal-pretoria Gold Mining Company. Coal was discovered in December 1887 at Boksburg in the near neighbourhood of the diggings, and this discovery led to the opening of several collieries (Brakpan, Springs, Olifants River, There is no doubt that the prosperity of the Rand Gold Fields is in a measure due to the fortunate accessibility of abundant and, consequently, cheap fuel. Are there any free alternatives to Adobe Acrobat for working with PDFs? Yes, there are many free alternatives for working with PDFs, such as: LibreOffice: Offers PDF editing features. PDFsam:	Allows splitting, merging, and editing PDFs. Foxit Reader: Provides basic PDF viewing and editing capabilities. How do I compress a PDF file? You can use online tools like Smallpdf, ILovePDF, or desktop software like Adobe Acrobat to compress PDF files without significant quality loss. Compression reduces the file size, making it easier to share and download. Can I fill out forms in a PDF	file? Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these
