Smart Health Hsinchun Chen, Qing Fang, Daniel Zeng, Jiang Wu, 2018-10-25 This book constitutes the thoroughly refereed post-conference proceedings of the International Conference for Smart Health, ICSH 2018, held in Wuhan, China, in July 2018. The 14 full papers and 21 short papers presented were carefully reviewed and selected from 49 submissions. They focus on studies on the principles, approaches, models, frameworks, new applications, and effects of using novel information technology to address healthcare problems and improve social welfare. The selected papers are organized into the following topics: smart hospital; online health community; mobile health; medical big data and healthcare machine learning; chronic disease management; and health informatics.

Global Wikipedia Pnina Fichman, Noriko Hara, 2014-05-15 Dozens of books about Wikipedia are available, but they all focus on the English Wikipedia and assume an Anglo-Saxon perspective, while disregarding cultural and language variability or multi-cultural collaborative efforts. They address the impact of Wikipedia on society, processes of mass knowledge production, and the dynamics of the Wikipedia community. However, none of them focus on Wikipedia's global features. This lack of attention presents a serious problem because more than 80% of Wikipedia articles are written in languages other than English---in fact, Wikipedia includes articles in 285 languages. **Global Wikipedia: International and Cross-Cultural Issues in Online Collaboration** is the first book to address this gap by focusing attention on the global, multilingual, and multicultural aspects of Wikipedia. The editors showcase research on Wikipedia, exploring a wide range of international and cross-cultural issues. Online global collaboration, coordination, and conflict management are examined in this rich socio technical environment. Special emphases include International and cross-cultural collaboration; Intercultural synergy on Wikimedia; Conflict and collaboration in editing international entries; Case studies of Chinese, Finnish, French, and Greek Wikipedias; and, Cross-cultural studies that compare more than one Wikipedia, focusing on content, structures, policies, contributions, interactions, processes, motivations, and challenges.

China's Health Silk Road Gerald Chan, 2024-03-14 In the fourth instalment of his 'Belt and Road Initiative' series, Gerald Chan provides a critical analysis of China's vaccine diplomacy. Locating it within China's wider infrastructure development strategy, Chan deploys geo-developmentalism as a theoretical tool to analyse its contribution to a new global health order, particularly with the pandemic pushing the country to the forefront of vaccine exportation.

Social Media Analytics and Practical Applications Subodha Kumar, Liangfei Qiu, 2021-12-30 Social Media Analytics and Practical Applications: The Change to the Competition Landscape provides a framework that allows you to understand and analyze the impact of social media in various industries. It illustrates how social media analytics can help firms build transformational strategies and cope with the challenges of social media technology. By focusing on the relationship between social media and other technology models, such as wisdom of crowds, healthcare, fintech and blockchain, machine learning methods, and 5G, this book is able to provide applications used to understand and analyze the impact of social media. Various industries are called out and illustrate how social media analytics can help firms build transformational strategies and at the same time cope with the challenges that are part of the landscape. The book discusses how social media is a driving force in shaping consumer behavior and spurring innovations by embracing and directly engaging with consumers on social media platforms. By closely reflecting on emerging practices, the book shows how to take advantage of recent advancements and how business operations are being revolutionized. Social Media Analytics and Practical Applications is written for academicians and professionals involved in social media and social media analytics.

Global Telehealth 2015: Integrating Technology and Information for Better Healthcare G. Gillis, D. Newsham, A.J. Maeder, 2015-05-20 The adoption of telehealth is growing, accompanied by a diversification of service delivery and a broadening of access. All of this is pushing the boundaries of traditional healthcare worldwide. Latest developments include the growth of Mobile Health (mHealth), with access to information and services by means of personal devices such as tablet computers and smart phones, virtual healthcare services, which use online interactive environments to engage with the subject of care and remotely enable or mimic the desired patient-clinician relationship, and the personal and home health monitoring market. This book presents the proceedings of Global Telehealth 2015 (GT2015), hosted by COACH: Canada's Health Informatics Association, and held in May 2015, in Toronto, Canada. The theme of this year's conference is 'Serving the Underserved: Integrating Technology & Information for Better Healthcare'. The leadership and knowledge reflected in the 25 papers collected here will promote the equity of access and uniform provision of healthcare services and influence health policy and strategic decisions worldwide, and the book will

be of interest to all those whose work involves the various forms of telehealth in use today.

China's Commercial Health Insurance China Development Research Foundation, 2020-08-18 This book examines the financing of China's health system, argues that present arrangements are not adequate and proposes an increased role for commercial health insurance as a way of overcoming the difficulties. Highlighting that China's present social medical insurance system can only cover basic medical services, with the results that many Chinese people with higher income are going abroad for high-quality medical services and that doctors are not bringing in the salaries and obtaining the social status they expect, the book suggests that commercial health insurance offers a possible solution, in that it can help meet the demand of higher-income groups for better healthcare services while at the same time increasing the income of more competent medical professionals. The book goes on to consider the current state of China's commercial insurance industry, outlining the various challenges that the industry needs to overcome if it is to fulfil an increased role, challenges such as greater specialization, increased capacity, structural reform, improved regulation and closer integration with China's medical reform programme.

The Good Doctor Ron Paterson, 2013-10-01 What makes a good doctor? Are there bad doctors out there - and if so how do we protect patients from them? Can we inject more information, more trust and more assured competence into the medical system to solve these problems? Drawing on his years of dealing with patient concerns, Ron Paterson tackles these important questions. The book makes challenging arguments: that patients don't demand the sort of information about doctors that they should; that doctors who feel put upon by information overload, patient demands, complaints and growing requirements from employers, colleges, medical boards and government, will be resistant to any additional regulation of their activity; that doctors are reluctant to judge problem doctors and prefer the 'quiet chat'; and that current law and practice is lax when it comes to checking that doctors remain up-to-date. Paterson concludes the book with proposals to lift the veil of secrecy, to inform patients better and to revalidate doctors periodically, all key ways we might improve patient care. The Good Doctor will be prescribed reading for doctors, patients and policymakers—all of those determined to make sure patients get the medical care they deserve.

Healthcare Reform in China Carine Milcent, 2018-02-14 How efficient is the Chinese healthcare system? Milcent examines the medication market in China against the global picture of healthcare organization, and how public healthcare insurance plans have been implemented in recent years, as well as reforms to tackle hospital inefficiency. Healthcare reforms, demographic changes and an increase in wealth inequity have altered healthcare preferences, which need to be addressed. Significantly, the patient–medical staff relationship is analysed, with new proposals for different lines of communication. Milcent puts forward digital healthcare in China as a tool to solve inefficiency and rising tensions, and generate profit. Where China is leading in the digitalization of healthcare, other countries can learn important lessons. Chinese social models are also put into context with respect to current reforms and experimentation.
