**Consider the Source** James F. Broderick,Darren W. Miller,2007 The famous slogan of one major TV news network, More people get their news ... than from any other source, now applies to the Internet. But where can you find the news you need, how can you gauge its veracity, and how can anyone keep up? The answers are in this unique book by a professor of journalism and a working reporter. Jim Broderick and Darren Miller have written an A to Z guide to the best and worst news and information sites, featuring 100 in-depth, critical reviews and a 4-star rating system. You ll discover dozens of reliable sites that meet your needs, learn what to expect before you log on, and gain a reporter s hardnosed perspective on the motives and bias behind each resource. The supporting Web site is a virtual portal to the world of online news.

**Google and the Digital Divide** Elad Segev,2010-01-21 Beneficial to scholars and students in the fields of media and communication, politics and technology, this book outlines the significant role of search engines in general and Google in particular in widening the digital divide between individuals, organisations and states. It uses innovative methods and research approaches to assess and illustrate the digital divide by comparing the popular search queries in Google and Yahoo in different countries as well as analysing the various biases in Google News and Google Earth. The different studies developed and presented in this book provide various indications of the increasing customisation and popularisation mechanisms employed by popular search engines, which together with “organising the world’s information inevitably also intensify information inequalities and reinforce commercial and US-centric priorities and agendas. Develops an extensive historical investigation of information, power and the digital divide Provides new social and political perspectives to understand search engines in general and Google in particular Suggests original methods to study and assess the digital divide as well as the extent of commercialisation and Americanisation worldwide

The Impact of Aggregators on Internet News Consumption Susan Athey,2021 A policy debate centers around the question how news aggregators such as Google News affect traffic to online news sites. Many publishers view aggregators as substitutes for traditional news consumption while aggregators view themselves as complements because they make news discovery easier. We use Spain as a natural experiment because Google News shut down altogether in response to a copyright reform enacted in December 2014. We compare the news consumption of a large number of Google News users with a synthetic control group of similar non-Google News users. We find that the shutdown of Google News reduces overall news consumption by about 20% for treatment users, and reduces page views on publishers other than Google News by 10%. This decrease is concentrated around small publishers. We further find that users are able to replace some but not all of the types of news they previously read. Post-shutdown, they read less breaking news, hard news, and news that is not well covered on their favorite news publishers. These news categories explain most of the overall reduction in news consumption, and shed light on the mechanisms through which aggregators interact with traditional publishers.

Google+: High-impact Strategies - What You Need to Know Kevin Roebuck,2011 Google+ (pronounced and sometimes written Google Plus, often abbreviated as G+) is a social networking service operated by Google Inc. The service launched on June 28, 2011 in an invite-only field testing phase. The following day, existing users were allowed to invite friends, who are above 18 years of age, to the service to create their own accounts. However, this was quickly suspended a day after there was insane demand for accounts. Google+ integrates social services such as Google Profiles and Google Buzz, and introduces new services Circles, Hangouts, Sparks, and Huddles. Google+ will also be available as a desktop application and as a mobile application, but only on Android and iOS operating systems. Sources such as The New York Times have declared it Google's biggest attempt to rival the social network Facebook, which had over 750 million users in 2011. This book is your ultimate resource for Google+. Here you will find the most up-to-date information, analysis, background and everything you need to know. In easy to read chapters, with extensive references and links to get you to know all there is to know about Google+ right away, covering: Google+, Google 3D Warehouse, Ad Manager, AdSense, Google Advertising Professionals, AdWords, Google AJAX APIs, Google Alerts, Google Analytics, Google Questions and Answers, Google App Engine, Google App Inventor, Google Apps, Google Apps Script, Google Art Project, Google Audio Indexing, Blogger (service), Google Body, Google Books, Google Books Library Project, Google Bookmarks, Google Building Maker, Google Business Solutions, Google Buzz, Google Calendar, Google Chart API, Checker Plus for Google Calendar, Google Checkout, Chrome Web Store, Google Cloud Print, Google Code, Google Code Search, Google Contacts, Google Current, Google Custom Search, Google Data Liberation Front, Google Dictionary, History of Google Docs, Google Cloud Connect, Google Docs, Google eBooks, Google Fast Flip, Google Finance, Google Friend Connect, Google Gadgets, Google Gadgets API, Gizmo5, Gmail, Gmail interface, Google Grants, Google Groups, Google Health, IGoogle, Google Image Labeler, Google Images, Google Image Swirl, Google IME, Google Insights for Search, Jaiku, Google Labs, List of Google products, Living stories, Google Map Maker, Google Maps, Google Mars, Google Moderator, Google Moon, Music Beta by Google, Google News, Google News Archive, Google Offers, Google One Pass, Orkut, Google Person Finder, Google Personalized Search, Picasa, Google Plugin for Eclipse, Google Product Search, Google Public Data Explorer, Google Public DNS, Google Reader, Google Real-Time Search, Satellite map images with missing or unclear data, Google Scholar, Google Scholar and academic libraries, Google Script Converter, Google Sidewiki, Sitemaps, Sitemap index, Google Sites, Google Sky, Google Squared, Google Street View, Supplemental Result, Google Sync, Google Translate, Google Translator Toolkit, Google transliteration, Google Trends, Vevo, Google Videos, Google Wallet, Apache Wave, WDYL (search engine), Google Web History, Google Webmaster Tools, Google Website Optimizer, Google WiFi, YouTube This book explains in-depth the real drivers and workings of Google+. It reduces the risk of your technology, time and resources investment decisions by enabling you to compare your understanding of Google+ with the objectivity of experienced professionals.

