Technology in Retrospect Richard A. Diem, Michael J. Berson, 2010-06-01 January 2009 marked the 25th anniversary of one of the most famous three minutes of television history. It was during half-time of the 1984 Super Bowl that APPLE show cased its new Macintosh Computer in an avant-guard commercial. In the following three weeks sales of the new computer, in both the public and private sectors, took off leading some to note this occasion as the true start of the information age. At the same time schools joined this so-called information revolution and began to use the new technology, in various forms, in a much more serious manner. Given both the changing nature of technology, as well as its classroom applications, over the past quarter century this work's goal is to capture the historical trends of both use and application of information technology in the social studies during this era. This is done by providing a retrospective view , from 1984 through 2009 , of where we've been, where we are, and a view of new tools and strategies and possible studies that are emerging that can enhance our understanding of the effects that technology has and will have on the social studies.

Students Taking Action Together Lauren M. Fullmer, Laura F. Bond, Crystal N. Molyneaux, Samuel J. Nayman, Maurice J. Elias, 2022-04-27 A field-tested, classroom-based approach for developing the critical thinking, social-emotional, problem-solving, and discussion skills students need to be good citizens and effective changemakers. We often hear that a key purpose of schooling is to prepare students for informed and active citizenship. But what does this look like in practice? How do teachers pursue this goal amid other pressing priorities, including student mastery of both academic content and social-emotional competencies? *Students Taking Action Together*, based on a program of the same name developed at Rutgers University, clarifies that the way to prepare young people for life in a democracy is by intentionally rehearsing democratic behaviors in the classroom. This field-tested program (STAT for short) is built on five research-backed teaching strategies that work with existing social studies, English language arts, and history curriculum in the upper-elementary, middle, and high school levels. Incorporating these strategies into your lessons is a way to meet students' natural desire to be heard with skill-building that empowers them to * Adhere to norms of civil conversation, even when topics are controversial and emotions are high; * Speak confidently and listen actively; * Engage in respectful debate aimed at understanding issues rather than winning points; * Target communication to different audiences, needs, and contexts; and * Examine problems from many sides, considering potential solutions, drawing up action plans, and evaluating these plans' effectiveness against historical examples. In addition to vignettes that show the five STAT strategies in action, you'll find practical teaching tips and sample STAT lesson plans. For school leaders, there is a road map for schoolwide STAT implementation and guidance on communicating the program's value to stakeholders. Are you ready to help students understand complex content, confront pressing social issues, and engage with the structures of power to advocate for change? This book is for you.

Civic Education in the Elementary Grades Dana Mitra, Stephanie C. Serriere, 2015 As former elementary school teachers, the authors focus on what is possible in schools rather than a romantic vision of what schools could be. Based on a 5-year study of an elementary school, this book shows how civic engagement can be purposive and critical—a way to encourage young people to examine their environment, to notice and question injustices, and to take action to make a difference in their communities and school. Focusing on the intersection of student voice and critical inquiry, the book describes how to embed civic engagement into curriculum, school decision-making processes, and whole-school activities. Chapters provide an overview of what research has demonstrated about civic engagement at the classroom, school, and community levels, including detailed descriptions of activities and lessons for practice. Classroom teachers, school principals, community members, and teacher educators can use this resource to foster a deeper, richer understanding of what is entailed in civic life. Book Features: A vivid portrait of a “typical” public school that wants to do more than teach to the test. An examination of the conditions that enable young people to participate in democratic practices, including identifying and questioning injustices. Concrete examples of student voice and critical inquiry in classroom contexts. Practices and activities that encourage children to get along with others, exchange perspectives, and work across differences. “Offers a suggestive range of evidence that high-quality civic engagement initiatives can enhance students’ academic, social, and emotional engagement. . . . It reveals the nitty-gritty of how experienced teachers can enable children who are immersed in meaningful civic work also to engage more deeply with mathematical problem-solving, peer collaboration, literacy and social studies learning, and development of empathy and mutual trust.” –From the Foreword by Meira Levinson “Mitra and Serriere show us not only that elementary-aged children are capable of civic engagement, but how such engagement can be nurtured in the classroom. Children can be active civic participants; this book demonstrates both the power of this idea and how we might accomplish this essential task.” –Beth C. Rubin, Rutgers University

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2023-01-01 Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we, as science teachers, deliver high-quality experiences to secondary students in an online environment that leads to age/grade-level appropriate science content knowledge and literacy, but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al., 2014; Wong et al., 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al., 2021; Seaman et al., 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido, Borrachero, Bermejo, & Mellado, 2013; Gunning & Mensah, 2011). *Teaching and Learning Online: Science for Secondary Grade Levels* comprises three distinct sections: Frameworks, Teacher's Journeys, and Lesson Plans. Each section explores the current trends and the unique challenges facing secondary teachers and students when teaching and learning science in online environments. All three sections include alignment with Next Generation Science Standards, tips and advice from

the authors, online resources, and discussion questions to foster individual reflection as well as small group/classwide discussion. Teacher's Journeys and Lesson Plan sections use the 5E model (Bybee et al., 2006; Duran & Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.
