The Book of Affirmations® Noah St. John, 2013-08-19 Did you know that asking a new kind of question can immediately change your life? One morning in 1997, college student Noah St. John was in the shower when he asked himself a question that changed his life: Why are we trying to change our lives saying statements we don't believe . . . when the human mind responds automatically to something even more powerful? That's when he invented the stunningly simple yet amazingly effective method he named Affirmations—a method that's since helped tens of thousands of people around the world to attract more money, lose hundreds of pounds, find their soul mates, grow their businesses, and dramatically improve their lives, with just four simple steps. The Book of Affirmations isn't just another book on abundance. It's a proven, step-by-step guidebook to living the life of your dreams. Inside this book, you'll discover: • What the Belief Gap is and why it's keeping you stuck • How a struggling insurance salesman increased his income by 560 percent in less than a year—and found the love of his life—using this method • How a 13-year-old girl cured her chronic insomnia using this simple technique—in just one night • What they told you about the Law of Attraction that's just flat-out wrong • How to quit smoking and overcome depression without drugs or therapy • The 2 most effective questions of all time, and the 1 question you should never ask • How to create instant superstar performance in yourself and everyone in your organization • And that's just the beginning . . . Are you ready to join the Affirmations Revolution?

The Second Offline Hidenori Tomita,2021-09-01 This book presents current research on mobile Internet society. Past research was not able to show a clear analytical framework, thus was unable to close in on the fundamental changes in that society. This book, however, analyzes mobile Internet society by introducing the concept of “doubling of time and place” and the analytical framework of the “second offline.” The emergence of the smartphone has made Internet use easier, and now, people are constantly using online information in the midst of their daily lives. Our society is transitioning from the first offline society, a society without being connected to Internet, to the second offline society, where users are connected to the Internet at all times. In this second offline

society, our sense of time and place are beginning to change. Broadcast and communication media have made possible the overlapping of different places, which has been called the doubling of place. Furthermore, virtual reality (VR) and augmented reality (AR) technologies have enabled the overlap of different times, which this book calls the doubling of time. The smartphone makes both possible. With the second offline and the doubling of time and place as keywords, the book takes into consideration research that includes, among other topics, the media usage of young adults, selfies, education, social media usage, mobile games, work stations, and consumer activity in the mobile Internet society.
