The Common Wind Julius S. Scott,2018-11-27 Winner of the 2019 Stone Book Award, Museum of African American History A remarkable intellectual history of the slave revolts that made the modern revolutionary era The Common Wind is a gripping and colorful account of the intercontinental networks that tied together the free and enslaved masses of the New World. Having delved deep into the gray obscurity of official eighteenth-century records in Spanish, English, and French, Julius S. Scott has written a powerful “history from below.” Scott follows the spread of “rumors of emancipation” and the people behind them, bringing to life the protagonists in the slave revolution. By tracking the colliding worlds of buccaneers, military deserters, and maroon communards from Venezuela to Virginia, Scott records the transmission of contagious mutinies and insurrections in unparalleled detail, providing readers with an intellectual history of the enslaved. Though The Common Wind is credited with having “opened up the Black Atlantic with a rigor and a commitment to the power of written words,” the manuscript remained unpublished for thirty-two years. Now, after receiving wide acclaim from leading historians of slavery and the New World, it has been published by Verso for the first time, with a foreword by the academic and author Marcus Rediker.

Braving the Currents Tamra Pearson d'Estree,Bonnie B.G. Colby,2004-08-03 This thoughtful reference identifies, applies, and evaluates criteria to define success in complex multi-party natural resource disputes. The authors examine 28 success criteria from many angles, present a method for systematically considering all the elements necessary for successful environmental CR, and then apply this analytic framework to eight specific western U.S. water conflicts.

Residue Currents and Bezout Identities C.A. Berenstein,R. Gay,A. Vidras,A. Yger,2012-12-06 A very primitive form of this monograph has existed for about two and a half years in the form of handwritten notes of a course that Alain Y ger gave at the University of Maryland. The objective, all along, has been to present a coherent picture of the almost mysterious role that analytic methods and, in particular, multidimensional residues, have recently played in obtaining effective estimates for problems in commutative algebra [71;5]* Our original interest in the subject rested on the fact that the study of many questions in harmonic analysis, like finding all distribution solutions (or finding out whether there are any) to a system of linear partial differential equations with constant coefficients (or, more generally, convolution equations) in \mathbb{R}^n , can be translated into interpolation problems in spaces of entire functions with growth conditions. This idea, which one can trace back to Euler, is the basis of Ehrenpreis's Fundamental Principle for partial differential equations [37;5], [56;5], and has been explicitly stated, for convolution equations, in the work of Berenstein and Taylor [9;5] (we refer to the survey [8;5] for complete references.) One important point in [9;5] was the use of the Jacobi interpolation formula, but otherwise, the representation of solutions obtained in that paper were not explicit because of the use of $\bar{\partial}$ -methods to prove interpolation results.

Deep Currents and Rising Tides John Garofano,Andrea J. Dew,2013-04-29 This volume, one of the first attempts to treat the Indian Ocean Region in a coherent fashion, captures the spectrum of cooperation and competition in the Indian Ocean Region. Contributors discuss points of cooperation and competition in a region that stretches from East Africa, to Singapore, to Australia, and assess the regional interests of China, India, Pakistan, and the United States.

Crossing Currents Michael B. Whiteford,Scott Whiteford,1998 Designed to expose readers to some of the most important critical thinking by anthropologists across a wide range of issues, this anthology combines a variety of works that examine Latin American cultures from a number of different perspectives. Very accessible and perceptive, it covers a wide range of topics -- beginning with a general overview of Latin America (observations about size of land mass, geography, population size and growth rates) and then highlighting some of the cultural characteristics that permit us to talk about Latin America -- balancing the incredible cultural diversity with some of the overriding features that give at least the appearance of similarity.

Undercurrents Steve Davis,2020-10-06 Improve your knowledge of the ways global trends shape activism with this insightful volume that will supercharge your impact on communities and organizations Undercurrents: Channeling Outrage to Spark Practical Activism brings the perspective of experienced global social innovation leader, scholar and speaker, Steve Davis, to bear on some of the most powerful and helpful macro trends rippling through society today. The book teaches readers how to harness their outrage and capitalize on global trends to instigate and encourage change across the world. The author identifies five global undercurrents with outsized importance that are shaping our world: Global economies are moving away from the old pyramid model into a diamond, bringing powerful new possibilities for human well-being; Communities are becoming the customer – rather than passive beneficiaries – as social change is increasingly led by local voices and activists; Equity is leveling and reshaping the field of social change and activism; Digital disruption, through the power of data and digital tools, impacts almost everything; and The middle of the journey to social change is becoming surprisingly sexy, as we focus on adapting innovation for widespread impact at scale. The book’s lessons are supported throughout by stories, experiences, data and observations from across the globe. Undercurrents is perfect for activists and leaders of all kinds who aim to increase their impact on their organizations and the world at large, as well as the intellectually curious who hope to increase their understanding of the changing world around them.