**Google Scholar and More** William Miller,Rita Pellen,2014-01-02 In only a few years, Google has become an authoritative provider of multiple products which have changed the digital information landscape. This book discusses how libraries can go beyond Google’s basic search and Scholar functions to expand services for their patrons. Respected authorities reveal the expanding variety of new Google applications developed in the past few years, many of which have not received wide attention and are as yet not often used in libraries. Applications explored include Google Co-op, Google News, Google Docs & Spreadsheets, Google Calendar, and Google Talk. This book also discusses different important aspects of the company’s expansion of functions, such as the failure of the Google Answers experiment, the broad variety of free Google applications that librarians can use to collaborate, and the success of Google’s Blogger, among others. A helpful chronology of Google’s growth is provided, as well as comparative analyses between various Google functions and other functions that are currently available. The book is extensively referenced. This book is an invaluable resource for academic librarians, public librarians, school librarians, library science faculty, and special librarians. This book was published as a special issue of the Journal of Library Administration.

Choosing and Using a News Alert Service Robert Berkman,2004 There are dozens of competing firms that offer an e-mail-based news alert service. But how to know which one is best? This comprehensive new guide explains how these tools work and then identifies, compares, and evaluates more than two dozen free, inexpensive, and fee-based alert services. It not only helps you pick the right one, but also advises how to get the most out of the news alert once you begin the service. A detailed appendix also compares specific news source coverage for the major news alert vendors.

**Alternative Journalism** Chris Atton,James F Hamilton,2008-11-20 A provocative, inspiring and challenging intervention in both journalism and media studies.... Alternative Journalism is that rare book that services students as much as scholars. It widens the trajectory of media studies and creates different modes of reading, writing and thinking... It offers an alternative history beyond the tales of great men, great newspapers, great editors and great technologies. It adds value and content to overused and ambiguous words such as community and citizenship and captures the spark of new information environments. - THE, (Times Higher Education) Alternative Journalism investigates and analyses the diverse forms and genres of journalism that have arisen as challenges to mainstream news coverage. From the radical content of emancipatory media to the dizzying range of citizen journalist blogs and fanzine subcultures, this book charts the historical and cultural practices of this diverse and globalized phenomenon. This exploration goes to the heart of journalism itself, prompting a critical inquiry into the epistemology of news, the professional norms of objectivity, the elite basis of journalism and the hierarchical commerce of news production. In investigating the challenges to media power presented by alternative journalism, Atton addresses not just the issues of politics and empowerment but also the journalism of popular culture and the everyday. The result is essential reading for students of journalism - both mainstream and alternative.

**Using Google Advanced Search** Michael Miller,2011-11-16 Using Google Advanced Search is the one book you shouldn't be without if you regularly search the Web. And who doesn't search the Web with Google or one of its competitors at least once a day? And if you're a scholar, researcher or teacher, learning how to comb millions of Web pages for exactly the piece of information you need is critical to your success. Stop wasting time combing through search results that aren't what you want or need. Using Google Search will show you how to: use the ~ operator to search for similar words, or to use quote marks for performing an exact search use wildcards to search for missing words in an exact phrase search for specific file types search only a specific website or domain search only in the title of web pages, the URL or to within the text of the page search of pages that link to a specific webpage search in a different language use Google to locate bargains specifically search blogs and blog posts search libraries search for scholarly and specialty information perform calculations within the search box
