*On the Song of Songs* Gregory,2012-04-01 Gregory the Great (+604) was a master of the art of exegesis. His interpretations are theologically profound, methodologically fascinating, and historically influential. Nowhere is this more clearly seen than in his exegesis of the Song of Songs. Gregory’s interpretation of this popular Old Testament book not only owes much to Christian exegetes who preceded him, such as Origen, but also profoundly influenced later Western Latin exegetes, such as Bernard of Clairvaux.This volume includes all that Gregory had to say on the Song of Songs: his Exposition on the Song of Songs, the florilegia compiled by Paterius (Gregory’s secretary) and the Venerable Bede, and, finally, William of Saint Thierry’s Excerpts from the Books of Blessed Gregory on the Song of Songs. It is now the key resource for reading and studying Gregory’s interpretation of the Song of Songs.

**An Introduction to Auction Theory** Flavio M. Menezes,Paulo K. Monteiro,2004-11-04 Auction theory is now an important component of an economist's training. The techniques and insights gained from the study of auction theory provide a useful starting point for those who want to venture into the economics of information, mechanism design, and regulatory economics. This book provides a step-by-step, self-contained treatment of the theory of auctions. It allows students and readers with a calculus background to work through all the basic results, covering the basic independent-private-model; the effects of introducing correlation in valuations on equilibrium behaviour and the seller's expected revenue; mechanism design; and the theory of multi-object auctions.

The Cognitive Bases of Interpersonal Communication Dean E. Hewes,2013-12-16 Our interpretations of the world we live in, and the people and institutions that comprise it, are acquired through complex interactions among what we believe to be true, what the world is, and/or what others think it is. Understanding those complex interactions is one of the most important goals of the social sciences. Of the many disciplines that have contributed to that understanding, two take center stage in this book -- psychology and communication. This volume's purpose is to reconnect the partially isolated environments of social psychology and communication. To do so, it utilizes four building blocks: \* the cognitive foundations of interpersonal communication as it might be studied from a social psychological perspective \* insiders' views of interpersonal communication from a cognitive psychological standpoint \* insiders' approaches to interpersonal communication from an AI perspective \* a critique of the cognitive enterprise that reflects the strong philosophical grounding of communication. Overall, the chapters typify some of the most interesting cognitive work done in the study of interpersonal communication. As such, the book should promote productive dialogue across disciplinary boundaries and stimulate further work within the field of interpersonal communication.
